

Dana Incorporated

Automotive Supplier · Driveline & e-Propulsion Systems · Maumee, Ohio · NYSE: DAN

Dana Incorporated, the \$7.5 billion driveline and e-propulsion supplier, agreed on 11 June to combine with Eaton's Mobility Group in a Reverse Morris Trust - an \$11 billion-sales vehicle-systems company closing in the first quarter of 2027, under a new chief executive who came up through commercial and marketing.

THE CASE

Eaton and Dana signed a definitive agreement on 11 June 2026 to separate Eaton's Mobility Group and combine it with Dana in a Reverse Morris Trust, creating a company valued at more than \$10 billion. The transaction values Mobility at about \$5.1 billion and the combined business at roughly \$11 billion of sales and \$1.7 billion of adjusted EBITDA on a fully synergised pro forma 2026 basis, with \$250 million of run-rate synergies inside 24 months. Eaton shareholders take at least 50.1 per cent. Closing is expected in the first quarter of 2027.

Dana closed 2025 with \$7.5 billion of sales, \$610 million of adjusted EBITDA and \$85 million of net income after divesting Off-Highway, a supplier that has already chosen its ground in light and commercial vehicles. Byron Foster became chief executive on 1 July 2026. He joined Dana in 2021 to run global commercial, marketing and communications, so brand investment is his own discipline rather than a delegated one.

WHY NOW

The combination closes in the first quarter of 2027 and the new company puts its name into the market then. Formula E's GEN4 era begins the same season, and teams settle their partner tables through the autumn.

BOTTOM LINE

A vehicle-systems company with about \$11 billion of sales is being assembled in public, and the executive who ran Dana's commercial and marketing function now runs the company. Mahindra Racing's partner table is nearly bare, Dana builds e-propulsion in Pune, and the GEN4 era begins as the deal closes.

WHY MAHINDRA RACING

Mahindra Racing carries only Mahindra & Mahindra and Tech Mahindra on its partner table, so the driveline, e-propulsion and thermal lane sits open at a works team committed to the GEN4 era. Dana's India footprint is real: eighteen facilities, and a Pune plant building Dana TM4 electric motors, inverters and vehicle control units in the city Mahindra & Mahindra calls home. The commercial conversation starts before the sponsorship one.

VALUE TO MAHINDRA RACING — MODE A (TECH IN THE CAR / CHAMPIONSHIP)

MODE A - operational. Dana TM4 builds electric motors, power inverters and control systems; Dana engineers thermal management, sealing and driveline for light and commercial vehicles. That gives a works team's powertrain group a real supplier bench to work against, with Mahindra's road-car programme behind it. In return Dana gets a named technical partnership, livery presence, and a paddock of manufacturers that is its own customer base.

DEAL ARCHITECTURE

Entry as Official Driveline & e-Propulsion Partner. **THREE YEARS**, Seasons 13-15, so the term opens with the combined company's first year and the GEN4 era together. Estimated \$1.5-3M a year, part-payable in engineering support. Scope: sidepod and halo placement, an engineering programme with the powertrain group, and hospitality at the European and Asian rounds.

PRIMARY DECISION-MAKER

Byron Foster
CHIEF EXECUTIVE OFFICER, DANA INCORPORATED · **VERIFIED**

Foster became CEO on 1 July 2026 after leading Dana's global commercial, marketing and communications from 2021 and running Light Vehicle Systems, its largest unit. Path: R. Bruce McDonald, Chairman, and Timothy Kraus, CFO since December 2021. No chief marketing officer is listed.

OPENING ANGLE

Lead with the new company, not the old one.

“Byron, you spent five years selling Dana before you ran it. In early 2027 you launch a company with \$11 billion of sales that needs a name buyers know, and Formula E's paddock is your customer list. 25 minutes?”

SCORE COMPOSITION

TIMING 15 / 20 Agreement signed 11 Jun; the company itself lands Q1 2027.	CAPACITY 18 / 20 \$7.5B sales, \$610M adjusted EBITDA; ~\$11B pro forma.	BRAND FIT 13 / 20 Tier-1 supplier; no consumer pull, but the paddock buys.	URGENCY 13 / 20 No hard deadline beyond the Season 13 roster window.	OPS FIT 15 / 20 MODE A: e-motors, inverters, thermal and driveline bench.

RISKS & COUNTERS

THE COMPANY CLOSES IN 2027 The combined business does not exist until the Reverse Morris Trust closes, expected in the first quarter of 2027 and subject to Dana shareholder approval. **Counter:** Contract now on a term starting at close, so the brand launch and Season 13 land together.

A SUPPLIER, NOT A CONSUMER BRAND Dana sells to vehicle makers, so a livery has no retail job to do and the board will ask what it buys. **Counter:** Price it as customer marketing against a trade budget: the paddock is manufacturers, not shoppers.
