

1KOMMA5°

Home Electrification / Virtual Power Plant · Hamburg, Germany · Private (~\$2.4B; ~EUR520M rev; debt-free; IPO-track)

1KOMMA5° - Europe's fastest-scaling home-electrification company (~\$2.4B, ~EUR520M revenue) with its Heartbeat AI virtual power plant - has never been in motorsport, and Formula E's EV-positive European audience is precisely its customer base.

THE CASE

1KOMMA5°, the German home-electrification leader, has scaled to ~EUR520M revenue (debt-free) at a ~\$2.4B valuation, bundling solar, storage, heat pumps and EV charging under its Heartbeat AI virtual power plant, and is on an IPO track (Nasdaq intended, timing pushed amid policy headwinds). Founded and led by Philipp Schroder (ex-Tesla Germany, ex-Sonnen), it has never entered motorsport. On-profile (electrification/energy), it offers two genuine angles for Formula E: a real-ish energy workstream (Heartbeat VPP + renewable power + EV charging to run and optimise the team's facilities and operations) and a rare audience match - FE's EV-positive, urban, European fans are exactly 1KOMMA5's customers. HONEST framing: capacity is mid-cap and the workstream is operational/brand rather than in-car, so this is a value-tier WARM. Decision-maker: CEO & co-founder Philipp Schroder.

WHY NOW

1KOMMA5° is in a fast organic-growth and pre-IPO brand-building phase, and Formula E reaches its target European EV-owner audience in the very cities it operates - so the audience ROI is direct. The honest 'why now' is positional (brand-build + audience), not a dated trigger; engage while crowding is low and the IPO narrative is being built.

BOTTOM LINE

Europe's fastest-scaling home-electrification company (~\$2.4B, ~EUR520M revenue, debt-free, IPO-track) - solar + storage + heat pumps + EV charging tied together by its Heartbeat AI virtual power plant. On-profile (electrification/energy) with a real-ish energy workstream and a rare audience match: FE's EV-positive European fans are 1KOMMA5's customers. CEO Philipp Schroder (ex-Tesla Germany, ex-Sonnen). HONEST: a value-tier WARM - capacity is mid-cap and the workstream is operational/brand, not in-car.

WHY MAHINDRA RACING

Mahindra Racing is a sustainability-and-EV-led FE team (backed by an EV-and-renewables conglomerate) with an open clean-energy/electrification lane, so a home-electrification + VPP partner is on-brand. The value centres on verified renewable energy/VPP for the team plus the European EV-owner audience, not car technology.

VALUE TO MAHINDRA RACING — MODE A (TECH IN THE CAR / CHAMPIONSHIP)

MODE A leaning B - concrete mechanics. (1) ENERGY / VPP: 1KOMMA5's Heartbeat VPP, solar+storage and EV charging can supply and optimise verified renewable power for the team's facilities and operations (and charge its road/ops fleet), with a hard-data sustainability story FE's net-zero agenda rewards - operationally real, if off-car. (2) AUDIENCE / B2C: this is the rare case where the team's fans ARE the sponsor's customers - FE's EV-positive European audience is 1KOMMA5's market - so activations (home-electrification fan offers, host-city campaigns) are a genuine acquisition channel, not decoration. (3) BRAND / TALENT: 'the team that races on electricity, powered by the company electrifying European homes' is an ownable co-marketing story, plus an energy/software talent halo. Mahindra gets verified renewable energy + a relevant consumer-brand partner; 1KOMMA5 gets an on-message stage in front of its customers.

DEAL ARCHITECTURE

Value-tier Official Clean-Energy / Electrification Partner on Mahindra Racing, minimum three years, ~\$2-4M/yr, centred on a Heartbeat VPP + renewable-power workstream for the team plus a European EV-owner fan-acquisition and content programme.

PRIMARY DECISION-MAKER

Philipp Schroder
CO-FOUNDER & CEO, 1KOMMA5° - VERIFIED (EX-TESLA GERMANY, EX-SONNEN)

Co-founder and CEO with deep EV/energy pedigree (ran Tesla Germany, led Sonnen) - the owner of brand/partnership decisions at this founder-led company and the entry point. Decision path: Schroder (brand/strategy) with the marketing/brand leadership as activation counterpart; confirm the brand lead before outreach.

OPENING ANGLE

"Philipp - Formula E's fans are your customers: EV-positive, urban, European. As you build toward an IPO, powering a Mahindra with Heartbeat-optimised renewable energy and turning FE fans into 1KOMMA5 customers is an acquisition channel, not a logo. 25 minutes?"

SCORE COMPOSITION

TIMING 15 / 20 Scaling fast and organically (~EUR520M revenue, debt-free) after a EUR150M pre-IPO round, with a Nasdaq listing intended - a brand-build window, though the IPO has been delayed amid policy headwinds.	CAPACITY 15 / 20 ~\$2.4B valuation, ~EUR400M raised, debt-free - funds a value-to-mid tier comfortably (not a marquee spend).	BRAND FIT 16 / 20 Clean energy / electrification / VPP on the electric racing series is on-message, and there's a rare audience match - FE's EV-positive European fans are exactly 1KOMMA5's customers.	URGENCY 12 / 20 An IPO/brand window and the European electrification push, but no dated FE trigger.	OPS FIT 14 / 20 MODE A leaning B: its Heartbeat VPP, solar/storage and EV charging can power and optimise the team's facilities/operations with verified renewable energy - operationally real, though not in-car.

RISKS & COUNTERS

MID-CAP, VALUE-TIER CAPACITY At ~\$2.4B it funds a value tier, not a marquee deal. **Counter:** Right-size to a value tier tied to a real energy workstream and a measurable fan-acquisition channel - marketing with a return.

WORKSTREAM IS OPERATIONAL/BRAND, NOT IN-CAR 1KOMMA5 doesn't make race-car tech. **Counter:** Scored MODE-A-leaning-B; name the concrete energy/VPP + fan-acquisition mechanics, not a logo.

IPO/POLICY UNCERTAINTY The IPO has slipped amid renewable-policy headwinds. **Counter:** Frame as a brand-build relationship through the IPO window, low-commitment and audience-led.
