

# Cyera

AI Data Security (DSPM / trust layer for AI) · New York, NY · Private (\$12B; Series G Jun 2026; AI data security)

Cyera - the \$12B AI-data-security leader and 'trust layer for enterprise AI' - is already in 1440's outreach pipeline; this brief arms that conversation with a verified case and a real data-protection workstream for a data-driven F1 team.

THE CASE

Cyera, the AI-data-security leader, raised a \$600M Series G at a \$12B valuation (Jun 2026) - tripling in ~18 months - and positions itself as the 'trust layer for enterprise AI', unifying DSPM, DLP, identity and behavioural security. The fit is real: a modern F1 team guards enormous high-value design IP and sponsor/finance data, exactly what Cyera's platform secures. Cadillac - the greenfield 2026 team - lists cybersecurity as an explicitly open category, and Cyera's DSPM/data-posture lane is distinct from the endpoint/identity/network security already elsewhere on the grid. Verified decision path: CMO Naveen Palavalli (the sponsorship owner), CEO & co-founder Yotam Segev (ex-Unit 8200) as sponsor, and co-founder/CTO Tamar Bar-Ilan as the technical counterpart.

WHY NOW

The Series G just closed, so capital and brand appetite peak now, and the enterprise-AI data-security category is in a land-grab - exactly when a category leader invests in enterprise brand. The cybersecurity lane is open on the greenfield American team, so an early, substance-led approach can claim a data-protection workstream plus a brand stage before a rival does.

| Cadillac | PRIME LANE | greenfield entry — partner roster being built from zero |
| Williams | TAKEN      | data platform / storage, identity & access security     |
| McLaren  | TAKEN      | observability / APM, networking & security              |
| Haas     | CROWDED    | Mphasis, RUCKUS Networks, MoneyGram                     |

BOTTOM LINE

The AI-data-security leader - \$12B after a \$600M Series G (Jun 2026), the 'trust layer for enterprise AI' (DSPM/DLP/identity/behavioural). Real workstream: an F1 team guards high-value design IP and sponsor/finance data that Cyera's platform protects. Greenfield Cadillac lists cybersecurity as an explicitly open category. Decision-maker: CMO Naveen Palavalli.

- DISCOVERY: SELF

WHY CADILLAC F1 TEAM

Cadillac is the only greenfield 2026 team, building its security posture from zero and listing cybersecurity as an explicitly open category - so Cyera can stand up data-security from day one, distinct from the endpoint/identity/network security on other teams. A real workstream protecting the new team's IP and data. (Per signals-not-placements, other 1440 signals aimed at Cadillac in different categories do not occupy the data-security lane.)

VALUE TO CADILLAC F1 TEAM — MODE A (TECH IN THE CAR / CHAMPIONSHIP)

MODE A, real mechanics. (1) TECHNICAL: an F1 team's crown jewels are its design IP and its sponsor/finance data; Cyera's DSPM/data-security platform discovers, classifies and protects that sensitive data across the team's cloud and AI tools - a genuine, deployable protection workstream and a flagship 'securing the data that wins' reference, and for greenfield Cadillac it can be stood up from day one. (2) COMMERCIAL / B2B: Cyera sells to CISOs and CDOs, and the F1 paddock is dense with those enterprise buyers - hospitality becomes a pipeline, while Cadillac gains a \$12B blue-chip security anchor. (3) BRAND / TALENT: 'the trust layer for the AI era' is an ownable co-marketing story, with a security-engineering talent halo. Cadillac gets real data protection; Cyera gets a live reference and a premium B2B stage.

DEAL ARCHITECTURE

Official Data-Security Partner on the Cadillac F1 Team, minimum three years, ~\$3-5M/yr, with a working DSPM deployment protecting the team's IP and data (data-security posture lane, distinct from endpoint/identity).

PRIMARY DECISION-MAKER

**Naveen Palavalli**  
CHIEF MARKETING OFFICER, CYERA - VERIFIED

CMO and owner of brand/sponsorship - the entry point. Decision path: Palavalli (brand/sponsorship) -> CEO & co-founder Yotam Segev (ex-Unit 8200; C-level sponsor) -> co-founder/CTO Tamar Bar-Ilan (technical counterpart).

OPENING ANGLE

"Naveen - Cadillac is building an F1 team from zero and you're the trust layer for the AI era. Securing the design IP and data that wins races is a real deployment, not a logo. 25 minutes to shape it?"

RISKS & COUNTERS

**SECURITY PARTLY PRESENT ON THE GRID** Several teams already have security partners. **Counter:** Cyera's DSPM/data-security is a distinct lane (vs endpoint/identity/network) and open on greenfield Cadillac; position precisely on data, not generic 'cyber'.

**DISTINCT FROM DATA-RESILIENCE** Cadillac is also a target for backup/recovery players (a different category). **Counter:** Cyera secures and governs sensitive data in place (DSPM) - complementary to backup/resilience, not a substitute; frame the lanes as distinct.

**PRE-IPO SPEND DISCIPLINE** A fast-scaling private company watches discretionary spend. **Counter:** Lead with a value-to-mid tier tied to a real deployment and measurable CISO-pipeline outcomes.
