

Firmus Technologies

AI Infrastructure · Liquid-Cooled NVIDIA AI Factories · Singapore (founded in Sydney, 2019); AI Factories in Tasmania · Private (>\$10.5B post-money; ASX listing targeted Q4 2026)

Firmus, the Sydney-founded builder of liquid-cooled NVIDIA AI Factories on Tasmanian hydro power, announced a fully subscribed \$2B strategic equity round on 7 August at a post-money valuation above \$10.5B, backed by Coatue, NVIDIA, Blackstone and Jane Street, with an ASX listing targeted for the fourth quarter.

THE CASE

The round is company-announced: \$2B of equity from Coatue, NVIDIA, funds managed by Blackstone and Jane Street, taking new equity raised in the past year past \$3B and the valuation from \$5.5B in April to more than \$10.5B. Beneath it sits a \$10B debt facility led by Blackstone and Coatue, signed in February, for Project Southgate: liquid-cooled AI Factories in Tasmania, 36,000 NVIDIA GPUs at the Launceston site, and a 170,000-GPU campus in Batam, Indonesia, from the first quarter of 2027, against which Firmus reports up to \$30B of committed revenue over six years.

The identity moment is the listing. Firmus and its advisers are working towards an ASX float in the final quarter of 2026 (Wilson Asset Management, Capital Brief), which at the reported size would rank among the largest technology listings in Australian history. A company about to sell itself to Australian institutions and retail investors needs a brand beyond data-centre engineers, and the local precedent is set: Atlassian, Airwallex and Airtasker all bought Formula 1 for that reason.

WHY NOW

The round closed on 7 August and the float is targeted for the fourth quarter, so the listing's brand budget is being set now. The Singapore GP in October sits an hour from Batam, and the 2027 season opens with the Australian GP in Melbourne, the home market for the offer.

GRID FIT — CATEGORY-WHITESPACE CHECK ACROSS THE F1 GRID (SPONSOR TABLE; 49 OF 346 PARTNER ROWS CATEGORISED)

Atlassian Williams Racing	OPEN	no rival in this category lane
McLaren Mastercard F1 Team	TAKEN	Dell Technologies
Aston Martin Aramco F1 Team	TAKEN	NetApp
Mercedes-AMG Petronas F1 Team	OPEN	no rival in this category lane

BOTTOM LINE

A company-announced \$2B round at more than \$10.5B, a \$10B debt stack and an ASX listing targeted for the fourth quarter put Firmus at peak brand-investment motive; Williams offers the grid's only Australian-titled car and an open compute lane. Founder history and unresolved Tasmanian power hold the score at 72.

WHY ATLASSIAN WILLIAMS RACING

Williams is the Australian car on the grid: Atlassian, founded in Sydney, became title partner in 2025 in the largest deal in the team's history, and the roster around it is data-native: VAST for the data platform, Keeper for identity, Claude as Official Thinking Partner. The sponsor table shows no cloud, GPU or AI-compute partner at Williams; CoreWeave holds that lane at Aston Martin Aramco, Core Scientific and TWG AI at Cadillac. Two Sydney companies on one car is a story the ASX will read.

VALUE TO ATLASSIAN WILLIAMS RACING — MODE A (TECH IN THE CAR / CHAMPIONSHIP)

MODE A - operational. Williams' development outside the FIA aerodynamic-testing limits is GPU-bound: machine-learning surrogates, driver-in-loop and strategy simulation, telemetry analytics between sessions. Firmus supplies that capacity from liquid-cooled NVIDIA factories it says use 33% less energy and 99% less water, on demand and outside cost-cap capital. In return: Official AI Factory Partner designation, livery presence, Singapore and Melbourne hospitality for its investor and customer audience.

DEAL ARCHITECTURE

Entry as Official AI Factory Partner. **THREE YEARS**, 2027-2029, spanning the listing and the Batam ramp. Estimated \$3-5M a year, part-payable in compute. Scope: sidepod placement, naming of the team's compute environment, hospitality at the Australian and Singapore rounds, joint engineering content.

PRIMARY DECISION-MAKER

Oliver Curtis

CO-FOUNDER & CO-CEO, FIRMUS TECHNOLOGIES · **VERIFIED**

Curtis co-founded Firmus in Sydney in 2019, fronts every raise and holds a reported 19% stake. Path: Tim Rosenfield, Co-Founder and Co-CEO; Kirsty Godfrey-Billy, CFO, ex-Xero; Cameron Hanson, COO; Grant Dempsey, Chair. No chief marketing officer is listed.

OPENING ANGLE

Lead with the Australian car.

“Oliver, Atlassian took Williams to market as the Australian team; you are taking Firmus to the ASX. The compute lane on that car is open and Singapore is an hour from Batam. 25 minutes before the Singapore GP to see the numbers?”

SCORE COMPOSITION

TIMING 16 / 20 Round announced 7 Aug; Singapore GP inside the window; float targeted Q4.	CAPACITY 16 / 20 \$2B equity at \$10.5B+ and \$10B of debt, but earmarked for capex.	BRAND FIT 12 / 20 B2B infrastructure; strong Australian tie; founder history to manage.	URGENCY 15 / 20 Q4 listing target is real but has already slipped once.	OPS FIT 13 / 20 MODE A GPU capacity; lane open at Williams; low on-camera value.

RISKS & COUNTERS

FOUNDER HISTORY Co-CEO Oliver Curtis served 12 months in prison for insider trading, released 2017 (Startup Daily); team due diligence will surface it. **Counter:** Route through co-CEO Rosenfield and Chair Dempsey; the ASX process will have handled disclosure.

POWER AND COMMUNITY Hydro Tasmania decides on Firmus' 450 MW request only by end-2026; the Tasmanian sites face local opposition (ABC News). **Counter:** Anchor the activation on Batam and Singapore until power is contracted.
