

Celonis

Enterprise Process Intelligence / Process Mining · Munich, Germany / New York, NY · Private (~\$13B; ~\$1.77B raised; IPO-ready)

Celonis - the ~\$13B German process-intelligence leader, IPO-ready and fresh off its May 2026 Ikigai Labs acquisition - is a European enterprise champion with an efficiency-and-sustainability story built for Formula E, and no motorsport footprint.

THE CASE

Celonis pioneered process mining - using a company's own event-log data to expose and fix operational inefficiency - and has grown into a ~\$13B European enterprise leader on roughly \$1.77B raised, repeatedly described as IPO-ready. On 12 May 2026 it launched its Context Model and agreed to acquire AI decision-intelligence firm Ikigai Labs - a clear scale-up-and-reposition moment that brings fresh brand attention. Its core promise - doing more with less, cutting waste through efficiency - maps unusually well onto Formula E's enterprise-and-sustainability audience, and as a German champion it pairs naturally with a German works team. No process-intelligence or operations brand holds a Formula E partnership, so the lane is open.

WHY NOW

Celonis is in an active reposition-and-scale moment - the Context Model launch and Ikigai acquisition (May 2026) plus persistent IPO readiness mean brand attention and budget authority are elevated now. The enterprise/operations lane on the FE grid is uncontested, so moving before a peer notices it secures category ownership cheaply while the efficiency-and-sustainability narrative is freshest.

BOTTOM LINE

A ~\$13B German process-intelligence champion, IPO-ready and fresh off acquiring Ikigai Labs (May 2026), with an efficiency-and-sustainability story tailor-made for Formula E - and no process/operations brand on the grid. Porsche, the German works team, is the natural home.

DISCOVERY: SELF

WHY PORSCHE

Porsche, the German works team, is the natural cultural fit for a German enterprise champion, with a premium, industrial-tech-literate partner audience (AVEVA, TDK, NetApp) that mirrors Celonis's enterprise buyer. Celonis's process-intelligence lane is distinct from Porsche's AVEVA industrial digital-twin partnership, so it adds rather than conflicts - though the team is enterprise-software-adjacent, so Nissan (open 'enterprise software') is the documented cleaner-whitespace alternative.

VALUE TO PORSCHE — MODE B (TECH SERVES THE TEAM OPERATION)

MODE B. Celonis's platform maps a team-and-manufacturer's real operational processes - procurement, supply chain, logistics, manufacturing flow - from event-log data and surfaces where to cut cost, delay and waste. For a works operation like Porsche that is a genuine efficiency tool, not signage: the team gains operational insight and a credible 'engineered efficiency' co-marketing story, while Celonis gains a flagship European deployment and a sustainability-aligned brand stage.

DEAL ARCHITECTURE

Official Process Intelligence Partner tier on Porsche Formula E (Nissan as alternative), minimum three years, ~\$3-5M/yr, with category exclusivity for process mining/operations intelligence, a working deployment on a defined operational workstream, and B2B hospitality aimed at Celonis's enterprise buyers.

PRIMARY DECISION-MAKER

Carsten Thoma
PRESIDENT, CELONIS - VERIFIED (NAMED IN THE MAY 2026 IKIGAI/CONTEXT MODEL ANNOUNCEMENT)

Carsten Thoma is President of Celonis and a senior commercial leader (ex-SAP/hybris co-founder), the natural owner of a strategic brand-partnership decision. Co-decision-makers: co-founders Alexander Rinke and Bastian Nominacher, who lead the company and own marquee strategic spend. Note: no standalone CMO is publicly confirmed, so brand decisions sit with the President and founders.

OPENING ANGLE

"Carsten, Formula E is the enterprise-and-sustainability grid, and 'engineered efficiency' is Celonis's whole story - yet no process-intelligence brand is on it. Porsche, the German works team, is the natural home, and there's a real operational workstream behind it. 25 minutes?"

SCORE COMPOSITION

TIMING 16 / 20 A reposition-and-scale moment: the Context Model launch and Ikigai Labs acquisition (12 May 2026) plus persistent IPO-readiness mean brand attention and budget authority are elevated now.	CAPACITY 17 / 20 ~\$13B valuation on ~\$1.77B raised; comfortably funds an FE entry tier.	BRAND FIT 15 / 20 Process intelligence is an efficiency-and-sustainability story (do more with less, cut waste) that fits FE's enterprise audience, and a German champion pairs naturally with a German works team.	URGENCY 12 / 20 IPO-readiness and a fresh acquisition create a brand window, but there is no single dated external trigger.	OPS FIT 13 / 20 MODE B: process mining on a manufacturer/team's supply-chain, procurement and logistics processes is a genuine operational use, not just signage.
--	---	---	---	---

RISKS & COUNTERS

NO DATED TRIGGER IPO-readiness without a fixed listing date means urgency can drift. **Counter:** Use category exclusivity as the clock - the open operations lane disappears the moment a peer signs - and anchor to the post-Ikigai brand momentum.

ENTERPRISE-SOFTWARE ADJACENCY AT PORSCHE Porsche already carries AVEVA (industrial software); a second enterprise-software-adjacent brand could feel crowded. **Counter:** Frame Celonis's process-intelligence lane as distinct from AVEVA's industrial digital twin; if the team prefers clean whitespace, re-point to Nissan ('enterprise software' open).
