Glean

Enterprise AI / "Work AI" Platform · Palo Alto, CA · Private (~$7.2B) · Founded 2019

~$7.2B VALUATION · SERIES F VERIFIED	**~$300M** ARR, MAY 2026 REPORTED	**~$768M** TOTAL RAISED REPORTED	**2019** FOUNDED · 4 CO-FOUNDERS VERIFIED

THE SCARCE THING — 1440'S READ

A category-leading, fast-compounding enterprise-AI brand on a clear IPO path, sitting in the one lane Formula E has left open — enterprise AI — with a warm, de-risked home at Mahindra (committed as a manufacturer through 2030). **Move now, while category exclusivity is uncontested and cheap, and before a larger AI name notices the open grid.** Opportunity score: 72/100 (WARM).

1 · WHAT GLEAN IS, AND WHY IT MATTERS

Glean builds "Work AI" — an enterprise platform that indexes a company's entire knowledge estate (Slack, Confluence, Jira, Google Drive, Salesforce, GitHub, Microsoft 365 and more) behind a **permissions-aware knowledge graph**, then layers search, assistants and autonomous agents on top. VERIFIED The thesis a buyer cares about: it makes large, messy organisations dramatically faster at finding and acting on what they already know. Recent product direction is explicitly agentic — an Agentic Engine and Canvas co-authoring surface — and users had executed **250M+ agentic actions by January 2026**. REPORTED In March 2026 Glean acquired agentic-document company **Aryn**, deepening that roadmap. REPORTED

2 · TRACTION & MOMENTUM

- **Revenue:** ~$300M ARR by May 2026 — roughly tripled in ~15 months ($100M early 2025 → $200M Dec 2025 → $300M May 2026). REPORTED
- **Customers:** Fortune 500 logo count nearly doubled YoY; named customers include **Databricks, Samsung, Booking.com, Reddit and Pinterest**. REPORTED
- **Capital:** ~$768M raised across six rounds; backers include Sequoia, Kleiner Perkins, Lightspeed, ICONIQ, General Catalyst, Coatue and Wellington (Series F lead). REPORTED
- **Narrative edge:** positioned as the AI that *pays for itself* amid enterprise AI-budget scrutiny — a counter-cyclical sales story that is working. REPORTED

3 · FINANCIAL PROFILE — PRIVATE COMPANY: NO AUDITED PUBLIC STATEMENTS; ARR IS THE DISCLOSED PROXY

STATUS	**Private.** No public financial statements or audited P&L available. GAP Figures below are ARR and round disclosures, not audited accounts.
ARR TRAJECTORY	**~$300M** (May 2026), tripled in ~15 months REPORTED
LAST ROUND	**$150M Series F** at **~$7.2B** (June 2025), led by Wellington Management VERIFIED
PROFITABILITY	Not disclosed — assume growth-stage burn typical of a scaling enterprise-AI company GAP
IMPLIED MULTIPLE	~24× ARR on the Series F mark — rich, but in line with top-tier enterprise-AI comps; supports a marquee brand spend REPORTED

CFO note: no Chief Financial Officer is publicly identified. GAP For a company on an IPO trajectory this is a live readiness gap worth tracking — and a reason marquee brand decisions today sit with the CEO/COO/CMO, not a finance gatekeeper.

4 · LEADERSHIP & THE DECISION PATH

FOUNDER & CEO VERIFIED

Arvind Jain

A Google Distinguished Engineer for over a decade (Search, Maps, YouTube) and a co-founder of Rubrik, where he led R&D. Deep technical credibility; sets brand and strategic-partnership direction. **Co-decision-maker on marquee spend.**

CHIEF MARKETING OFFICER — PRIMARY ENTRY VERIFIED

Matt "Kix" Kixmoeller

Owns global marketing and the growth-stage brand-build a Formula E partnership would anchor. Previously led marketing at Ghost Autonomy and marketing/product at **Pure Storage** (a multi-billion-dollar data pioneer). **This is the door.**

CHIEF OPERATING OFFICER VERIFIED

Amar Maletira

Runs go-to-market and company operations. Previously CEO and board member of **Rackspace Technology (NASDAQ: RXT)**, a ~$2.7B hybrid-cloud/AI company — a public-company operator who understands sponsorship as a commercial instrument. A pragmatic ally for a deal structured around pipeline.

