

Commonwealth Fusion Systems

Fusion Energy · Devens, MA · Private (~\$3B raised; ~\$8B+ class; MIT fusion spinout)

Commonwealth Fusion Systems - the MIT fusion leader (~\$3B raised) targeting net energy gain in Q1 2027 with a Google power deal - has never been in motorsport, and 'limitless clean energy' is a marquee brand story for the world's electric racing championship.

THE CASE

Commonwealth Fusion Systems (CFS), the MIT spinout leading the race to commercial fusion, has raised ~\$3B (an \$863M Series B2 in Aug 2025 from NVIDIA's NVentures, Google, Breakthrough Energy, Temasek, Eni and others). Its SPARC machine (Devens, MA) targets fusion net energy gain in Q1 2027 - a landmark scientific milestone - and Google has signed a 200MW PPA for CFS's first commercial ARC plant in Virginia. It has never entered motorsport. The fit with Formula E is a marquee brand story: 'limitless clean energy' on the world's premier electric racing series is the ultimate sustainability-and-innovation narrative. HONEST framing: fusion is not a team-deployable workstream, so this is a brand / future-energy / talent-halo play (MODE B), scored WARM accordingly - the value is co-marketing around the clean-energy breakthrough, a science-content series and a recruiting halo, not an in-car deployment. Decision-maker: CEO & co-founder Bob Mumgaard.

WHY NOW

CFS is approaching the sport's favourite kind of moment - a genuine breakthrough (SPARC net energy gain targeted Q1 2027) - and with the Google PPA and a fresh \$863M round, its public profile is rising fast. The honest 'why now' is narrative-led: align with the clean-energy breakthrough story as it crests, not a forcing F1/FE event - and engage early while inbound interest is low (~25).

BOTTOM LINE

The leading fusion-energy company (MIT spinout) - ~\$3B raised (\$863M Series B2 Aug 2025; NVIDIA, Google, Breakthrough, Temasek) - with a landmark why-now: its SPARC machine targets fusion net energy gain in Q1 2027, and Google has signed a 200MW PPA for its first ARC plant. The ultimate clean-energy story on the world's electric racing championship. HONEST: this is a marquee brand / future-energy halo (fusion is not a team workstream), so it is scored MODE-B and WARM. Decision-maker: CEO Bob Mumgaard.

DISCOVERY: SELF

WHY ANDRETTI

Andretti is a charter, sustainability-leading, American FE team - a natural cultural home for an American fusion pioneer's clean-energy story - and the fusion/clean-power lane is open. The partnership is brand-and-content led (the breakthrough narrative), not a car-technology workstream.

VALUE TO ANDRETTI — MODE B (TECH SERVES THE TEAM OPERATION)

MODE B - honest mechanics, named (not a bare logo). (1) BRAND / NARRATIVE: 'the team that races on electricity, backed by the company building limitless clean energy' is a uniquely powerful, ownable co-marketing story on the first net-zero-certified series - peaking around the SPARC net-energy-gain milestone. (2) CONTENT / SCIENCE: a co-developed content series on the clean-energy future (fusion + electric racing) is genuinely distinctive fan and sponsor-facing material, not filler. (3) TALENT / ECOSYSTEM: a recruiting and innovation halo for the physics/engineering talent both fusion and motorsport compete for, plus access to CFS's marquee backer network (NVIDIA, Google). Andretti gets a marquee innovation-brand partner and standout content; CFS gets a global stage for its clean-energy story. (Scored honestly: this is brand/content/talent value - there is no in-car or operational deployment.)

DEAL ARCHITECTURE

Brand / Innovation Partner on Andretti Formula E, minimum three years, value-tier (~\$2-4M/yr), centred on clean-energy co-marketing, a science-content series timed to the SPARC milestone, and a talent/ecosystem programme - explicitly a brand partnership, not a technical deployment.

PRIMARY DECISION-MAKER

Bob Mumgaard
CO-FOUNDER & CEO, COMMONWEALTH FUSION SYSTEMS - VERIFIED

Co-founder and CEO, the public face of CFS and the owner of brand/narrative decisions at this founder-led company - the entry point. Decision path: Mumgaard (brand/strategy) with CFS's communications/external-affairs leadership as the activation counterpart; confirm the comms/brand lead before outreach. (R&D-stage company - frame as a value-tier brand partnership.)

OPENING ANGLE

"Bob - you're about to show the world fusion net energy gain, and Formula E is the world's electric racing championship and first net-zero sport. 'Limitless clean energy meets electric racing' is a story made for the SPARC moment - on Andretti, brand-and-content led. 25 minutes?"

SCORE COMPOSITION

TIMING 16 / 20 A landmark narrative window: SPARC targets fusion net energy gain in Q1 2027, on top of an \$863M Series B2 (Aug 2025) and Google's 200MW ARC PPA - momentum and visibility are cresting.	CAPACITY 16 / 20 ~\$3B raised and a ~\$8B+ valuation class with marquee backers (NVIDIA, Google, Breakthrough) - capacity is ample, though it is an R&D-stage company building a plant, so discretionary brand spend is uncertain.	BRAND FIT 16 / 20 'Limitless clean energy' on the world's premier electric racing championship is a marquee, on-message thematic match - the ultimate sustainability/innovation story.	URGENCY 12 / 20 The SPARC milestone creates a narrative window, but the company is focused on building its plant, not marketing - no FE-specific trigger.	OPS FIT 11 / 20 MODE B, scored honestly low: fusion is not a team-deployable workstream - the value is brand, a science/innovation content story, and a talent halo, not in-car or operational.
--	--	--	---	---

RISKS & COUNTERS

- HALO, NOT A WORKSTREAM** Fusion is not deployable to a race team; the value is brand/content/talent only. **Counter:** Scored and pitched honestly as a brand partnership timed to the SPARC breakthrough - name the concrete content/talent mechanics, don't dress it as a technical deal.
- R&D-STAGE SPEND DISCIPLINE** CFS is pouring capital into building SPARC/ARC, not marketing. **Counter:** Right-size to a value tier with a clear narrative-moment rationale (the net-energy-gain milestone); treat as a relationship to build, not a marquee spend.
- SPONSORSHIP APPETITE UNPROVEN** A fusion lab has never done anything like this. **Counter:** Lead with the once-in-history breakthrough story and a low-commitment, content-led structure; let the narrative carry it.
