ThreatLocker

Cybersecurity · Zero Trust Endpoint Protection · Orlando, Florida (founded 2017) · Private (\$190M Series F, Jul 2026)

ThreatLocker, the Orlando zero-trust endpoint company protecting more than 70,000 organisations, closed a \$190M Series F led by Elephant on 29 July 2026, with Koch Disruptive Technologies joining and total funding now near \$500M. The money funds AI-risk controls and a first UK office in Reading.

THE CASE

ThreatLocker announced a \$190M Series F on 29 July 2026, led by Elephant, with D. E. Shaw Ventures and Arthur Ventures returning and Koch Disruptive Technologies new. It follows a \$20M Series B, \$100M Series C, \$115M Series D (April 2024) and \$60M Series E (April 2025): nearly \$500M in total. SecurityWeek puts the pre-round valuation at \$1.6B (reported); the company has not stated a new one and publishes no revenue. The platform, allowlisting and Ringfencing that block whatever is not explicitly permitted, protects more than 70,000 organisations. The round funds AI-risk controls and a Reading office. Cybersecurity is the most-sold technology category on the grid: CrowdStrike at Mercedes, Bitdefender at Ferrari, Keeper at Williams, 1Password (Red Bull) and Cato Networks at Alpine. Each vendor bought the same thing, a paddock full of the enterprise buyers it sells to. ThreatLocker reaches the mid-market through managed service providers and has just committed to Europe. What it lacks is a brand stage for those partners and their customers.

WHY NOW

The round closed on 29 July and the Reading office is the first spend against it; marketing budgets are set in the quarter after a raise. The United States GP in October and the Las Vegas GP in November sit inside the window, and teams close 2027 rosters in the fourth quarter.

BOTTOM LINE

A \$190M Series F closed on 29 July, a first European office and a platform protecting 70,000 organisations put ThreatLocker at peak spend authority. Cadillac's roster has no cybersecurity partner, the team is building its estate now, and two US races remain inside the window.

FUNDING EVENT CATEGORY WHITESPACE GEOGRAPHIC EXPANSION DISCOVERY: SCAN

WHY CADILLAC F1 TEAM

Cadillac is the grid's first greenfield IT estate in a decade: a debut team operating from Fishers, Indiana, Charlotte and Silverstone, with Core Scientific building its Indianapolis data hub, IFS running operations, and no cybersecurity partner on the roster. The team wants fewer, bigger partners rather than a title sponsor. An Orlando company on an American car gets three US rounds a year at home; Cadillac gets a US security brand from launch.

VALUE TO CADILLAC F1 TEAM — MODE A (TECH IN THE CAR / CHAMPIONSHIP)

MODE A - operational. A new team writes its security baseline from nothing: engineering workstations, machining and additive cells, the Indianapolis data hub, and trackside laptops that join a different network 24 weekends a year. ThreatLocker's allowlisting and Ringfencing deny anything not explicitly permitted, which is how a cost-capped team stops ransomware without a large security operations centre. Deployment across Fishers, Charlotte and Silverstone, a published case study, a race-weekend response desk.

DEAL ARCHITECTURE

Entry as Official Zero Trust Cybersecurity Partner. **THREE YEARS**, 2027-2029, covering the Reading launch and any listing window. Estimated \$3-5M a year, part-payable in product and services. Scope: halo or sidepod placement, deployment across the team's estate, US-race hospitality for MSP partners, factory content.

PRIMARY DECISION-MAKER

Danny Jenkins
CEO & CO-FOUNDER, THREATLOCKER · **VERIFIED**

Jenkins co-founded ThreatLocker in Orlando in 2017 after building Dublin email-security vendor MXSweep, and fronts every raise and sponsorship. Path: Sami Jenkins, COO and Co-Founder; Shane Deegan, Chief Revenue Officer. No chief marketing officer is listed.

OPENING ANGLE

Lead with the greenfield estate.

“Danny, Cadillac is building its security stack from zero in Indiana and Silverstone, and there is no cybersecurity partner on the car. Your Series F just paid for Europe; an American team gives your 70,000 customers and MSPs the story. 25 minutes before Austin?”

SCORE COMPOSITION

TIMING 16 / 20 Round closed 29 Jul; Austin and Las Vegas inside the window.	CAPACITY 15 / 20 \$190M raise, ~\$500M total; valuation reported, not stated.	BRAND FIT 14 / 20 Channel-led B2B brand; already sponsors UCF Athletics.	URGENCY 12 / 20 UK and EMEA launch under way; no listing date.	OPS FIT 17 / 20 MODE A: C2 cybersecurity; Cadillac's lane is open.

RISKS & COUNTERS

VALUATION NOT STATED The \$1.6B pre-round figure is SecurityWeek's; ThreatLocker has not disclosed a Series F valuation and revenue is not public. **Counter:** Size the ask against the \$190M raise, not the valuation; ask for the number on the first call.

CROWDED CATEGORY, CHANNEL BRAND Five security vendors already hold F1 seats and ThreatLocker sells through MSPs, so a sixth logo can read as a follower. **Counter:** Sell the deployment story, a debut team secured from day one, not the logo.