CO-FOUNDERS VERIFIED

Vishwanath · Gentilcore · Prahladka

T.R. Vishwanath (Technical Infrastructure Lead), Tony Gentilcore and Piyush Prahladka co-founded Glean with Jain in 2019 — an ex-Google engineering core that underpins the knowledge-graph moat.

Path to yes: approach Kixmoeller (CMO) as the owner of the brand mandate; bring Maletira (COO) in early as the commercially-literal operator who will judge the deal on pipeline and credibility; Jain (CEO) is the founder sign-off for a marquee spend. No CFO gatekeeper today shortens the chain. VERIFIED GAP

5 · COMPETITIVE MOAT — HOW DURABLE IS THE BUDGET?

Why this matters to 1440: a durable moat means durable budget and a multi-year partner who won't disappear mid-contract.

◆ THE EDGE

Permissions-aware knowledge graph + connector breadth. In heterogeneous estates (Slack + Confluence + Jira + Google + Salesforce + GitHub *alongside* Microsoft), Glean's cross-source retrieval is the differentiator — and most large enterprises are exactly that type. REPORTED

Incumbent stumble: only ~3.3% of Microsoft 365 seats had converted to paid Copilot by early 2026 (~15M of 450M) — the category leader has *not* locked the market. REPORTED

▲ THE PRESSURE

Microsoft. If Copilot materially closes the retrieval-quality gap over the next ~12 months, Glean's moat narrows in Microsoft-heavy accounts — the single most important variable to watch. REPORTED

Adoption friction: 100+ seat minimums, paid POCs, and reported 30–50% renewal step-ups at scale can slow land-and-expand. REPORTED

1440 read: the moat is real and the leader is beatable, but it is contested — which is precisely why a differentiated, enterprise-credible brand stage (and a talent-attraction halo in a brutal AI hiring market) is *more* valuable to Glean now, not less. The partnership is on-strategy, not vanity.

6 · FIT INTO THE F1 / FE ECOSYSTEM — MAHINDRA RACING

Formula E is the correct grid: its enterprise-and-sustainability audience matches Glean's buyer far better than a saturated F1 fintech/security lane, and **no enterprise-AI brand owns a Formula E team partnership** — the category is open. REPORTED Mahindra is the sharpest canvas: a **founding FE manufacturer since 2013**, committed to the **Gen4 era through 2030** VERIFIED, backed by the global Mahindra Group — a complex, multi-business enterprise that mirrors exactly the organisations Glean sells into. The 2030 commitment de-risks a multi-year term, and the team's parent-group relationships open enterprise doors.

Mode A — a working deployment, not signage. A racing team and its parent run on dispersed institutional knowledge (engineering docs, supplier data, sponsor and ops information) — precisely what Glean indexes and makes usable. A deployment for the team and selected Mahindra Group functions gives Mahindra real productivity value and Glean a flagship, referenceable enterprise deployment plus a co-marketing story across a global group.

RECOMMENDED DEAL ARCHITECTURE	
TIER	**Official Work AI Partner**
TERM	**3+ yrs (to Gen4 / 2030)**
VALUE	**~$3–4M / yr (est.)**
SCOPE	**AI-category exclusivity + live deployment**
GRID FIT	**PRIME — greenfield lane**

OPENING ANGLE

> *"Kix — Formula E's enterprise-AI lane is wide open, and Mahindra's committed to 2030, so a multi-year deal is de-risked. You'd own the category before the IPO. 25 minutes?"*

7 · RISKS & COUNTERS

HYPER-GROWTH FOCUS — a fast-scaling company may keep all spend on direct go-to-market. **Counter:** frame as enterprise-credibility + a referenceable reference deployment + a talent magnet, with measured pipeline — not brand vanity.

NO DATED TRIGGER — absent an acute clock, the deal can drift. **Counter:** category exclusivity *is* the clock; it vanishes the moment a rival AI brand signs an FE team.

FE VS F1 REACH INSTINCT — leadership may reach for F1's larger audience. **Counter:** FE's enterprise/sustainability profile and low category-crowding give Glean ownership it could never get in saturated F1 lanes.

MICROSOFT PRESSURE ON THE MOAT — Copilot could narrow the gap. **Counter:** that pressure makes a differentiated brand + talent halo more valuable now; structure exclusivity to lock the lane while it's cheap.

8 · CONFIDENCE & SOURCE LEDGER — EVERY LOAD-BEARING CLAIM, ITS CONFIDENCE, AND ITS SOURCE

CLAIM	CONF.	SOURCE
