

Crusoe

AI Infrastructure · GPU Cloud / Datacentre Builder · Denver, Colorado · Private (~\$30B reported; \$3B+ Series F, Sep 2026)

Crusoe, the energy-first AI-infrastructure builder behind OpenAI's 1.2 GW Abilene campus, has reportedly closed a \$3B+ Series F at a ~\$30B valuation (Bloomberg, 3 Sep 2026), nearly tripling its October 2025 mark, days after a reported ~\$13B five-year Jane Street cloud contract.

THE CASE

Crusoe's reported \$3B+ Series F at roughly \$30B post-money, co-led by Atreides Management and Valor Equity Partners with Mubadala Capital participating, nearly triples the \$10B+ valuation set by its \$1.375B Series E in October 2025. The company builds and powers gigawatt-scale AI data centres - the first phase of the 1.2 GW Stargate campus in Abilene, Texas is live for Oracle and OpenAI - and sells GPU cloud to OpenAI, Microsoft and Meta. Bloomberg also reports a ~\$13B, five-year AI-cloud contract with Jane Street, its highest-profile cloud customer yet.

The grid has already proved this archetype buys F1: CoreWeave signed with Aston Martin Aramco in May 2025 as Official AI Cloud Computing Partner, and Core Scientific joined Cadillac for 2026. Crusoe's closest rival is on the grid and Crusoe is not, and no team carries a brand that owns both halves of the AI build-out, the power and the compute.

WHY NOW

The Series F was reported on 3 September and brand-investment authority peaks in the quarter after a round. The US GP in Austin (late October) and the Las Vegas GP (November) are the two home-market stages before 2027 partner rosters lock.

BOTTOM LINE

A reported \$3B+ Series F at ~\$30B, a reported ~\$13B Jane Street contract and a live 1.2 GW Stargate campus put Crusoe at peak brand-investment authority while its direct rival CoreWeave already sits on Aston Martin. Haas offers the open cloud-compute lane and two US home races inside the window.

WHY TGR HAAS F1 TEAM

Haas is the lean American privateer with the most open technology roster: Toyota Gazoo Racing as title partner, Mphasis for digital services and RUCKUS for networking, but no cloud or GPU-compute partner. Crusoe brings American-built, energy-first compute a cost-capped team can actually consume, plus a US home-market story for Austin and Las Vegas. Audi and Racing Bulls are also open; Cadillac (Core Scientific, TWG AI), Red Bull (Oracle), Mercedes (AWS), McLaren (Google Cloud, Dell) and Aston Martin (CoreWeave) are not.

VALUE TO TGR HAAS F1 TEAM — MODE A (TECH IN THE CAR / CHAMPIONSHIP)

MODE A - operational. A cost-capped team's fastest lever is elastic GPU capacity for the workloads outside the FIA aero-testing limits: machine-learning surrogates, driver-in-loop and race-strategy simulation, telemetry and video analytics between sessions. Crusoe supplies that capacity on demand with an energy story the team can tell on camera; Haas supplies a named compute partnership, livery presence and US-race hospitality for Crusoe's enterprise and capital-markets audiences.

DEAL ARCHITECTURE

Entry as Official AI Cloud Compute Partner. **THREE YEARS**, 2027-2029, spanning a probable listing window and three US-race cycles. Estimated \$5-8M/yr, part-payable in compute credits. Scope: sidepod placement, naming of the team's compute environment, Austin and Las Vegas hospitality, co-produced engineering content.

PRIMARY DECISION-MAKER

Chase Lochmiller

CEO & CO-FOUNDER, CRUSOE · **VERIFIED**

Lochmiller co-founded Crusoe in 2018 and fronts every raise and mega-contract; a deal of this scale is his call. Path: Sharieff Mansour, VP Marketing (sponsorship owner; reported), Cully Cavness, President and Chief Strategy Officer, and CTO Nitin Perumbeti on compute scope.

OPENING ANGLE

Lead with the Aston Martin precedent.

“Chase, CoreWeave bought its F1 seat at Aston Martin in the year of its IPO; your Series F and the Austin race land in the same quarter, and the cloud-compute lane at Haas is open. 25 minutes before Las Vegas to see the numbers?”

SCORE COMPOSITION

TIMING 17 / 20 Round reported 3 Sep; Austin and Las Vegas inside the window.	CAPACITY 20 / 20 ~\$30B valuation, \$3B+ raise, ~\$13B contract (reported).	BRAND FIT 15 / 20 Energy-plus-compute story; B2B brand, no consumer face.	URGENCY 13 / 20 IPO-track narrative; no hard deadline.	OPS FIT 15 / 20 MODE A: elastic GPU capacity outside the aero cap.
---	--	--	---	---

RISKS & COUNTERS

REPORTED, NOT CONFIRMED The Series F and the Jane Street contract are Bloomberg-reported; no Crusoe release yet. **Counter:** Anchor on the confirmed Series E and Abilene facts; ask Crusoe to confirm the round on the first call.

B2B BRAND, NO CMO Marketing sits at VP level; the audience is enterprise and capital markets, not fans. **Counter:** Frame it as IPO-window brand building on the CoreWeave precedent, with measurable enterprise activations.
