

Eos Energy Enterprises

Energy Storage · Zinc-Based Long-Duration Batteries · Edison, New Jersey (manufacturing in Pennsylvania) · Nasdaq: EOSE (about \$1.4B market cap, 4 Sep 2026)

Eos Energy Enterprises, the Nasdaq-listed maker of American-made zinc-based batteries for three-to-twelve-hour grid storage, appointed Michelle Buczkowski Chief Commercial Officer on 24 August 2026 with sales, marketing and communications reporting to her, and carries a record \$807M backlog into its factory consolidation.

THE CASE

Eos, headquartered in Edison, New Jersey, makes Znyth aqueous-zinc and Z3 zinc-bromine batteries in Pennsylvania for three-to-twelve-hour storage. Second-quarter revenue was \$68.8M, up 351% on 207% more cube deliveries; backlog rose 25% in the quarter to a record \$807M; full-year guidance was tightened to \$300M-\$350M. The company is loss-making: the quarter's net loss was \$275.7M and the gross loss \$48.8M. A \$303.5M loan guaranteed by the US Department of Energy, closed in December 2024, funds expansion to 8 GWh of capacity by 2027, and Cerberus is a strategic investor.

The trigger is a person, not a round. On 24 August the company put its Chief Administration Officer in charge of the whole commercial path, from first customer engagement to revenue, and moved marketing and communications under her; the previous commercial chief leaves on 20 October. A company that has just centralised its market voice, with shareholders watching the price fall, has a reason to be seen. Formula E is the electric stage that fits.

WHY NOW

The new Chief Commercial Officer owns marketing from 24 August and the transition completes on 20 October; the 2027 plan is being written now. Season 13 opens with the Jeddah E-Prix on 18-19 December, and the Austin E-Prix on 6 February and the Miami E-Prix on 20 February 2027 are the American rounds.

GRID FIT — CATEGORY-WHITESPACE CHECK ACROSS THE FE GRID (SPONSOR TABLE; 11 OF 38 PARTNER ROWS CATEGORISED)

Andretti Formula E	OPEN	no rival in this category lane
Lola Yamaha ABT Formula E Team	TAKEN	Shell
Citroën Racing	OPEN	no rival in this category lane
Cupra Kiro	OPEN	no rival in this category lane

BOTTOM LINE

A public, \$300M-revenue American storage maker that has just put its whole commercial path under one new owner: a real trigger, a thin balance sheet, and an open lane on the American Formula E team with two US rounds in February. WARM at 62 because capacity, not fit, holds it back.

WHY ANDRETTI FORMULA E

Andretti Formula E is the American team on the grid, owned by TWG Motorsports, running Nissan powertrains from Season 13 with TWG AI, Quest Global, Crowe UK and Reflo as partners and no energy or storage brand on the car. An American-made storage company on the American team gives both a home story at Austin and Miami, and the energy lane is open in the sponsor table. Envision, the other natural fit, is ruled out by its parent's own energy business.

DEAL ARCHITECTURE

Entry as Official Energy Storage Partner at associate level. **THREE YEARS**, Seasons 13-15, sized to the balance sheet: estimated \$1-2M a year with a review clause tied to the company's gross-margin turn. Scope: rear-wing placement, Austin and Miami hospitality for utility and developer customers, and a trackside storage showcase built from the company's own cubes.

PRIMARY DECISION-MAKER

Michelle Buczkowski

CHIEF COMMERCIAL OFFICER, EOS ENERGY ENTERPRISES ·
VERIFIED

Buczkowski became Chief Commercial Officer on 24 August 2026, moving from Chief Administration Officer; sales, business development, government affairs, marketing and communications report to her. Path: Joe Mastrangelo, CEO since 2019; Eric Javidi, CFO. No chief marketing officer is listed; marketing sits under her.

OPENING ANGLE

Lead with the home rounds.

"Michelle, marketing now reports to you, and Formula E's American rounds land in Austin and Miami in February. Andretti is the American team with no storage partner. 25 minutes to see whether a small three-year entry belongs in your 2027 plan?"

SCORE COMPOSITION

TIMING

14 / 20

New commercial owner from 24 Aug; US rounds in February.

CAPACITY

12 / 20

Public, \$300M+ revenue; loss-making, guidance cut, shares down.

BRAND FIT

14 / 20

American-made electric storage; Gen4 energy story; B2B audience.

URGENCY

11 / 20

A reorganisation, not a capital event; no launch or listing.

OPS FIT

11 / 20

MODE B; grid batteries stay off the car; showcase and hospitality.

RISKS & COUNTERS

CAPACITY Loss-making with the 2026 guidance cut in August and the shares far below their 52-week high; discretionary spend is under pressure. **Counter:** Associate-level entry at \$1-2M a year with a margin-linked review; the ask is small on purpose.

NO CAPITAL EVENT The trigger is a reorganisation of the commercial function, not new money. **Counter:** The reorganisation puts marketing under one new owner, which is exactly who buys a sponsorship.

PRODUCT OFF-CAMERA Grid-scale batteries have no role in the race car or the race weekend. **Counter:** A trackside storage showcase and the American-made story give the product a place to be seen.
