

Siemens Energy Transformation of Industry

Industrial Electrification · Compressors, Steam Turbines, Motors, Drives & Electrolysers · Germany (Siemens Energy group, Munich) · Standalone in preparation (parent Siemens Energy AG, ETR: ENR)

Siemens Energy is carving out Transformation of Industry, its 17,000-person, €5.7B-revenue business in compressors, steam turbines, motors, drives and electrolysers, into a standalone company, announced 25 August 2026, with outside investors or a listing to follow and the Omterra brand at launch.

THE CASE

On 25 August Siemens Energy said it is preparing the separation of Transformation of Industry, the business area making industrial steam turbines, compressors, generators, motors, drives and hydrogen electrolysers. It employs around 17,000 people and generated €5.7B of revenue in fiscal 2025; in the quarter to June, orders rose 31.5% to €1.81B and revenue 11.5% to €1.53B. Siemens Energy intends to deconsolidate the unit while keeping a meaningful minority stake, from external investors to a capital-markets transaction. Bloomberg reports Goldman Sachs advising and CVC, EQT, Bain, Brookfield and KKR weighing bids above €10B.

A business becoming a company has one job in its first year: tell the market who it is. This one starts under the Omterra name, created because the licence to the Siemens brand from the 2020 spin-off is time-limited, then meets owners who judge it on growth. Industrial electrification is its story, and Formula E is the world championship built on that story. Germany is where its factories and its launch audience sit.

WHY NOW

The separation was announced on 25 August; the brand launches later this year and the ownership decision follows. A launch partner has to be agreed before its first budget is set. Season 13 opens at the Jeddah E-Prix on 18-19 December; the Berlin E-Prix, the home round, follows on 8-9 May 2027.

BOTTOM LINE

A €5.7B industrial-electrification business becoming a standalone company with a new name, new owners and a German launch audience, matched to a German works team entering Formula E in the same season: early enough to be a founding partner rather than the fiftieth agency through the door.

WHY OPEL GSE FORMULA E TEAM

Opel enters Formula E in Season 13 with its own manufacturer licence and a team built from scratch in Rüsselsheim under Jörg Schrott; the only partner announced so far is Sparco for racewear, so every commercial category is open. A German industrial-electrification brand launching in the same season as a German works team gives both a founding-partner story with a Berlin home round. The Stellantis GEN4 powertrain the team helps develop is the audience the company sells to.

VALUE TO OPEL GSE FORMULA E TEAM — MODE B (TECH SERVES THE TEAM OPERATION)

MODE B - commercial and brand. Transformation of Industry sells motors, drives, compressors and electrolyzers to industrial buyers; the Berlin, London, Madrid and Zandvoort paddocks are a hospitality platform for those customers and for the investors choosing its owners. For Opel: a founding technology partner with an industrial-decarbonisation story, launch co-branding, and hardware for the Rüsselsheim workshop and trackside energy setup.

DEAL ARCHITECTURE

Entry as Founding Industrial Technology Partner. **THREE YEARS**, Seasons 13-15, spanning the brand launch, the ownership change and a probable listing. Estimated €2-4M a year. Scope: sidepod or rear-wing placement, naming of the team's energy and workshop infrastructure, Berlin and London hospitality, and engineering content.

PRIMARY DECISION-MAKER

Anne-Laure de Chamnard

MEMBER OF THE EXECUTIVE BOARD, TRANSFORMATION OF INDUSTRY, SIEMENS ENERGY · **VERIFIED**

De Chamnard sits on Siemens Energy's Executive Board with responsibility for Transformation of Industry, the business being separated; a launch partnership is hers to sponsor. Path: Christian Bruch, President and CEO, and Maria Ferraro, CFO, who set its first budget. No chief marketing officer is named on the leadership page.

OPENING ANGLE

Lead with the launch, not the logo.

"Anne-Laure, Transformation of Industry becomes a company with a new name and, soon, new owners. Opel launches a German works team the same season. 25 minutes before the ownership process closes, to see how the two launches fit?"

SCORE COMPOSITION

TIMING

15 / 20

Separation announced 25 Aug; brand launch later in 2026; Season 13 opens in December.

CAPACITY

16 / 20

€5.7B revenue business; but the first standalone budget is not yet set.

BRAND FIT

15 / 20

Industrial electrification, German, a new name to launch; B2B audience.

URGENCY

13 / 20

Ownership decision and brand rollout inside months; no fixed listing date.

OPS FIT

12 / 20

MODE B: launch story and hospitality; no car-side workstream.

RISKS & COUNTERS

OWNERSHIP IN FLUX A new owner or an IPO process could freeze discretionary spend before the standalone has its own budget.

Counter: Agree a founding-partner term sheet with current management, sized to survive a new board.

ABB ADJACENCY ABB is the championship's electrification title partner and a Siemens Energy competitor in parts of its market.

Counter: A team-level partnership is a different tier and category; check the championship's exclusivity list first.
