Bloom Energy

On-Site Energy Generation · SOFC Systems · San Jose, California · NYSE: BE (2026 revenue guidance \$3.4-3.8B)

Bloom Energy, the San Jose fuel-cell maker now powering AI data centres for Oracle, American Electric Power and Brookfield, signed a master agreement for up to 2.8 GW of its systems with Oracle on 13 April 2026 and posted a record first quarter, lifting 2026 revenue guidance to \$3.4-3.8B.

THE CASE

On 13 April Bloom and Oracle announced a master services agreement under which Oracle intends to procure up to 2.8 GW of Bloom fuel-cell systems, 1.2 GW contracted. Two weeks later Bloom reported first-quarter revenue of \$751.1M, up 130.4%, and raised 2026 guidance to \$3.4-3.8B; total backlog is about \$20B. American Electric Power exercised a \$2.65B option for 900 MW in January, and Brookfield committed \$5B in October 2025 to finance Bloom-powered AI data centres. A niche fuel-cell company has become the power supplier of the AI build-out, and its brand has not caught up.

The grid sells energy at scale, but every energy partner on it is a fuel or lubricant brand: Aramco at Aston Martin, Petronas at Mercedes, Shell at Ferrari, Eni at Alpine, Mobil 1 and Esso at Red Bull. No team carries an on-site power generation partner, even as factories add simulators, data halls and wind-tunnel hours that local grids were never sized for. Bloom's product is that: baseload power delivered in months, not years.

WHY NOW

Bloom's 2026 guidance of \$3.4-3.8B implies roughly 80% growth, raised on 28 April; the budget and the motive to be known beyond energy circles crest together. Austin (late October) and Las Vegas (November) are the US stages left in 2026, and teams close 2027 rosters in the fourth quarter.

BOTTOM LINE

Up to 2.8 GW with Oracle, a \$2.65B AEP order, \$5B from Brookfield and guidance of \$3.4-3.8B put Bloom at peak brand-building capacity with a brand few outside energy know. Williams is expanding Grove and carries no power partner; the lane, the workstream and two US races line up before 2027 rosters close.

CONTRACT WINCATEGORY WHITESPACELEADERSHIP TIEDISCOVERY: SCAN

WHY ATLASSIAN WILLIAMS RACING

Williams is rebuilding Grove: a phased modernisation adds larger factory, technology and testing facilities. The roster carries Atlassian as title partner, Gulf in fuel, Duracell in consumer batteries, Komatsu, VAST and Keeper, but no power-generation or energy-infrastructure partner, so Official Power Partner is a clean category. Dorilton's investment since 2020 and a data-led revival under James Vowles give a US industrial brand a team that will use the product as well as show it.

VALUE TO ATLASSIAN WILLIAMS RACING — MODE A (TECH IN THE CAR / CHAMPIONSHIP)

MODE A - operational. Grove's expansion adds simulator, data-hall and wind-tunnel load. Bloom Energy Servers generate power on site from natural gas, biogas or hydrogen without combustion; Oracle took its first system in 55 days, and that speed applies to a factory too. New buildings come online without waiting on a grid upgrade, with a lower-carbon footprint the team can report. In return: Official Power Partner status, rear-wing placement, Austin and Las Vegas hospitality for Bloom's customers.

DEAL ARCHITECTURE

Entry as Official Power Partner. **THREE YEARS**, 2027-2029, spanning the Grove build-out and the first Oracle gigawatts. Estimated \$3-5M a year, part-deliverable as installed Energy Server capacity at Grove. Scope: rear-wing or engine-cover placement, naming of the factory's power plant, US-race hospitality, content on powering the campus.

PRIMARY DECISION-MAKER

KR Sridhar
FOUNDER, CHAIRMAN & CEO, BLOOM ENERGY · **VERIFIED**

Sridhar founded Bloom in 2001; a first sports partnership is his call. Path: Natalie Sunderland, CMO, briefed to build an iconic brand; Aman Joshi, EVP and Chief Commercial Officer since January 2024; Simon Edwards, CFO since April 2026, previously CFO then CEO of McLaren partner Groq.

OPENING ANGLE

Lead with the Oracle gigawatts and the Grove build.

“KR, Oracle is putting up to 2.8 GW of your servers under its AI factories; Williams is rebuilding Grove and has no power partner. Your new CFO watched Groq take a McLaren seat. 25 minutes before Austin to see the numbers?”

SCORE COMPOSITION

TIMING 15 / 20 Oracle deal 13 Apr, guidance raised 28 Apr; Austin and Las Vegas in window.	CAPACITY 19 / 20 \$3.4-3.8B 2026 guidance; ~\$20B backlog; NYSE-listed.	BRAND FIT 14 / 20 Industrial B2B brand; CMO briefed to build an iconic brand.	URGENCY 13 / 20 AI power scramble is now; 2027 rosters close in Q4.	OPS FIT 14 / 20 MODE A: on-site power for the Grove expansion.
--	---	---	---	--

RISKS & COUNTERS

ENERGY-ADJACENT ROSTER Gulf (fuel) and Duracell (batteries) could read a power partner as a category intrusion. **Counter:** Define the category as stationary power generation; neither sells it.

THIN UK FOOTPRINT Bloom's growth is US data centres; a UK factory installation needs a gas or hydrogen supply at Grove. **Counter:** Lead with the US races and a Grove feasibility study; the installation follows the deal.
