Ramp

Fintech · Financial Operations / Corporate Spend & AI Finance · New York · Private (~$44B)

~$44B	~$1.4B	70,000+	+170%
VALUATION · SERIES F, JUN 2026 VERIFIED	REVENUE; $1B+ ANNUALIZED, FCF+ REPORTED	BUSINESS CUSTOMERS REPORTED	PURCHASE-VOLUME GROWTH YOY REPORTED

THE SCARCE THING — 1440'S READ

A category-defining fintech at a just-closed **$44B** valuation, $1B+ ARR and free-cash-flow-positive, launching in the UK/EU this summer - and **no spend-management brand sits anywhere on the F1 grid.** Visa Cash App Racing Bulls is the structural fit: Ramp's deepened Visa issuing relationship lets it sit as the spend-intelligence layer *above* the existing Visa rail. Move on the just-raised brand-reckoning moment. Opportunity score: 84/100 (HOT).

RECOMMENDED ACTION Open CEO Eric Glyman within 6-10 weeks - ahead of the British GP and Ramp's UK/EU launch this summer. Lead with the structural Visa fit (not an inside relationship - the leadership-tie gate is clear), and offer a short-form LOI to hold spend-management category exclusivity while terms form. Owner: 1440 partner-led.

DEAL READ WARM (84/100). Key dependency: a founder-level brand-spend decision with no inside champion (leadership-tie gate is clear). What breaks it: Ramp keeps all spend on direct go-to-market and treats motorsport as off-strategy. Mitigant: the structural Visa fit + the just-closed raise. · *Tracked in the outcomes loop: brief → meeting → deal.*

1 · WHAT RAMP IS

Ramp is a **financial-operations platform** - corporate cards, expense management, bill pay / AP automation, procurement and travel, increasingly run by **AI finance agents** - on a single system. VERIFIED Its wedge and brand promise is distinctive in the category: where rivals help companies *spend*, Ramp is built to help them *save* (automated savings, spend controls, anomaly detection), which aligns its pitch with the CFO's mandate. REPORTED It monetises primarily through interchange on card volume plus software, and has extended into **Ramp Stack** (a platform for accounting firms) and AI-era categories such as token/AI-spend management. REPORTED

2 · TRACTION & MOMENTUM

VALUATION TRAJECTORY — ~3× IN 18 MONTHS VERIFIED

- **Valuation ~3× in 18 months:** ~$13-16B (early 2025) → $32B (Nov 2025) → **$44B** (Jun 2026 Series F, led by ICONIQ, GIC and Ontario Teachers'). VERIFIED
- **Revenue:** ~$1.4B in 2026; more than $1B annualized while **free-cash-flow positive** - rare at this growth rate. REPORTED
- **Customers:** 70,000+ businesses (Jun 2026, up from ~50,000 at the start of the year); ~2,200 paying $100K+ (Nov 2025, +133% YoY enterprise growth). REPORTED
- **Purchase volume:** ~$100B+ annualized, growing ~170% YoY (Mar 2026) - its fastest in three years despite ~20× prior scale. REPORTED
- **UK/EU:** acquired payments platform **Billhop** (Mar 2026); onboarding UK/EU businesses this summer. VERIFIED

3 · FINANCIAL PROFILE — PRIVATE COMPANY: FIGURES ARE DISCLOSURES/ESTIMATES, NOT AUDITED STATEMENTS

STATUS	**Private.** No audited public statements; figures below are company/press disclosures. GAP
REVENUE	**~$1.4B** (2026); $1B+ annualized, **FCF-positive** REPORTED
VALUATION / LAST ROUND	**$44B** on a **$750M Series F** (Jun 2026), +38% over $32B six months earlier VERIFIED

PROFITABILITY	Underlying profitability +153% YoY (to Nov 2025); FCF-positive since ~Nov 2025 REPORTED
REVENUE MODEL	Interchange on card volume + software; exposed to card-spend and interest-rate cycles ESTIMATE

4 · LEADERSHIP & THE DECISION PATH

CO-FOUNDER & CEO — PRIMARY ENTRY VERIFIED

Eric Glyman

Co-founded Ramp (and earlier Paribus, acquired by Capital One). Drives strategic capital allocation and partnership decisions - the $750M raise and the deepened Visa partnership are his office. **A sponsorship of this scale is his call.**

CO-FOUNDER & CTO VERIFIED

Karim Atiyeh

Owns Ramp's technical and product architecture; the right co-decision-maker for any working integration (e.g. the team's treasury/settlement stack).

CHIEF FINANCIAL OFFICER (JAN 2025) VERIFIED

William Petrie

Owns the capital and spend discipline; a marquee multi-year sponsorship runs through his approval. The natural co-decision-maker on commercial terms.

