

Databricks

Data & AI Platform · Lakehouse / Enterprise AI · San Francisco, California · Private (\$190B, Aug 2026)

Databricks closed \$5B at a \$190B valuation on 13 August, 42% above its \$134B Series L mark six months earlier, on a revenue run-rate past \$7B growing more than 80% a year. Enterprise data brands hold a seat at almost every Formula 1 team.

THE CASE

Databricks announced on 13 August that it had closed a \$5B strategic round at a \$190B valuation, led by Coatue, with Blackstone, MGX and T. Rowe Price accounts, and new money from Sixth Street Growth, Point72, Premji Invest and TPG. Its own release puts the revenue run-rate past \$7B at more than 80% growth. The mark is 42% above the \$134B Series L of six months earlier. Ali Ghodsi has said publicly that this is a poor year to list, so the money is the balance sheet, not a roadshow. Enterprise data brands already treat motorsport as a proven channel, and the Formula 1 grid is close to sold: Oracle at Oracle Red Bull Racing, SAP at Mercedes-AMG Petronas F1 Team, Splunk at McLaren F1 Team, IBM at Scuderia Ferrari, VAST at Atlassian Williams Racing, CoreWeave at Aston Martin Aramco F1 Team. On the Formula E grid, six of the ten entries carry no data, AI or software partner at all.

WHY NOW

The round closed on 13 August, and brand budgets are written in the quarter after one. Formula E teams close Season 13 rosters this autumn, and the GEN4 era opens at the Jeddah E-Prix in December - the largest technical reset the championship has had.

PROOF POINTS — EVERY FIGURE VERIFIED TO A PRIMARY SOURCE (SEE P.2)

\$5B

\$5B strategic round closed at a \$190B valuation, announced 13 August 2026 — 42% above the \$134B Series L mark.

\$7B

Revenue run-rate past \$7B growing more than 80% year on year, per the company's own announcement

42%

The mark is 42% above the \$134B Series L of six months earlier.

GRID FIT — CATEGORY-WHITESPACE CHECK ACROSS THE FE GRID (SPONSOR TABLE; 10 OF 35 PARTNER ROWS CATEGORISED)

Nissan Formula E Team	OPEN	no rival in this category lane
◆ RECOMMENDED		
Andretti Formula E	OPEN	no rival in this category lane
Citroën Racing	OPEN	no rival in this category lane
Cupra Kiro	OPEN	no rival in this category lane

BOTTOM LINE

A \$5B round closed at \$190B on 13 August, a revenue run-rate past \$7B growing more than 80% a year, and no listing to wait for. The Formula 1 data lane is bought at every team a brand this size would want, six of the ten Formula E entries carry no data partner, and the works team that holds a drivers' title has an open enterprise-software lane.

WHY NISSAN FORMULA E TEAM

Nissan's rows in the sponsor table are the parent, Alpine Tech on the powertrain and legacy entries still marked unverified - nothing in the technology category, and the team profile lists enterprise software as open. It is the works entry of the manufacturer now supplying the GEN4 powertrain to Andretti as well, so one platform reaches two garages. Rowland's Season 11 title is the shop window.

VALUE TO NISSAN FORMULA E TEAM — MODE A (TECH IN THE CAR / CHAMPIONSHIP)

MODE A - operational. Formula E is an energy-management contest: a fixed allocation, attack mode, regeneration and the slipstream, won by whoever models it best. A lakehouse unifying telemetry, energy, tyre and timing data, with models run between sessions, is that lever, and no testing cap limits the software. Nissan's GEN4 powertrain also runs at Andretti, so one platform serves two data sets.

DEAL ARCHITECTURE

Entry as Official Data and AI Partner. **THREE YEARS**, Seasons 13-15, covering the GEN4 cycle. Estimated \$3-6M a year, part-payable in platform credits. Scope: sidepod and halo placement, naming of the team's data environment, and a joint programme with Nissan's own data organisation.

PRIMARY DECISION-MAKER

Rick Schultz
CHIEF MARKETING OFFICER, DATABRICKS · **VERIFIED**

Schultz has run Databricks' marketing since March 2017, after leading marketing at Alteryx through its listing; brand and sponsorship sit with him. Path: Ali Ghodsi, co-founder and chief executive since 2016, and Ion Stoica, co-founder and executive chair.

OPENING ANGLE

Lead with the grid map.

“Rick, Oracle, SAP, Splunk, IBM and VAST have each bought a Formula 1 team. Six of the ten Formula E entries have no data partner at all, and Nissan holds a drivers' title. 25 minutes before the rosters close?”

SCORE COMPOSITION

TIMING 18 / 20 \$5B closed 13 Aug; Season 13 rosters close this autumn.	CAPACITY 19 / 20 \$190B valuation, run-rate past \$7B, growth above 80%.	BRAND FIT 15 / 20 Proven category in motorsport, but Formula E is the smaller stage.	URGENCY 13 / 20 No listing to time against; the GEN4 reset is the only clock.	OPS FIT 16 / 20 MODE A: energy modelling is the team's competitive lever.

RISKS & COUNTERS

FORMULA E IS THE SMALLER STAGE A company valued at \$190B can afford Formula 1, which delivers several times the audience. A Formula E recommendation will be challenged internally on reach alone. **Counter:** The Formula 1 data lane is bought at every team a brand this size would want. Formula E buys the category outright, with a workstream that is real rather than decorative.

AN ADJACENCY AT CHAMPIONSHIP LEVEL Google Cloud is Formula E's cloud and technology partner. Databricks runs on the hyperscalers rather than against them, but the championship may read the categories as neighbouring. **Counter:** Scope the designation as data and AI at team level and clear it before signature. McLaren carries Splunk and Google Cloud on the same car.
