

Form Energy

Energy Storage · Iron-Air 100-Hour Batteries · Somerville, Massachusetts (factory in Weirton, West Virginia) · Private (\$750M Series G, Aug 2026; \$1.75B pre-money reported)

Form Energy, the Somerville iron-air battery maker building Google's 30 GWh, 100-hour system in Minnesota, closed a \$750M Series G led by T. Rowe Price on 12 August 2026, taking total equity past \$2B as its announced backlog jumped from roughly 20 GWh to 80 GWh.

THE CASE

Form announced the \$750M Series G on 12 August, led by T. Rowe Price, with Sequoia Capital, Janus Henderson, Franklin Templeton and PEAK6 new to the register. Total equity passes \$2B; proceeds scale Form Factory 1 in Weirton, West Virginia. Axios reports the round priced at \$1.75B pre-money, down from about \$3B in October 2024. The order book explains the investors' patience: an announced backlog of 80 GWh, led by the 300 MW / 30 GWh Google and Xcel Energy system in Minnesota, and 12 GWh for Crusoe's AI data centres.

Weirton is the story a sponsor buys: a 550,000-square-foot battery plant on a former steel-mill site, around 400 people and a planned 500 MW a year by 2028, shipping 100-hour batteries to utilities and hyperscalers. Axios and TechCrunch report a listing being prepared for 2027. A down round is a reason to build the brand, not to hide: the next four quarters decide whether Form is priced as a manufacturer or a technology bet.

WHY NOW

The Series G closed on 12 August, and a reported 2027 listing puts brand-building inside the next four quarters. Formula E's GEN4 era opens in Jeddah on 18 December; the new Austin E-Prix on 6 February 2027 and Miami on 20 February give an American storage brand two home rounds before any roadshow.

Citroën Racing	OPEN	no rival in this category lane
Cupra Kiro	OPEN	no rival in this category lane

BOTTOM LINE

\$750M closed on 12 August, an 80 GWh order book led by Google and Crusoe, a West Virginia factory and a reported 2027 listing: Form Energy needs a national brand within the year and has the story to carry one. Andretti's energy lane is open and two US E-Prix fall in February.

WHY ANDRETTI FORMULA E

Andretti is the American team on the grid, run from Indianapolis; parent TWG Motorsports also operates the Cadillac F1 team. The roster is TWG AI, Quest Global, Crowe UK and Reflo; the sponsor table shows no energy or storage brand, so the lane is open. Google Cloud is the championship's technology partner and Google is Form's anchor customer: the ecosystem already overlaps. For a utility-and-hyperscaler brand, an American car at Austin and Miami is the right stage.

VALUE TO ANDRETTI FORMULA E — MODE B (TECH SERVES THE TEAM OPERATION)

MODE B - halo, said plainly: a 100-hour iron-air battery has no race-day role. The mechanics are commercial. Official Energy Storage Partner status and sidepod placement on the American car; Austin and Miami hospitality for utility executives, regulators and hyperscaler energy buyers; Weirton factory content pairing a steel-town rebuild with the team's GEN4 debut; and pre-listing visibility to the capital-markets audience already in the Formula E paddock.

DEAL ARCHITECTURE

Entry as Official Energy Storage Partner. **THREE YEARS**, Seasons 13-15 (2026/27 to 2028/29), bridging the reported 2027 listing and the first Google and Crusoe deliveries. Estimated \$1.5-2.5M a year. Scope: sidepod branding, Austin and Miami hospitality, factory and grid content, driver visits to Weirton, and a utility-customer programme through TWG Motorsports.

PRIMARY DECISION-MAKER

Mateo Jaramillo

CO-FOUNDER & CEO, FORM ENERGY · **VERIFIED**

Jaramillo co-founded Form in 2017 after helping launch Tesla's Powerwall and fronts every raise. Path: Ted Wiley, Co-Founder, President and COO; Navneet Govil, CFO, formerly of SoftBank Investment Advisers; Wes Sloan, incoming COO from Panasonic Energy. No chief marketing officer is listed.

OPENING ANGLE

Lead with Weirton and the listing.

“Mateo, you have 80 GWh of backlog, a steel-town factory and a listing to price. The American Formula E team races in Austin and Miami in February with an open energy lane. 25 minutes to see what a three-season seat costs?”

SCORE COMPOSITION

TIMING 15 / 20 Round closed 12 Aug; GEN4 opener in December, Austin and Miami in February.	CAPACITY 14 / 20 \$750M raised, over \$2B in total; down round, proceeds go to Weirton.	BRAND FIT 15 / 20 American reindustrialisation, Google and AI power; strong adjacency.	URGENCY 14 / 20 Reported 2027 listing is the trigger; not company-confirmed.	OPS FIT 12 / 20 MODE B: no race-day use; open lane, US rounds, ecosystem overlap.

RISKS & COUNTERS

DOWN ROUND, FACTORY MONEY Series G priced at \$1.75B pre-money against about \$3B in 2024; proceeds are earmarked for Weirton and deployments. **Counter:** Price the entry under \$3M a year and tie it to the listing narrative the board is already funding.

HALO, NOT WORKSTREAM Iron-air batteries have no role in the garage; value rests on audience, content and timing. **Counter:** Measure renewal on utility and hyperscaler meetings at Austin and Miami, not on lap time.
