

TensorWave

AI Infrastructure · GPU Cloud (all-AMD) · Las Vegas, Nevada (founded 2023) · Private (\$1.55B; \$350M Series B, Jun 2026)

TensorWave, the Las Vegas-based all-AMD GPU cloud, announced on 10 June 2026 a \$350M Series B at a \$1.55B valuation co-led by Magnetar and AMD Ventures, almost four times the price of its \$100M Series A thirteen months earlier, with an 8,192-GPU cluster live and 2 GW of capacity secured.

THE CASE

On 10 June TensorWave announced a \$350M Series B at a \$1.55B valuation, co-led by Magnetar and AMD Ventures with Maverick Silicon, Nexus Venture Partners and Western Frontier; the same leads backed the \$100M Series A of May 2025 at a reported \$400M. The capital funds AMD Instinct MI355X clusters on top of an 8,192-GPU MI325X training cluster already live and more than 2 GW of data-centre capacity secured. Revenue is reported only: the 2025 release projected a run rate above \$100M by year-end. Founded in Las Vegas in 2023, it is AMD's flagship challenger in the cloud.

The grid has priced this archetype: CoreWeave became Aston Martin Aramco's Official AI Cloud Computing Partner in May 2025 and Core Scientific sits with Cadillac. Both run Nvidia silicon; TensorWave is the AMD alternative, and AMD, its co-lead investor, is already a partner of Mercedes. A neocloud that has just quadrupled its price needs enterprise buyers, not only AI labs, and a home race in Las Vegas in November.

WHY NOW

The round closed on 10 June; brand budgets reset in the quarter after a raise. The United States GP in Austin (October) and the Las Vegas GP (November), TensorWave's home city, are the US rounds left in 2026, and teams close 2027 partner rosters in the fourth quarter.

McLaren F1 Team	TAKEN	Dell Technologies, Google Cloud
Aston Martin Aramco F1 Team	TAKEN	CoreWeave, NetApp

BOTTOM LINE

A \$350M round at \$1.55B on 10 June, a live 8,192-GPU cluster and 2 GW of secured capacity put TensorWave at peak brand-investment authority; the compute lane at the American team is open and its home race in Las Vegas sits inside the window.

WHY TGR HAAS F1 TEAM

Haas is the grid's American privateer, headquartered in Kannapolis, North Carolina; Toyota Gazoo Racing is title partner from 2026, with Mphasis, Ruckus and CommScope on the technology side. No cloud, GPU or AI-compute partner sits on the car, so Official AI Compute Partner is a clean category at a price a first-time sponsor can defend. Three US races give a Las Vegas company a home round, and the leanest team gains most from compute delivered in kind. Every other large team carries an incumbent.

VALUE TO TGR HAAS F1 TEAM — MODE A (TECH IN THE CAR / CHAMPIONSHIP)

MODE A - operational. The work outside the FIA aero-testing limits is compute-hungry: machine-learning surrogates, driver-in-the-loop and strategy simulation, telemetry and video analytics between sessions. TensorWave supplies elastic AMD Instinct GPU capacity on demand, part of it in kind, so the leanest team on the cost cap buys capability without capital. In return: Official AI Compute Partner status, livery presence, Austin and Las Vegas hospitality.

DEAL ARCHITECTURE

Entry as Official AI Compute Partner. **THREE YEARS**, 2027-2029, spanning the MI355X build-out. Estimated \$2-4M a year, part-payable in compute credits. Scope: sidepod placement, naming of the team's compute environment, Austin and Las Vegas hospitality, engineering content.

PRIMARY DECISION-MAKER

Darrick Horton

CO-FOUNDER & CEO, TENSORWAVE · **VERIFIED**

Horton co-founded TensorWave in Las Vegas in 2023 and fronts every raise; a first sports partnership is his call. Path: Piotr Tomasik, Co-Founder, President and COO, and Jeff Tatarchuk, Co-Founder and Chief Growth Officer. No CMO or CFO is listed.

OPENING ANGLE

Lead with the Las Vegas home race.

“Darrick, CoreWeave took its seat at Aston Martin the year it listed; the AMD story has no seat, and the American team's compute lane is open. Las Vegas is your home race. 25 minutes before Austin to see the numbers in kind?”

SCORE COMPOSITION

TIMING 17 / 20 Round closed 10 Jun; Austin and Las Vegas inside the window.	CAPACITY 14 / 20 \$450M raised in total at \$1.55B; revenue reported as a projection only.	BRAND FIT 13 / 20 B2B infrastructure; Las Vegas home story; challenger narrative.	URGENCY 12 / 20 No hard deadline beyond Q4 rosters and the Las Vegas GP.	OPS FIT 16 / 20 MODE A: elastic GPU capacity outside the aero cap, part in kind.
--	---	--	---	---

RISKS & COUNTERS

SUB-SCALE FOR THE ARCHETYPE At \$1.55B TensorWave is a fraction of CoreWeave's size and its revenue is a reported 2025 projection; a cash fee competes with GPU purchases. **Counter:** Structure most of the value in compute credits; keep the cash component inside a first-timer's budget.

AMD SITS WITH MERCEDES AMD, the co-lead investor, is a Mercedes partner; a rival team may read a TensorWave deal as AMD-adjacent. **Counter:** Position it as the neocloud lane, not the silicon lane; keep AMD branding out of the Haas activation.
