# Supabase

Developer Platform · Open-Source Postgres Backend · San Francisco (remote-first; founded 2020) · Private (\$10.5B post-money; \$500M Series F, Jun 2026)

Supabase, the open-source Postgres backend that more than 9 million developers build on, closed a \$500M Series F led by GIC at a \$10.5B post-money valuation on 4 June 2026, doubling the \$5B it set eight months earlier and taking total funding past \$1B.

THE CASE

Supabase announced on 4 June a \$500M Series F led by GIC, with Accel, Y Combinator, Craft, Felicis, Peak XV and Coatue returning, a second investment from Stripe and a first from Salesforce Ventures. The post-money valuation is \$10.5B, up from \$5B at the October 2025 Series E and \$2B at the April 2025 Series D; total capital raised now exceeds \$1B. The company reports more than 250,000 customers and over 9 million developers, and says database launches grew 600% in the past year, with over 60% created by AI coding tools.

The grid has already priced developer infrastructure: Atlassian holds the Williams title, Oracle sits on the Red Bull, Google Cloud and Dell on the McLaren. What none of them owns is the open-source Postgres layer beneath the AI-coding boom. Supabase says Claude Code has been the largest single creator of new databases on its platform this year, and Claude already races on the Williams. That is a warm path, not a cold call.

WHY NOW

The round closed on 4 June; brand budgets reset in the quarter after a raise, and this is the largest in the company's history. The British GP on 5 July is Williams' home race and falls inside the window; teams settle their 2027 rosters in the fourth quarter.

BOTTOM LINE

A \$500M raise at \$10.5B, more than 9 million developers, and Claude Code as the top creator of Supabase databases put Supabase at peak brand-investment capacity with a warm route onto the one car Claude already races on. The developer-platform lane at Williams is open and the British GP sits inside the window.

WHY ATLASSIAN WILLIAMS RACING

Williams carries the most developer-native roster in Formula 1: Atlassian as title partner, VAST for data infrastructure, Keeper for identity security and, since February, Claude as Official Thinking Partner. There is no database or backend-platform partner on the car. Supabase's own release credits Claude Code as the top creator of new databases this year, so the introduction runs through a relationship Williams already has.

VALUE TO ATLASSIAN WILLIAMS RACING — MODE A (TECH IN THE CAR / CHAMPIONSHIP)

MODE A - operational. Supabase is the Postgres, authentication and realtime backend for the software Williams ships around the car: fan and ticketing apps, partner portals, and the internal tools engineers build with Claude. Multigres, previewed with the round, gives those systems scale on race weekends. In return: Official Developer Platform designation, sidepod placement, British GP hospitality and a co-produced engineering series with the Claude programme.

DEAL ARCHITECTURE

Entry as Official Developer Platform Partner. **THREE YEARS**, 2027-2029, covering the next raise or a listing window. Estimated \$3-5M a year, part-payable in platform credits. Scope: livery placement, developer activations at the British GP and the US rounds, content with the Claude programme, first refusal on a database category in 2030.

PRIMARY DECISION-MAKER

**Paul Copplestone**  
CO-FOUNDER & CEO, SUPABASE · **VERIFIED**

Copplestone co-founded Supabase in 2020 with CTO Ant Wilson and fronts every raise; a first sports partnership is his call. Path: Rory Wilding, COO and Chief Commercial Officer, and Scott Buxton, CFO. No chief marketing officer is listed; marketing is developer-led.

OPENING ANGLE

Lead with the Claude Code number.

*“Paul, Claude Code is the biggest creator of Supabase databases this year, and Claude already races on the Williams. The developer-platform lane there is open and the British GP is five weeks out. 25 minutes to see the numbers?”*

RISKS & COUNTERS

**DEVELOPER-LED BRAND** Supabase grew on open source and community with no chief marketing officer; a Formula 1 spend is off-pattern. **Counter:** Frame it as developer reach, not a billboard: Claude, Atlassian and the paddock as a developer stage, paid partly in credits.

**VALUATION PACE** A valuation doubled in eight months invites scrutiny; a visible sponsorship can read as excess to investors. **Counter:** Size the entry modestly, tie it to measurable developer sign-ups, and announce it alongside product news such as Multigres.
