

Positron AI

AI Inference Silicon · Data-Centre Compute · Reno, Nevada · Private (\$5B; \$875M Series C, Sep 2026)

Positron, the Reno inference-chip company that claims to beat Nvidia on tokens per watt with commodity memory, closed an \$875M Series C at a \$5B valuation on 10 September, co-led by NEA, Atreides, Valor, Andra, SemiAnalysis Capital and Jim Clark: five times its February price.

THE CASE

The round is a \$375M Series C at a \$3.5B pre-money. A Series C-1 of up to \$500M is anchored by NEA and Jim Clark, with Qatar Investment Authority, Cisco Investments and Naver Ventures joining. It follows a \$230M Series B at above \$1B on 4 February. A \$51.6M Series A closed in July 2025. Atlas, the current system, runs in 50+ racks at Oracle Cloud Infrastructure, with Jump Trading and i3d.net in production and Cloudflare a named customer. Asimov tapes out on TSMC N3P at the end of 2026 for production in 2027.

Inference silicon has already bought a Formula 1 seat: Groq is on a McLaren, and eight AI partnerships were signed on the grid in the six months to May, with Anthropic at Williams, Oracle's strategy agent at Red Bull and TWG AI exclusive at Cadillac. Every one of those sells intelligence; Positron sells the power bill behind it, and the claim is 3.5x the performance per watt of the incumbent.

WHY NOW

The money landed on 10 September and it funds a launch: Asimov tapes out at the end of the year and Titan ships in 2027, a brand to build before the product lands. Teams close 2027 rosters in the fourth quarter; Austin and Las Vegas, Positron's home-state race, sit inside the window.

GRID FIT — CATEGORY-WHITESPACE CHECK ACROSS THE F1 GRID (SPONSOR TABLE; 85 OF 347 PARTNER ROWS CATEGORISED)

TGR Haas F1 Team ◆ RECOMMENDED	PRIME LANE	documented open category: ai inference / compute
Mercedes-AMG Petronas F1 Team	TAKEN	AMD, Meta AI, Snapdragon
McLaren Mastercard F1 Team	TAKEN	Dell Technologies, Google Cloud, Groq
Aston Martin Aramco F1 Team	TAKEN	ARM, Cognition, CoreWeave

BOTTOM LINE

\$875M at \$5B five days ago, a product launch fifteen months out, an inference-chip rival already on a McLaren, and the one American team with no AI partner, with Las Vegas as a home race. A sales-led company with no marketing chief and silicon still in the lab hold it at 76.

WHY TGR HAAS F1 TEAM

TGR Haas F1 Team is the American privateer, with its UK base in Banbury, and it carries no AI, compute or chip partner: the lane is taken at Cadillac (TWG AI, exclusive), McLaren (Groq), Mercedes (AMD, Snapdragon, Meta AI), Aston Martin (Cognition, CoreWeave), Red Bull (Oracle) and Williams (Anthropic). Haas's commercial story is doing more with less, which is Positron's pitch to the letter, and Toyota Gazoo Racing's title from 2026 brings a simulator programme that needs compute.

VALUE TO TGR HAAS F1 TEAM — MODE A (TECH IN THE CAR / CHAMPIONSHIP)

MODE A. Atlas racks on the team's own floor: strategy-model and computer-vision inference at the factory and trackside, where power and space are constrained, on hardware claiming 3.5x the performance per watt of the incumbent. In return: Official AI Inference Partner designation, sidepod and garage presence, Austin and Las Vegas hospitality for the buyers Positron sells to, and an engineering content series.

DEAL ARCHITECTURE

Entry as Official AI Inference Partner. **THREE YEARS**, 2027-2029, spanning Asimov's tape-out, Titan's launch and a full product cycle. Estimated \$4-7M a year, part-payable in Atlas and Titan systems the team would otherwise buy. Scope: sidepod placement, naming of the team's inference cluster, Austin and Las Vegas hospitality, and a content series on the cost of a token.

PRIMARY DECISION-MAKER

Mitesh Agrawal

CHIEF EXECUTIVE OFFICER, POSITRON AI · VERIFIED

Agrawal joined as chief executive in February 2025 from Lambda, where he was chief operating officer, and runs a sales-led company with no chief marketing officer listed. Path: Thomas Sohmers, founder and Chief Technology Officer; Michael Cho, Chief Financial Officer; Seung Wook Oh, Chief Operating Officer.

OPENING ANGLE

Lead with the power bill, not the chip.

“Mitesh, Groq is on a McLaren and Anthropic is on a Williams; the one American team with no AI partner runs on doing more with less, and Las Vegas is your home race. 25 minutes before Austin?”

SCORE COMPOSITION

TIMING 18 / 20 Round 10 Sep; Austin and Las Vegas inside the window.	CAPACITY 19 / 20 \$875M at \$5B; five times February's price.	BRAND FIT 13 / 20 B2B silicon; the tokens-per-watt story carries it.	URGENCY 14 / 20 Asimov tape-out end-2026, Titan 2027; no listing.	OPS FIT 12 / 20 MODE A: on-floor inference racks; Asimov still in the lab.
---	--	---	--	---

RISKS & COUNTERS

SILICON STILL IN THE LAB Asimov is a 2027 part and Atlas is the current system; a partnership announced before the chip ships risks promising what a lab still holds. **Counter:** Anchor year one on Atlas, in production at Oracle today, and time the Asimov story to the 2027 launch.

A CROWDED, EXCLUSIVE LANE Six teams already carry an AI partner and Cadillac's is exclusive; a rival could take Haas or Alpine before the fourth quarter. **Counter:** Move before Austin; Alpine is the named fallback.
