

Higgsfield AI

Generative AI Video / Content · San Francisco, CA · Private (~\$5B reported raise, Jun 2026; ~\$500M revenue run-rate)

Higgsfield AI - the fastest-growing generative-AI video platform (~\$500M run-rate, reportedly raising at ~\$5B) - has never been in motorsport, and for the grid's youngest social-first team it is a two-way content + audience exchange, not a logo.

THE CASE

Higgsfield AI, founded in 2023 by ex-Snap generative-AI head Alex Mashrabov, is the breakout generative-AI video platform - 'Cinema Studio' turns prompts into cinematic, camera-controlled, character-consistent video for creators and marketers, with ~20M users. It has scaled from \$0 to a ~\$500M revenue run-rate in ~14 months and is reportedly raising \$300-500M at a ~\$5B valuation (Jun 2026), up from a \$1.3B valuation in January (Accel-led \$130M Series A). It has never touched motorsport. This is deliberately NOT an in-car play: Higgsfield builds no car technology, so it is a CONTENT / fan-engagement partnership (MODE B). The fit is with Visa Cash App Racing Bulls - the grid's explicitly youngest, most social-media-native team - where AI cinematic social video is a genuine, named content workstream and the audiences overlap almost exactly. HONEST framing: it is a content/marketing exchange, not performance tech, and F1's AI lane is crowded - so it is positioned in the distinct video-content sub-lane on an open team, and scored as a strong-but-MODE-B signal (its deal-capability and momentum are the real edge). Decision-maker: Co-Founder & CEO Alex Mashrabov.

WHY NOW

Higgsfield is at a live capital + momentum peak (reportedly raising at ~\$5B this quarter, ~\$500M run-rate), which is exactly when a company invests in brand and distribution, and the AI-content lane in F1 is starting to fill (ElevenLabs-Audi) - so the value of claiming the video-content position with the right social-first team is now. The honest why-now is catalyst- and land-grab-driven, not a dated race trigger.

BOTTOM LINE

The fastest-growing generative-AI video platform (cinematic AI video/image for creators + marketing) - ~\$500M revenue run-rate and reportedly raising at ~\$5B (Jun 2026, up from \$1.3B in Jan), founder-CEO Alex Mashrabov (ex-Snap GenAI head). HEAVILY deal-capable (the capacity that killed smaller AI names). HONEST: this is a CONTENT / fan-engagement play (MODE B) - nothing in the car - so it's pitched to Racing Bulls, the grid's youngest, most social-first team, as a two-way content + audience exchange, and scored accordingly.

WHY VISA CASH APP RACING BULLS

Racing Bulls is the grid's youngest, most social-media-first team (the Red Bull sister team, built for a younger demographic) with no AI or content partner - so a generative-AI video engine is a real, on-narrative content workstream, and its fanbase is almost exactly Higgsfield's creator/consumer demographic. Chosen over the engine's greenfield default (Cadillac/Alpine) on that narrative fit, not just an open slot. No conflict (Higgsfield's backers - Accel etc. - are diversified funds, not team rivals).

VALUE TO VISA CASH APP RACING BULLS — MODE B (TECH SERVES THE TEAM OPERATION)

A TWO-WAY exchange (business + tech both directions), not a logo fee - three concrete swaps. (1) AI CONTENT ENGINE <-> CINEMATIC CANVAS: Higgsfield gives the team a cinematic AI-video production engine (broadcast-quality social/fan content at a fraction of the cost and time of a traditional studio); in return the most cinematic, globally-watched sport becomes Higgsfield's flagship showcase and IP to prove and market its product to brands. (2) YOUNG AUDIENCE <-> CREATOR ECOSYSTEM: the team's young, social-native fanbase is exactly Higgsfield's customer demographic (a direct acquisition channel), while Higgsfield's ~20M-creator ecosystem and tools amplify the team's content reach and volume. (3) CO-MARKETING INNOVATION <-> BRAND CREDIBILITY: joint 'AI-made F1 content' campaigns position Racing Bulls as the innovative youth team and give Higgsfield a marquee brand association and case study. RB gets a scaled, low-cost content machine + an innovation story; Higgsfield gets a global stage, its exact buyers, and customer acquisition.

DEAL ARCHITECTURE

Official AI Content / Creative Partner on Visa Cash App Racing Bulls, minimum three years, mid-tier (Higgsfield is highly deal-capable), structured as a content-production + co-marketing workstream (cinematic social/broadcast video at scale, joint AI-content campaigns, creator-ecosystem amplification) - value exchanged both ways, not a pure logo fee.

PRIMARY DECISION-MAKER

Alex Mashrabov
CO-FOUNDER & CEO, HIGGSFIELD AI - VERIFIED (EX-HEAD OF GENERATIVE AI, SNAP)

Co-founder and CEO of Higgsfield, former head of Generative AI at Snap (which acquired his prior startup AI Factory for \$166M) - the owner of brand/partnership decisions and the entry point, for whom a global cinematic showcase + customer-acquisition channel is strategically valuable. Confirm the marketing/growth lead before outreach.

OPENING ANGLE

"Alex - F1 is the most cinematic sport on earth and Racing Bulls owns its youngest, most social audience, but no one has claimed AI video content on the grid. You get the ultimate showcase and your exact customers; they get a scaled content engine. That's a two-way deal, fresh off your raise. 25 minutes?"

SCORE COMPOSITION

TIMING 17 / 20 Hypergrowth (\$0 to ~\$500M run-rate in ~14 months) and reportedly raising ~\$5B (Jun 2026) - a live, this-quarter capital + momentum catalyst at the peak of the generative-video cycle.	CAPACITY 18 / 20 ~\$5B reported valuation and ~\$500M revenue run-rate - easily deal-capable at any tier (the standout strength, and the exact capacity smaller AI/EV names lacked).	BRAND FIT 14 / 20 Cinematic AI video maps onto the most cinematic, globally-watched sport and the youngest social-first team - but it is a content/marketing fit, not performance, and F1's AI lane is crowded (so a distinct content sub-lane on an open team, not another strategy-AI logo).	URGENCY 13 / 20 No dated F1 trigger, but the AI-content lane is filling (ElevenLabs-Audi on the audio side), so there is real value in claiming the video-content position early.	OPS FIT 13 / 20 MODE B (honestly): Higgsfield builds no car technology - the workstream is a real, named content / fan-engagement engine (cinematic social/broadcast video at scale), not an in-car system.
--	--	--	---	---

RISKS & COUNTERS

CONTENT PLAY, NOT PERFORMANCE (MODE B) Higgsfield builds no car technology; the workstream is content/fan-engagement, not in-car.
Counter: Pitched and scored honestly as a content + audience exchange with named mechanics (production engine, acquisition channel, co-marketing), not a technical partnership - its capacity and momentum are the edge.

F1'S AI LANE IS CROWDED Eight AI partnerships in six months (Anthropic-Williams, Google-McLaren, ElevenLabs-Audi, etc.). **Counter:** Generative VIDEO content is a distinct sub-lane from strategy/ops LLMs and audio; claimed on Racing Bulls, which has no AI/content partner - so the lane is open.

REPORTED (NOT CLOSED) RAISE The ~\$5B is a reported/in-progress round (Jun 2026), not closed. **Counter:** Even at the prior \$1.3B and ~\$500M run-rate it is amply deal-capable; treat capacity as strong regardless of where the round prices.
