THE CASE

DeepL is Europe's enterprise language-AI champion: a Cologne-based, Polish-rooted company (founded 2017) that raised \$300M at a \$2B valuation and is now exploring a US IPO that could value it at up to \$5B, possibly in 2026. Its enterprise Language AI platform - translation and localization built with enterprise security - serves more than 200,000 businesses, governments and organizations across 228 markets. For an international championship like Formula E, a global-communication brand is an unusually clean narrative fit: European-rooted, enterprise-credible, sustainability-neutral, and used by exactly the multinational enterprises FE's audience comprises. No language or communication brand holds an FE partnership, so the lane is open, and DeepL's pre-IPO brand-building phase is the moment to plant it.

WHY NOW

DeepL is in a pre-IPO brand-building phase - exploring a ~\$5B US listing possibly in 2026 - when enterprise credibility compounds most, and founder-CEO Jarek Kutylowski is steering a deliberate B2B scale-up. The FE enterprise/communication lane is uncontested, so moving now secures category ownership cheaply before a peer notices the open international-brand stage.

BOTTOM LINE

Europe's enterprise language-AI champion (\$2B, exploring a ~\$5B US IPO), serving 200,000+ enterprises and governments across 228 markets - a clean, international, sustainability-neutral brand built for Formula E's global enterprise audience, with no language brand on the grid.

WHY JAGUAR TCS RACING

Jaguar TCS Racing is the fit: a British, premium, enterprise-and-sustainability-led team whose global, blue-chip audience matches DeepL's multinational enterprise and government buyers, and whose IT-services title partner (TCS) signals a roster comfortable with enterprise-software brands. DeepL's language-AI lane is distinct from Jaguar's existing partners (TCS, Chase), so it adds cleanly without a category clash; Nissan ('enterprise software' open) is the documented alternative.

VALUE TO JAGUAR TCS RACING — MODE B (TECH SERVES THE TEAM OPERATION)

MODE B. DeepL's platform localizes content and communications across 228 markets - directly useful to a globally-broadcast team managing fan, sponsor and partner communications across languages, plus internal multinational operations. Jaguar gains a real localization capability and a clean enterprise co-marketing partner; DeepL gains a premium, international brand stage in front of the multinational enterprises it sells to.

DEAL ARCHITECTURE

Official Language AI Partner tier on Jaguar TCS Racing, minimum three years, ~\$3-4M/yr, with category exclusivity for translation/language AI and a working localization deployment for the team's global content and communications.

PRIMARY DECISION-MAKER

Jaroslav Kutylowski

FOUNDER & CEO, DEEPL - VERIFIED

Jaroslav (Jarek) Kutylowski founded DeepL in 2017 and serves as CEO; he owns strategy, brand and the IPO-readiness agenda a Formula E partnership would anchor, so the founder-CEO is the correct and direct entry point for a marquee decision.

OPENING ANGLE

"Jarek, Formula E races across DeepL's exact footprint - a truly international, multi-market audience - and no language brand is on the grid. A pre-IPO European enterprise champion owning that lane on a British team fits cleanly. 25 minutes?"

SCORE COMPOSITION

TIMING

15 / 20

Pre-IPO brand-building phase - exploring a ~\$5B US listing possibly in 2026 - when enterprise credibility compounds most; founder-CEO is driving a deliberate B2B scale-up.

CAPACITY

15 / 20

\$2B valuation on \$415M raised (~\$185M ARR); an FE entry tier (~\$3-4M/yr) is comfortably affordable, though a top-tier deal would stretch.

BRAND FIT

16 / 20

A global-communication brand is an unusually clean fit for an international, enterprise-and-sustainability championship; European-rooted, no controversy.

URGENCY

12 / 20

IPO-readiness creates a brand window, but the listing is exploratory rather than dated.

OPS FIT

13 / 20

MODE B: localization across 228 markets is a genuine use for a globally-broadcast team's fan, sponsor and partner communications.

RISKS & COUNTERS

NO DATED TRIGGER The IPO is exploratory, not scheduled. **Counter:** Use category exclusivity as the clock and anchor to the pre-IPO brand-building window; the open lane is cheap to lock now and disappears once a peer signs.

SMALLER CHEQUE CAPACITY At a \$2B valuation DeepL is smaller than typical targets, so a top-tier deal may stretch. **Counter:** Calibrate to an entry/associate tier (~\$3-4M/yr) with a real localization workstream; scale activation into the IPO.
