

Glydways

Autonomous Transit · Personal Rapid Transit Networks · South San Francisco, California · Private (~\$700M reported; \$170M Series C, Apr 2026)

Glydways, the South San Francisco builder of on-demand autonomous transit networks, closed an oversubscribed \$170M Series C co-led by Suzuki Motor Corporation, ACS Group and Khosla Ventures on 14 April 2026, as its first three public systems, in the UAE, greater New York and South Metro Atlanta, move toward passengers this year.

THE CASE

On 14 April 2026 Glydways announced a \$170M Series C co-led by Suzuki Motor Corporation, ACS Group and Khosla Ventures, with Mitsui Chemicals, Gates Frontier and new investor Obayashi Corporation; total funding exceeds \$250M, and Bloomberg reported the round at almost \$700M with talks for \$250M more at \$1B or above. The money is for going public in the literal sense: the South Metro Atlanta system broke ground in February and opens in December 2026, Dubai's RTA signed for a 2.8km pilot route, and Abu Dhabi's investment office is assessing a deployment. **THE FIRST PASSENGERS RIDE THIS YEAR.**

No autonomous-transit or mobility-network brand sits anywhere on the Formula E grid; the only autonomous-vehicle partner in either series is Zoox, at Williams in Formula 1. Formula E's works teams belong to carmakers, which matters when Suzuki co-led the round: Nissan, Porsche, Jaguar, Citroën, Cupra, DS and Mahindra each carry a rival badge. That leaves the independents, and one of them is American, with Miami and Austin on its next season's calendar.

WHY NOW

The Series C closed on 14 April and public passengers board in Atlanta in December. Between those dates sit the Tokyo E-Prix on 25-26 July, home race for Suzuki, Obayashi and Mitsui Chemicals, and Formula E's Season 13 roster window. The GEN4 era opens in December, with Miami and Austin following in February 2027.

BOTTOM LINE

A \$170M Series C, first public passengers in Atlanta by December and live agreements in Dubai and Abu Dhabi make 2026 the year Glydways needs a public face. Formula E races in the cities it sells to, no transit brand is on the grid, and Andretti is the American team with Miami and Austin next season.

WHY ANDRETTI FORMULA E

Andretti is the American team in Formula E, and its roster has no mobility or autonomy partner: Andretti Global, TWG AI, Quest Global, Crowe UK and Reflo, with Porsche power until Season 12 ends and Nissan from Season 13. As an independent it carries no carmaker badge to clash with Suzuki's. Its next season brings the Austin E-Prix and Miami in February 2027, the closest Formula E gets to Glydways' Atlanta and New York riders, and the paddock is where city transport authorities are hosted.

VALUE TO ANDRETTI FORMULA E — MODE B (TECH SERVES THE TEAM OPERATION)

MODE B - halo with mechanics. Glydways sells to cities, so the deliverable is the audience: transport authorities and mayors hosted at Miami, Austin and Tokyo, where Formula E races on their streets. A branded pod on the E-Prix fan concourse is a working demonstration, not a logo. Andretti gains a technology partner whose story, driverless electric transit, is Formula E's own pitch to host cities, plus content from the Atlanta line's first public rides.

DEAL ARCHITECTURE

Entry as Official Mobility Partner. **THREE YEARS**, Seasons 13-15, tracking public operations from 2027. Estimated \$1-2M a year, scaled to a Series C business. Scope: livery and driver-suit placement, a pod demonstration at Miami and Austin, city-official hospitality at Tokyo and Jeddah, and joint content around the Atlanta opening.

PRIMARY DECISION-MAKER

Gokul Hemmady
CEO, GLYDWAYS · **VERIFIED**

Hemmady joined Glydways in 2019 as President and CFO and now runs it as CEO; a first sports partnership is his sign-off. Path: Chris Riley, Chief Commercial Officer, ex-Ogilvy Singapore chairman, owns partnerships and corporate reputation; Mark Seeger, Founder and Chief Strategy Officer. No CMO is listed.

OPENING ANGLE

Lead with the cities, not the cars.

“Gokul, Formula E races on the streets of the cities you sell to, and no transit brand is on its grid. Andretti is the American team, with Miami and Austin next season. 25 minutes on how the pod meets the paddock?”

SCORE COMPOSITION

TIMING 15 / 20 14 Apr raise; Tokyo E-Prix, Season 13 next.	CAPACITY 12 / 20 \$170M raised; ~\$700M reported; no revenue yet.	BRAND FIT 17 / 20 City-street electric racing meets city transit.	URGENCY 15 / 20 First public riders in 2026; \$1B talks.	OPS FIT 11 / 20 MODE B halo; pod demo at US rounds.
--	---	---	--	---

RISKS & COUNTERS

CAPACITY IS EARLY-STAGE No revenue and a reported ~\$700M valuation; sponsorship competes with pilot capital. **Counter:** Size the entry to Formula E economics and step the fee with the Atlanta opening and the next round.

AN INFRASTRUCTURE SALE, NOT A CONSUMER ONE Glydways sells to governments; racing reach can look off-strategy to its board. **Counter:** Frame the deal around hosted city officials at Tokyo, Miami and Austin, with attendance as the KPI.
