

Applied Intuition

Physical AI / Autonomous-Vehicle Software & Simulation · Mountain View, CA · Private (\$15B; ~\$830M ARR; pre-IPO)

Applied Intuition, the physical-AI and vehicle-software leader, raised \$600M at a \$15B valuation and roughly doubled ARR to ~\$830M - a pre-IPO leader whose customers are 18 of the top 20 automakers, with no motorsport presence and an unclaimed 'physical AI / autonomy' lane on the F1 grid.

THE CASE

Applied Intuition is the leader in 'physical AI' - vehicle software, simulation, validation and autonomy stacks - and in June 2025 it raised a \$600M Series F at a \$15B valuation (co-led by BlackRock-managed funds and Kleiner Perkins, \$1.2B raised to date), while roughly doubling ARR to ~\$830M. Its customers are 18 of the top 20 automakers (Toyota, VW, GM, Porsche, Stellantis among them), so the F1 paddock - dense with OEM and mobility decision-makers - is precisely the room it wants to be in ahead of a likely listing. Founder-led by Qasar Younis (ex-Y Combinator COO; early-career GM engineer), it has never touched motorsport. Crucially, the 'physical AI / autonomy' lane is open: the AI partnerships already on the grid are generic-enterprise (Anthropic as Williams' 'thinking partner', TWG as Cadillac's exclusive AI partner), not autonomous-vehicle software - a distinct category a single brand could own.

WHY NOW

Pre-IPO leaders invest in enterprise brand to support a future listing, and Applied Intuition's buyers - 18 of the top 20 automakers - cluster in the F1 paddock, so the audience ROI is unusually direct. The 'physical AI / autonomy' lane is unclaimed today, which rewards a first mover before the generic-AI deals expand to crowd it. There is no hard competitor clock yet, so the work is to create the urgency with an early, relationship-led approach to a founder-CEO who still owns brand strategy directly.

BOTTOM LINE

The physical-AI and vehicle-software leader - \$15B, ~\$830M ARR (roughly doubled YoY), \$1.2B raised from BlackRock and Kleiner Perkins - whose customers are 18 of the top 20 automakers. The F1 paddock is dense with exactly those OEM decision-makers, and 'physical AI / autonomy' is a distinct, unclaimed lane on the grid (the AI deals already signed are generic-enterprise - Anthropic at Williams, TWG at Cadillac - not autonomous-vehicle software). A pre-IPO leader with the capacity and brand mandate, never in motorsport. Honest framing: this is a brand-and-audience play with credible engineering adjacency, not a literal in-car deployment.

WHY HAAS

Haas is the lean, accessible entry tier with genuinely open enterprise-technology whitespace (its roster is largely consumer/commercial brands), and as the grid's American team it aligns with a Silicon Valley physical-AI leader's identity - a sensible, ownable first motorsport step at a sensible price, with a clear scale-up path to a larger team at the next contract if the model proves out.

VALUE TO HAAS — MODE B (TECH SERVES THE TEAM OPERATION)

MODE B done with real substance - three concrete fronts. (1) COMMERCIAL / B2B ENGINE: Applied Intuition sells to 18 of the top 20 automakers, and the F1 paddock is wall-to-wall with exactly those OEM and mobility decision-makers - so Haas hospitality becomes a working enterprise pipeline channel for Applied Intuition, while Haas gains a premium, well-capitalized (\$15B) American technology anchor partner whose presence signals engineering credibility and helps the team attract further blue-chip sponsors. Owning the unclaimed 'physical AI / autonomy' grid category is a defensible, single-brand position. (2) ENGINEERING ADJACENCY & TALENT: vehicle dynamics, simulation and controls are the shared language of any F1 engineering org and of Applied Intuition's product - a credible basis for co-developed 'simulation-driven development' content, advisory access to Applied Intuition's vehicle-software expertise, and a joint engineering-talent pipeline (both compete for the same ML/controls/vehicle-dynamics engineers); this is positioned as adjacency and knowledge-halo, explicitly NOT a claim that Haas runs Applied Intuition's simulator. (3) BRAND & CONTENT: an American team plus an American physical-AI champion is an aligned innovation narrative - a co-marketing content series on autonomy and physical AI, and a recruiting halo that lifts both brands with engineering talent. Haas gets a high-credibility, deep-pocketed partner and aligned co-marketing; Applied Intuition gets a premium B2B stage in front of its exact buyers ahead of an IPO.

DEAL ARCHITECTURE

Official Technology / Innovation Partner tier on Haas, minimum three years, ~\$3-5M/yr, with category exclusivity in 'physical AI / autonomous-vehicle software' and a co-marketing + hospitality program built around the OEM-buyer audience.

PRIMARY DECISION-MAKER

Qasar Younis
CEO & CO-FOUNDER, APPLIED INTUITION - VERIFIED
(FOUNDER-LED; NO PUBLIC CMO, SO BRAND/SPONSORSHIP STRATEGY ROUTES THROUGH THE CEO)

Co-founder and CEO, ex-Y Combinator COO and an early-career GM engineer; as a founder-led pre-IPO company with no public CMO, top-level brand and sponsorship decisions sit with Younis - the right entry point. Approach him with a ready-made, audience-led thesis: F1 as a direct line to the OEM buyers Applied Intuition already sells to.

OPENING ANGLE

"Qasar - your buyers are 18 of the top 20 automakers, and most of them are in the F1 paddock every other weekend. 'Physical AI' is the one lane no one on the grid owns yet, and Haas is the smart, ownable first step ahead of your IPO. 25 minutes?"

SCORE COMPOSITION

TIMING 17 / 20 Closed a \$600M Series F at a \$15B valuation (Jun 2025, co-led by BlackRock funds and Kleiner Perkins) and roughly doubled ARR to ~\$830M - a pre-IPO leader actively building enterprise brand.	CAPACITY 18 / 20 \$15B valuation, ~\$830M ARR and \$1.2B raised - comfortably funds a mid-tier multi-year partnership.	BRAND FIT 17 / 20 'Physical AI / autonomy' is a distinct, unclaimed lane on the grid; its customers (18 of the top 20 automakers) are the OEM decision-makers who populate F1 - a near-perfect B2B audience match.	URGENCY 12 / 20 An IPO-readiness and brand-building window exists, but there is no acute external forcing function or competitor clock yet.	OPS FIT 13 / 20 MODE B, honestly scored: Applied Intuition is not an F1 race-simulation vendor, so the value is brand + B2B audience + a credible engineering/talent adjacency, not a literal in-car workstream.

RISKS & COUNTERS

DOES A B2B INFRA COMPANY BELONG IN F1? Applied Intuition sells to engineers, not consumers, so the brand logic isn't obvious at first glance. **Counter:** The grid is now full of exactly this play - Atlassian, Anthropic, VAST Data, Keeper Security all sponsor for B2B reach; the F1 paddock IS Applied Intuition's buyer base, making the audience ROI unusually direct.

ENGINEERING FIT IS ADJACENCY, NOT IN-CAR Applied Intuition is not an F1 race-simulation vendor; overclaiming a technical deployment would be a defect. **Counter:** Position honestly as brand + B2B audience + engineering/talent adjacency; the value stands on audience match and category ownership alone.

PRE-IPO SPEND DISCIPLINE Public-company preparation favours visible efficiency over discretionary spend. **Counter:** Lead with a value-to-mid tier and a measurable OEM-pipeline outcome, not title-level spend.
