Ramp

Fintech · Corporate Spend Management / AI Finance · New York · Private (~$40B+ pre-money; $750M raise in progress, May 2026)

Ramp crossed $1B ARR in August 2025 and is in active talks for a $750M raise above $40B pre-money - a step-change of more than 25% in six months - while opening a London office, with no spend-management brand anywhere on the F1 grid.

THE CASE

Ramp's active $750M raise at above $40B pre-money is the brand-reckoning moment - the point at which a category-defining fintech transitions from growth story to institutional brand. With more than $100B in annualized purchase volume, 50,000+ business customers, profitability up 153% year-on-year, and a freshly opened London office targeting EU/UK onboarding this summer, the commercial clock is already running hard. The grid gap is total: no spend-management or AI-finance brand holds a position anywhere in F1, and direct rival Brex has no motorsport deal, so the entire corporate-spend category sits unoccupied at the paddock level. The single slot that fits Ramp's profile - its Visa issuing relationship and its EU/UK expansion arc - is open at Visa Cash App Racing Bulls, where Ramp can sit as the spend-intelligence layer above the existing Visa rail rather than competing with it.

WHY NOW

The $750M raise closes a short, well-defined window during which brand-investment authority is at its peak. More concretely, the F1 London race in August 2026 is a live, dated activation for Ramp's UK business-onboarding launch - a marketing moment the company would otherwise have to manufacture, handed to it by the calendar. Partnership terms must be agreed before that race date locks, because the value of the activation collapses if the deal slips past it.

WHY VISA CASH APP RACING BULLS

Racing Bulls already carries Visa as its title sponsor, and Ramp's renewed multi-year Visa issuing agreement makes co-presence structural rather than conflicting: Ramp becomes the spend-management intelligence layer sitting above the Visa payment rail, an architecture that reinforces both brands. Cash App's younger demographic mirrors Ramp's founder, developer and CFO-suite audience, and no competing spend-management brand is anywhere near the car - so Ramp would not be sharing the category. The August London race lands precisely as Ramp opens UK business onboarding, aligning the team's biggest home-market moment with Ramp's biggest market-entry moment.

VALUE TO VISA CASH APP RACING BULLS — MODE B (TECH SERVES THE TEAM OPERATION)

MODE B - real operational value, off-car. Ramp's payments rail and back-office stack map directly onto Racing Bulls' commercial machine: paddock supplier settlements, sponsor-activation treasury flows, and a partner-onboarding funnel in which venture-backed, CFO-led companies are exactly the incoming audience the team wants. Ramp's Visa issuing partnership amplifies rather than displaces the title relationship. In return, the team offers race-weekend brand surfaces that fit a B2B audience: garage hospitality, pit-wall broadcast cuts, and digital founder-audience content timed to the London race. The team gets a modern finance stack and aligned co-marketing; Ramp gets the stage and the calendar anchor.

DEAL ARCHITECTURE

Entry at Official Spend Management Partner tier. FOUR YEARS, to span the EU/UK build-out cycle and capture two full FIA calendar rotations through London, Las Vegas and Austin. Estimated $6-9M/yr. Scope: garage and cockpit logo rights, Visa co-activation rights, hospitality at London and Las Vegas, and digital content rights for Ramp's CFO-audience channels.

PRIMARY DECISION-MAKER

Eric Glyman

CEO & CO-FOUNDER, RAMP - VERIFIED

Glyman co-founded Ramp after co-founding Paribus (acquired by Capital One). He drives all strategic capital allocation and partnership decisions; the $750M raise and the Visa stablecoin card deal are direct outputs of his office, so a sponsorship of this scale is his call to make.

OPENING ANGLE

> *"Eric, Ramp's Visa issuing deal and the London launch create an exact structural fit with Racing Bulls right now, and the August London race is a ready-made activation for your UK onboarding. Can we book 25 minutes before the calendar locks?"*

SCORE COMPOSITION

TIMING	CAPACITY	BRAND FIT	URGENCY	OPS FIT
20 / 20	**20** / 20	**20** / 20	**15** / 20	**12** / 20
Active $750M raise above $40B pre-money plus a newly opened London office converge into a single entry window.	Crossed $1B ARR (Aug 2025), $100B+ annualized purchase volume, profitability up 153% YoY - capacity is not a constraint.	Visa issuing-rail overlap with Racing Bulls' title sponsor makes co-presence structural; CFO-suite and developer demo match the team's audience.	The August 2026 F1 London race is a hard calendar anchor for Ramp's UK onboarding launch - the deal must be set before that date locks.	MODE B: back-office and treasury - Ramp serves the team's spend and settlement operation rather than the car itself.

RISKS & COUNTERS

VISA CHANNEL CONFLICT Ramp's Visa issuing deal could be read as a conflict with the Visa title sponsorship. **Counter:** It is a structural bridge, not a conflict - frame Ramp as the spend-intelligence layer above the existing Visa relationship; the two roles are architecturally distinct and mutually reinforcing.

RAISE TIMELINE SLIPPAGE If the $750M close slips, brand-budget authority may pause. **Counter:** Anchor the outreach to the London race date, which is independent of the raise close and drives its own urgency regardless of financing timing.
