

Celonis

Enterprise Process Intelligence · Process Mining · Munich and New York (dual headquarters; founded 2011) · Private (~\$13B, Aug 2022; ~\$2.4B raised)

Celonis, the Munich- and New York-based process-intelligence company last valued at about \$13B, launched the Celonis Context Model on 12 May 2026 and agreed to acquire MIT-linked Ikigai Labs, repositioning a platform Porsche already runs in production as the context layer for enterprise AI.

THE CASE

On 12 May 2026 Celonis launched the Celonis Context Model, a real-time digital twin of a company's operations built from process data, and signed a definitive agreement to acquire Ikigai Labs, whose forecasting and simulation software rests on patents licensed from MIT; MIT becomes a Celonis shareholder and Ikigai co-founder Devavrat Shah joins as Chief Scientist, Enterprise AI. Celonis last priced at about \$13B in an August 2022 extension led by Qatar Investment Authority, after a \$1B Series D at \$11B in June 2021; it has raised roughly \$2.4B in total. Revenue is not disclosed.

Formula E's technology lanes are held by integrators, not software: TCS titles the Jaguar, Tech Mahindra sits on the Mahindra, Sand Technologies on the Envision and TWG AI on the Andretti. No process-intelligence or operations-software brand is on the grid. Porsche AG already runs Celonis across supply chain and production, and Porsche is doubling its Formula E presence to two works teams for the first GEN4 season.

WHY NOW

The Context Model launched on 12 May and the Ikigai deal is closing; the marketing push runs through the autumn. Season 12 ends with the London double-header on 15-16 August, and Season 13 opens the GEN4 era with two Porsche entries, so the partner slate for the new cars is set this summer.

BOTTOM LINE

A product launch and an MIT-linked acquisition at a company last valued at \$13B, a customer in Porsche that already runs the software, and a Formula E grid with no operations-software brand make Celonis the right name for Porsche's expanded GEN4 programme. What holds it back: no fresh capital since 2022 and no public revenue.

DISCOVERY: SCAN

WHY PORSCHE FORMULA E TEAM

Porsche runs Celonis inside its own operations: with MHP, its consulting subsidiary, it has used Celonis process mining across more than 25 projects from inbound supply chain to production and finance. The Formula E team is the sharpest public expression of that culture, and from Season 13 it doubles to two works entries that need partners. Its Season 12 roster is reported to include TDK, NetApp, Synopsys and Cato Networks; none is an operations-software brand.

VALUE TO PORSCHE FORMULA E TEAM — MODE A (TECH IN THE CAR / CHAMPIONSHIP)

MODE A - operational. Celonis maps the team's race operations end to end: freight and parts flow across a global season, garage build and tear-down, spares approvals and supplier lead times, with the Context Model as a live digital twin the operations director can query and Ikigai's forecasting flagging bottlenecks before a race weekend. In return: Official Process Intelligence Partner status, livery on both cars, London hospitality.

DEAL ARCHITECTURE

Entry as Official Process Intelligence Partner across both Porsche works entries. **THREE YEARS**, Seasons 13-15, the first three GEN4 seasons. Estimated \$2-3M a year, part-payable in software and services. Scope: livery on both cars, naming of the team's operations twin, hospitality at Berlin and London.

PRIMARY DECISION-MAKER

Carsten Thoma

PRESIDENT, CELONIS · VERIFIED

Thoma, President since August 2023, owns corporate strategy, marketing, ecosystem and Celonis Labs; a sponsorship sits in his remit. Path: co-founders and co-CEOs Alexander Rinke and Bastian Nominacher, and CFO Benoit Fouillard (since December 2024). No chief marketing officer is currently listed.

OPENING ANGLE

Lead with Porsche's own Celonis deployment.

“Carsten, Porsche already runs Celonis from inbound logistics to the production line, and from Season 13 it fields two Formula E teams with no operations-software name on the cars. The London finale is ten weeks out. 25 minutes to talk about the second car?”

SCORE COMPOSITION

TIMING 14 / 20 Launch 12 May; GEN4 roster set over summer.	CAPACITY 17 / 20 \$13B valuation; \$2.4B raised; no revenue public.	BRAND FIT 15 / 20 German enterprise AI; Porsche customer already.	URGENCY 12 / 20 Product launch needs amplifier; no deadline.	OPS FIT 15 / 20 MODE A: race-operations process twin.

RISKS & COUNTERS

NO NEW CAPITAL SINCE 2022 The \$13B mark is four years old and revenue is undisclosed; appetite for a first motorsport budget is unproven. **Counter:** Lead with the Ikigai launch budget and a services-heavy structure; confirm the marketing envelope on the first call.

CUSTOMER, NOT SPONSOR Porsche buys Celonis software; turning a supplier into a paying partner inverts the relationship. **Counter:** Position it as a joint showcase of Porsche's own process programme, co-funded, with Celosphere as the stage.
