

Glow

Cybersecurity · AI-Era Endpoint Security · Tel Aviv & Palo Alto (founded 2025) · Private (\$1.2B; \$180M raised, Jul 2026)

Glow, the Tel Aviv and Palo Alto endpoint-security company founded in 2025 by former Meta engineering VP Roi Tiger, emerged from stealth on 22 July 2026 with \$180M raised at a \$1.2B valuation, led by Sequoia, Cyberstarts, Greenoaks and Redpoint, with paying customers and a US go-to-market team to build.

THE CASE

Glow's release states \$180M in funding at a \$1.2B valuation, led by Sequoia, Cyberstarts, Greenoaks and Redpoint Ventures, with Index, Swish, Lux, Operator Collective and Holly Ventures participating; CTech reports it as three rounds in about a year, a \$20M seed, a \$60M Series A at \$400M and a \$100M Series B. The product is prevention-first: it decides which software, AI agents and developer tools may run on employee devices rather than detecting them afterwards. Paying customers span healthcare, retail and financial services; the money goes to a US go-to-market team and Glow Labs.

Cybersecurity is the grid's most-sold technology category, and every vendor bought the same thing: CrowdStrike at Mercedes, Bitdefender at Ferrari, Keeper at Williams, Cato Networks at Alpine, a paddock full of the CISOs they sell to. Glow's leadership has run that playbook from inside: COO Emily Heath sat on Wiz's board through its \$32B sale to Google and was a Cyberstarts partner. A stealth exit with \$180M is when a company buys its stage.

WHY NOW

The stealth exit was 22 July and the stated use of funds is a US go-to-market team; the first brand budget follows the first sales hires. The United States GP in October and the Las Vegas GP in November sit inside the window, and teams close 2027 rosters in the fourth quarter.

GRID FIT — CATEGORY-WHITESPACE CHECK ACROSS THE F1 GRID (SPONSOR TABLE; 49 OF 346 PARTNER ROWS CATEGORISED)

MoneyGram Haas F1 Team	PRIME LANE	documented open category: cybersecurity (product)
Mercedes-AMG Petronas F1 Team	TAKEN	CrowdStrike
McLaren F1 Team	TAKEN	Cisco
Audi F1 Team	TAKEN	NinjaOne

BOTTOM LINE

A \$180M stealth exit at \$1.2B, a Sequoia and Cyberstarts syndicate, paying customers and a funded US sales build put Glow at the start of its brand-spend cycle. Haas lists cybersecurity as an open category, the grid has proved security vendors buy F1 to reach CISOs, and two US races remain inside the window.

WHY TGR HAAS F1 TEAM

Haas lists cybersecurity as an open product category: Toyota Gazoo Racing as title and technical partner, Mphasis for digital services, CommScope and Ruckus for connectivity, and no security vendor. Mphasis sells cyber services, a channel for a deployment rather than a clash. The lean American privateer prices an entry a 100-person company can carry, Kannapolis sits in Glow's chosen sales market, and three US races a year put Glow in front of the CISOs it is hiring to reach.

VALUE TO TGR HAAS F1 TEAM — MODE A (TECH IN THE CAR / CHAMPIONSHIP)

MODE A - operational. A race team's engineers run exactly the tools Glow polices: developer environments, package managers, AI agents and copilots on laptops that travel to 24 circuits. Glow maps what runs on every device, blocks risky packages and unsanctioned agents before they execute, and flags devices whose detection tools have gone quiet. Deployment across Kannapolis, Banbury and the trackside estate, a published case study, Glow Labs research on the team's threat surface.

DEAL ARCHITECTURE

Entry as Official Endpoint Security Partner. **THREE YEARS**, 2027-2029, covering the US go-to-market build and the next raise. Estimated \$2-4M a year, part-payable in product. Scope: sidepod or halo placement, deployment across the team's devices, US-race hospitality for CISO prospects, Glow Labs content.

PRIMARY DECISION-MAKER

Roi Tiger

CEO & CO-FOUNDER, GLOW · **VERIFIED**

Tiger founded Onavo, acquired by Meta, then spent nine years there, latterly as VP of Engineering; he fronts the launch and the raise. Path: Emily Heath, COO (former CISO of United Airlines and DocuSign, Wiz board); Arnon Joseph, Chief Product Officer. No chief marketing officer is listed.

OPENING ANGLE

Lead with the category precedent.

“Roi, six security vendors already buy F1 to reach CISOs, and the American team has no security partner. You have just left stealth with \$180M and a US sales team to build; a Haas deployment is reference customer and stage in one. 25 minutes before Austin?”

SCORE COMPOSITION

TIMING 16 / 20 Stealth exit 22 Jul; Austin and Las Vegas inside the window.	CAPACITY 13 / 20 \$180M raised at \$1.2B; ~100 staff, no revenue disclosed.	BRAND FIT 15 / 20 CISO-selling category with six grid precedents.	URGENCY 13 / 20 US go-to-market build funded now; no listing in view.	OPS FIT 14 / 20 MODE A: C2 endpoint control of dev tools and AI agents; Haas lane open.
--	--	--	--	--

RISKS & COUNTERS

EARLY-STAGE CAPACITY Glow is a year old with about 100 staff and no disclosed revenue; the \$180M funds research and sales before brand. **Counter:** Price at the Haas partner tier with product as part-payment; make the deployment the first proof point.

CROWDED CATEGORY Six security vendors already hold F1 seats; a seventh, unknown logo can be invisible. **Counter:** Lead with the prevention-first, AI-agent story the incumbents do not tell, and the Wiz-alumni leadership.
