INTELLIGENCE BRIEF / Nº 139 · HOT

Octopus Energy Group

Energy Retail & Technology · Renewable Supply, EV Charging, Grid Flexibility · London · Private ($9B, May 2024)

Octopus Energy, Britain's largest household supplier with £13.7bn of revenue and 10 million customers, closed its majority investment in US grid-flexibility company Uplight on 1 September, eight months after selling a $1B stake in Kraken at $8.65B. The most EV-native energy brand has never been on an electric racing car.

76 OPPORTUNITY / 100	TIMING WINDOW **HOT**	SERIES **FE**	RECOMMENDED TEAM **Jaguar TCS Racing**	ACTION HORIZON **6-10 WKS**

THE CASE

On 1 September Octopus Energy Group completed its majority investment in Uplight, which manages 8.5 GW of flexible load for more than 85 US utilities; Schneider Electric stays as minority partner and Nick Chaset runs Uplight alongside Octopus Energy US. It caps a year of capital re-shaping: $850M of the $1B Kraken stake sale (December 2025, $8.65B valuation) went to Octopus, on top of a $9B valuation set by Generation Investment Management and CPP Investments in May 2024. The year to 30 April 2025 brought £13.7bn of revenue, up 10%, and 10 million customers.

The brand is built on electric cars. Electroverse reaches more than 1 million public chargers in over 40 countries, Ford integrated it into its own charging network in September 2025, and more than half of Britain's 653,000 smart EV-tariff customers are with Octopus. It already knows long-term sport: Arsenal's official energy partner since October 2016. What it lacks is a stage where the product is the sport itself.

WHY NOW

The Uplight close on 1 September and the Kraken separation give Octopus a new group story to tell, and cash to tell it. Formula E's Season 13 opens in Jeddah on 18 December; a partner signed in the fourth quarter is on the car for the London E-Prix in May 2027.

BOTTOM LINE

A $9B energy brand whose product is electric driving, fresh from the Uplight close and the Kraken proceeds, with a proven ten-year sports partnership and no presence in electric racing. Jaguar TCS Racing's energy lane is open and the London E-Prix is its home stage.

ACQUISITION COMPLETED · CATEGORY WHITESPACE · SPONSORSHIP PRECEDENT · DISCOVERY: SCAN

WHY JAGUAR TCS RACING

Jaguar TCS Racing carries TCS as title and technology partner, Castrol and the Jaguar powertrain; there is no energy retailer, EV-charging or home-energy brand on the roster. The road brand relaunches electric-only in 2026 with its first new car sold from Bond Street, so every new owner needs a tariff and a charging network. Two British electrification brands, one home race in London, and a team that runs its technology partners through the garage.

VALUE TO JAGUAR TCS RACING — MODE A (TECH IN THE CAR / CHAMPIONSHIP)

MODE A - operational. Renewable supply and Electroverse roaming for the team's UK operations and road fleet, with Octopus's flexibility analytics applied to race-weekend energy use. The larger workstream is commercial: an Intelligent Octopus Go plus Electroverse bundle for buyers of the new electric Jaguars, on the model Ford adopted in 2025. Return: a category partner, London hospitality for millions of customers, and content putting charging in the racing story.

DEAL ARCHITECTURE

Entry as Official Energy Partner. **THREE YEARS**, Seasons 13-15, matching the GEN4 cycle and Jaguar's electric relaunch. Estimated £1.5-3M a season, part-payable in supply and charging services. Scope: car and suit placement, tariff and charging integration for Jaguar customers, London E-Prix hospitality and sustainability reporting.

PRIMARY DECISION-MAKER

Greg Jackson

FOUNDER & CEO, OCTOPUS ENERGY GROUP · **VERIFIED**

Jackson founded Octopus in 2015 and fronts its partnerships and investors. Path: Rebecca Dibb-Simkin, Chief Product and Marketing Officer, who owns the brand; Stuart Jackson, Co-Founder and CFO; Nick Chaset for any US extension. No separate CMO title.

OPENING ANGLE

Lead with the customer overlap.

> *“Greg, Octopus has more electric-car customers than anyone in Britain and Jaguar is about to relaunch electric-only; the energy lane on its Formula E car is open and Arsenal proved the model works for you. 25 minutes before the Jeddah opener to map it?”*

SCORE COMPOSITION

TIMING	CAPACITY	BRAND FIT	URGENCY	OPS FIT
16 / 20	**17** / 20	**16** / 20	**13** / 20	**14** / 20
Uplight closed 1 Sep; Season 13 opens 18 Dec, London in May.	£13.7bn revenue, $9B valuation, $850M from the Kraken sale.	EV-native consumer brand; Arsenal shows long-term sport intent.	New group story; no hard deadline beyond Season 13 rosters.	MODE A: supply, charging and a Jaguar customer bundle.

RISKS & COUNTERS

KRAKEN IS ALREADY IN PLAY Kraken, the Octopus spin-out, sits on 1440's approached list; the two conversations share a founder. Counter: Coordinate with the Kraken lead before contact; position this as the consumer-brand deal, distinct from Kraken's utility software.

LOSS-MAKING YEAR FY25 showed a £255m net loss after one-off items, and Octopus markets direct rather than through big sponsorships. Counter: Anchor on the Arsenal precedent and the in-kind supply component; size the entry at partner level.
