THE CASE

Coralogix announced the \$200M Series F on 3 June 2026: co-led by Advent, CPPIB and Greenfield, with Brighton Park Capital participating, taking total funding to \$550M. TechCrunch and Calcalist put the valuation at \$1.6B, up from the \$1B-plus mark of the \$115M Series E led by NewView Capital in June 2025. TechCrunch reports more than 5,000 customers, revenue growing over 60% year on year and around 30 accounts above \$1M a year, with over half of enterprise customers running its AI agent, Olly. Founded in Israel in 2015, it is headquartered in Boston.

Observability is already priced on the grid: Splunk sits on McLaren through Cisco and Dynatrace on Visa Cash App Racing Bulls, both selling monitoring of the kind of data estate a race team runs. Coralogix is the challenger those incumbents are measured against in analyst comparisons, and a round of this size is when a developer-known brand goes looking for a wider enterprise audience: the CIOs and platform leaders who fill F1 hospitality suites.

WHY NOW

The Series F closed on 3 June; the quarter after a raise is when brand budgets are set. The British GP at Silverstone on 5 July, Williams' home race, falls inside the six-to-ten-week window, and teams shape their 2027 partner rosters through the summer break.

Atlassian Williams Racing	OPEN	no rival in this category lane
McLaren Mastercard F1 Team	TAKEN	Cisco, Splunk
Visa Cash App Racing Bulls	TAKEN	Dynatrace
Mercedes-AMG Petronas F1 Team	OPEN	no rival in this category lane

BOTTOM LINE

A \$200M Series F on 3 June, more than 5,000 customers growing over 60% and an observability lane no Williams partner covers make Coralogix a MODE A workstream with a warm route through the team's data roster. A reported valuation and a mid-size budget hold the score at 73.

WHY ATLASSIAN WILLIAMS RACING

Williams carries the most data-led roster in the paddock: Atlassian as title partner, VAST on the data platform, Keeper on identity and Claude as Official Thinking Partner. No partner monitors the estate itself, so the observability lane at Grove is open. McLaren holds Splunk through Cisco, Racing Bulls hold Dynatrace, and IBM at Ferrari and ServiceNow at Aston Martin sell observability products. Boston adds an American story for Miami, Austin and Las Vegas.

VALUE TO ATLASSIAN WILLIAMS RACING — MODE A (TECH IN THE CAR / CHAMPIONSHIP)

MODE A - operational. A Formula 1 team is a distributed data business: trackside telemetry streamed to the factory, simulation and CFD queues, pit-wall applications and a fan-facing digital estate, all producing logs, metrics and traces around the clock. Coralogix's in-stream analytics monitors that pipeline without indexing every byte; its agent, Olly, investigates incidents in plain language. In return: a named partnership, livery presence and race-weekend hospitality for its enterprise buyers.

DEAL ARCHITECTURE

Entry as Official Observability Partner. **THREE YEARS**, 2027-2029, covering the post-raise growth push and a possible listing window. Estimated \$3-5M a year, part-payable in platform credits. Scope: sidepod or engine-cover placement, naming of the team's monitoring stack, Silverstone, Austin and Las Vegas hospitality, engineering content with the data partners.

PRIMARY DECISION-MAKER

Brian Mullen

CHIEF MARKETING OFFICER, CORALOGIX · **VERIFIED**

Mullen owns Coralogix's marketing and partner ecosystem; as InfluxData's CMO he grew the InfluxDB community past one million developers. Path: Ariel Assaraf, Co-Founder and CEO, signs; Matt Handler, President and COO; Eran Hadad, CFO; Yoni Farin, Co-Founder and CTO, owns the workstream.

OPENING ANGLE

Lead with the data roster and the open lane.

“Brian, Williams has VAST for the data, Keeper for identity and Claude on the car, and nobody watching the pipeline underneath. Splunk and Dynatrace already took their seats elsewhere. 25 minutes before Silverstone to see the numbers?”

SCORE COMPOSITION

TIMING 17 / 20 Raise closed 3 Jun; Silverstone on 5 Jul inside the window.	CAPACITY 15 / 20 \$200M fresh at \$1.6B (reported); \$550M raised in total.	BRAND FIT 13 / 20 Developer-known B2B brand; little mainstream recognition.	URGENCY 12 / 20 No listing date; the AI-agent monitoring race is the clock.	OPS FIT 16 / 20 MODE A: in-stream monitoring of the telemetry-to-factory estate.

RISKS & COUNTERS

VALUATION IS REPORTED The \$1.6B figure is press-reported; the company release states only the round and the \$550M total. **Counter:** Pitch on the announced round; confirm the valuation on the first call.

MID-SIZE BUDGET A company of this size may see a seven-figure fee as a big share of its brand budget. **Counter:** Take part of the fee in platform credits; phase livery up in year two.