CPO · CBO VERIFIED

Geoff Charles · Colin Kennedy

Geoff Charles (Chief Product Officer) and Colin Kennedy (Chief Business Officer) round out the bench. No standalone CMO is publicly confirmed - brand decisions sit with the CEO. GAP

Leadership-tie gate (F1/FE or deal-structuring history): CHECKED — none found GAP. No senior Ramp leader has prior F1/FE-ecosystem or sponsorship-deal experience, so this is a *cold, thesis-led* approach (the opposite of a JFrog/Genefa-Murphy warm path). Lead with the structural Visa fit and the just-raised brand moment, not an inside relationship.

5 · COMPETITIVE MOAT — HOW DURABLE IS THE BUDGET?

◆ THE EDGE

One integrated platform + a cost-savings wedge. Cards, expense, AP, procurement and AI finance agents on one system, sold as "save money," not "spend it" - which is why Ramp has out-grown Brex. REPORTED

Profitable hyper-growth: $1B+ ARR, FCF-positive, ~170% purchase-volume growth - a balance sheet that makes a multi-year deal immaterial. REPORTED

▲ THE PRESSURE

A crowded feature war. Brex, BILL, Navan, Rho, Mercury, Airwallex and SAP Concur all compete; spend management risks commoditising, and switching is a feature/price fight. REPORTED

Model exposure: interchange-led revenue is sensitive to card-spend volume and interest rates - a macro downturn pressures the engine. ESTIMATE

1440 read: the moat is real (integration + cost-savings alignment + profitable scale) but the category is contested - which makes a differentiated, CFO-credible brand stage *more* valuable to Ramp, not less. The Visa structural angle is the sharpest differentiator a rival can't copy.

6 · FIT INTO THE F1 ECOSYSTEM — VISA CASH APP RACING BULLS

Precedent — the pattern converts: born-big B2B-tech companies do sign F1. DXC Technology, itself born from a ~$26B merger/spin-off, became a Scuderia Ferrari Team Partner (2023, logo on the SF-23). A profitable, category-leading fintech is an even more natural fit. VERIFIED

No spend-management or AI-finance brand holds a position anywhere in F1, and direct rival **Brex has no motorsport deal** - the entire corporate-spend category is open. REPORTED The slot that fits Ramp's profile is **Visa Cash App Racing Bulls**: Ramp's deepened multi-year Visa issuing relationship (Visa Intelligent Commerce, Trusted Agent Protocol, AI bill-pay agents) makes co-presence with the team's Visa title **structural, not conflicting** - Ramp sits as the spend-intelligence layer above the Visa rail. VERIFIED The team's founder/CFO-suite audience is exactly Ramp's buyer, and the UK/EU launch lines up with a home-market activation at the British GP.

MODE B - real operational value, off-car. Ramp's payments rail and back-office stack map onto the team's commercial machine: paddock supplier settlements, sponsor-activation treasury flows, and a partner-onboarding funnel of venture-backed, CFO-led companies - the exact audience the team wants. The team gains a modern finance stack and aligned co-marketing; Ramp gets a CFO-audience stage and a calendar anchor.

RECOMMENDED DEAL ARCHITECTURE	
TIER	**Official Spend Management Partner**
TERM	**4 years**
VALUE	**~$6-9M / yr (est.)**
SCOPE	**Visa co-activation + CFO hospitality**
ANCHOR	**British GP + Las Vegas / UK launch**

OPENING ANGLE

> *"Eric, the $44B round and your UK/EU launch this summer line up exactly with Racing Bulls - Ramp as the spend layer above the Visa rail - and the British GP is a ready-made home-market activation. 25 minutes before a rival notices the open lane?"*

Why ~$6-9M/yr: mid-tier F1 partner programmes typically run ~$5-15M/yr; $6-9M positions Ramp as an Official (not title) partner, calibrated to its $1B+ revenue (immaterial spend) and the value of direct CFO/founder-audience access plus Visa co-activation, with category exclusivity carrying the premium. ESTIMATE Directional only - validate against Racing Bulls' actual rate card before any number reaches the prospect.

7 · RISKS & COUNTERS

VISA CHANNEL CONFLICT — Ramp's Visa issuing deal could read as a conflict with the Visa title. **Counter:** it is a structural bridge - Ramp is the spend-intelligence layer above the rail; the two roles are architecturally distinct and mutually reinforcing.

OFF-CAR RELEVANCE (MODE B) — spend management isn't in-car tech. **Counter:** lead with the Visa co-presence and a CFO/founder-audience hospitality + pipeline play; the value is audience and the Visa bridge, not a garage integration.

NO INSIDE CHAMPION — the leadership-tie gate is clear, so there's no warm motorsport buyer. **Counter:** this is a founder-level, thesis-led call; anchor to the just-closed raise and the UK launch, and bring the CFO in early on measurable pipeline/brand outcomes.
