

Fervo Energy

Clean Firm Power · Enhanced Geothermal · Houston, Texas · Nasdaq: FRVO (IPO 13 May 2026 at \$27)

Fervo Energy, the Houston enhanced-geothermal developer that listed on Nasdaq in May in clean energy's largest-ever IPO, signed a 396 MW, 15-year power purchase agreement with Google on 1 September, the biggest enhanced-geothermal deal yet, weeks before its first Cape Station power flows in Utah.

THE CASE

Fervo sold 70,000,000 shares at \$27 on 13 May 2026, above the marketed range; with the greenshoe the 10-Q puts the raise at 80,500,000 shares and roughly \$2.2B gross, and Fortune reported the stock opened about 35% higher, above a \$10B value. It is still pre-revenue: Q2 revenue was \$113,000 against a \$55.9M net loss. What it has is power under contract: a 396 MW, 15-year PPA with Google Energy announced 1 September, expandable to nearly 1 GW by June 2030, and Cape Station Phase I in Utah targeting first power in Q4 2026 on the way to 1.1 GW by 2030.

Formula E is the electrification stage: ABB holds the championship title and Google Cloud, Fervo's anchor customer's sister brand, is a championship partner. On the grid the only power-generation name is Envision Group, which owns Envision Racing; the oil majors sit with DS Penske (TotalEnergies) and the Lola Yamaha ABT team (Shell). No team carries a clean firm-power brand, and the one American team, Andretti, has no energy partner at all.

WHY NOW

The Google PPA landed on 1 September and first Cape Station power is due this quarter, the moment Fervo turns from developer into producer. Season 13 opens in Jeddah on 18 Dec and Formula E races in Texas for the first time at COTA on 6 Feb 2027.

BOTTOM LINE

A May IPO of roughly \$2.2B, a 396 MW Google contract signed in August and first Cape Station power due this quarter put Fervo at its brand-building peak as Formula E arrives in Texas. Andretti, the only American team, carries no energy partner and is redrawing its GEN4 livery now.

WHY ANDRETTI FORMULA E

Andretti is the only American team in Formula E and enters GEN4 with a new Nissan powertrain after Porsche's supply ends with Season 12, so livery and roster are being redrawn now. Its partners are TWG AI (primary, Official Artificial Intelligence Partner), Quest Global, Crowe UK and Reflo: no energy, power or sustainability brand. The Austin E-Prix at COTA is a home race for a Houston company. Envision is owned by a renewables group, two rivals carry oil majors, and the rest are works teams abroad.

VALUE TO ANDRETTI FORMULA E — MODE B (TECH SERVES THE TEAM OPERATION)

MODE B - brand. Fervo sells power to utilities and hyperscalers, not to race teams, so there is no on-car workstream and the score says so. What is concrete: an Official Clean Power Partner designation that gives a GEN4 team a firm-power story to tell on camera; Austin and Miami hospitality for the utility, hyperscaler and investor guests a newly listed company must court; and co-produced content pairing drilling engineers with race engineers, heat into electrons and braking into charge.

DEAL ARCHITECTURE

Entry as Official Clean Power Partner. **THREE YEARS**, Seasons 13-15 (2026/27-2028/29), spanning Cape Station Phase I and the 2028 Google GeoCluster. Estimated \$1.5-2.5M a season at team-partner tier. Scope: rear-wing and sidepod placement, COTA and Miami hospitality, joint content, and a Google co-activation given Google Cloud's championship role.

PRIMARY DECISION-MAKER

Tim Latimer
CEO & CO-FOUNDER, FERVO ENERGY · **VERIFIED**

Latimer co-founded Fervo in 2017 and fronted the IPO and the Google deal; a first sports partnership is his call. Path: Sarah Jewett, COO since June 2026, whose remit includes communications, policy and strategy (the sponsorship owner; no CMO exists), and CFO David Ulrey on budget.

OPENING ANGLE

Lead with the Texas debut.

“Tim, Formula E races in Texas for the first time on 6 February, your first Cape Station power flows this quarter, and the clean-power lane at the only American team is open. 25 minutes before Jeddah to see the numbers?”

SCORE COMPOSITION

TIMING 16 / 20 Google PPA 1 Sep; first power Q4; COTA debut 6 Feb 2027.	CAPACITY 16 / 20 ~\$2.2B raised in May; pre-revenue, \$55.9M Q2 loss.	BRAND FIT 17 / 20 Clean firm power at the electrification championship.	URGENCY 13 / 20 Season 13 rosters lock in Q4; no hard deadline.	OPS FIT 10 / 20 MODE B: no team workstream; brand and hospitality.
---	---	---	---	--

RISKS & COUNTERS

PRE-REVENUE PUBLIC COMPANY Q2 revenue \$113,000 and a \$55.9M net loss; a sports spend will be read by investors. **Counter:** Size at team-partner tier, tie activation to Cape Station milestones and the IR audience.

SHARES OFF THE DEBUT Opened above a \$10B value in May; market value was quoted near \$4.5-5B in early September. **Counter:** The 1 Sep PPA moved the stock about 25% in a day; anchor the pitch on contracted MW, not price.
