Advanced Manufacturing · Automated Precision-Parts Factories · Torrance, California (factories in Mesa, AZ and Muscle Shoals, AL) · Private (\$7.87B; \$1.37B Series D, Aug 2026)

Hadrian, the Torrance-based builder of highly automated precision-parts factories for America's aerospace and defence primes, announced a \$1.37B Series D at a \$7.87B valuation on 6 August, co-led by WCM, Washington Harbour, Valor, 137 Ventures and Baillie Gifford with JPMorganChase as anchor co-lead.

THE CASE

The round is company-announced: \$1.37B of Series D equity at a \$7.87B valuation, co-led by WCM Investment Management, Washington Harbour Partners, Valor Equity Partners, 137 Ventures and Baillie Gifford, with JPMorganChase's Strategic Investment Group as anchor co-lead. It follows the \$260M Series C in 2025 that opened the Mesa, Arizona factory alongside Torrance and Muscle Shoals, Alabama. Proceeds fund new factories, R&D and production lines in munitions and autonomous systems, and a Los Angeles headquarters and San Francisco engineering hub are planned (Axios). A week earlier Hadrian signed a national-security spacecraft manufacturing MoU with Fortastra.

The identity moment is the pivot from parts supplier to American industrial platform: Hadrian's own framing is 'America's industrial renewal', and its product is speed, high-mix, low-volume metal parts it says arrive 10x faster at half the cost. That is the exact problem a debut Formula 1 team faces, and the American one is building its supply chain from an empty site in Indiana this season.

WHY NOW

The round closed on 6 August and the new lines and headquarters are funded now. The United States GP in Austin (late October) and Las Vegas (November) fall inside the window, and Cadillac closes its 2027 roster in the fourth quarter of its first season.

GRID FIT — CATEGORY-WHITESPACE CHECK ACROSS THE F1 GRID (SPONSOR TABLE; 49 OF 346 PARTNER ROWS CATEGORISED)

Cadillac F1 Team ◆ RECOMMENDED	PRIME LANE	greenfield entry — partner roster being built from zero
Mercedes-AMG Petronas F1 Team	OPEN	no rival in this category lane
Oracle Red Bull Racing	OPEN	no rival in this category lane
Scuderia Ferrari HP	OPEN	no rival in this category lane

BOTTOM LINE

A company-announced \$1.37B Series D at \$7.87B, new factories and production lines, and an 'industrial renewal' identity put Hadrian at peak brand-investment motive; Cadillac's Fishers build gives it a real manufacturing workstream and an open lane. Defence optics and GM's own capacity hold the score at 74.

WHY CADILLAC F1 TEAM

Cadillac is the American debutant: a 450,000 sq ft headquarters in Fishers, Indiana for car production, power units in Charlotte, a Silverstone satellite for wind-tunnel parts, and General Motors plants behind it. Its 2026 roster (TWG AI, Core Scientific, IFS, Tenneco) has no machining, machine-tool or precision-parts partner, while Haas Automation owns that lane at TGR Haas, DMG Mori and Hexagon at Red Bull, and United Machining at Alpine. Reindustrialising America is the story both brands tell.

VALUE TO CADILLAC F1 TEAM — MODE A (TECH IN THE CAR / CHAMPIONSHIP)

MODE A - operational. An F1 car is thousands of one-off machined metal parts, uprights, brackets, gearbox and suspension components, redesigned race by race. Hadrian's automated factories in Torrance and Mesa are built for that high-mix, low-volume work, in the same country as Fishers. As supplier-partner it shortens lead times and adds US capacity inside cost-cap value-in-kind rules. In return: Official Advanced Manufacturing Partner, livery, Austin and Las Vegas hospitality.

DEAL ARCHITECTURE

Entry as Official Advanced Manufacturing Partner. **THREE YEARS**, 2027-2029, spanning the Fishers ramp and Hadrian's new lines. Estimated \$3-5M a year, part-payable in manufactured parts. Scope: sidepod or wing placement, factory-to-track content, US-race hospitality for Hadrian's customers.

PRIMARY DECISION-MAKER

Chris Power

FOUNDER & CEO, HADRIAN · VERIFIED

Power, Australian-born, moved to the US in 2019 and founded Hadrian to build automated precision-parts factories; he fronts every raise. Path: West Owens, CFO since October 2024 (formerly TerraWatt, SolarCity). No chief marketing officer is listed.

OPENING ANGLE

Lead with the empty site in Indiana.

“Chris, Cadillac is building an F1 parts chain from scratch in Fishers; you build automated factories for exactly that kind of part. The manufacturing lane on the American car is open. 25 minutes before Austin?”

SCORE COMPOSITION

TIMING 16 / 20 Round 6 Aug; Austin and Las Vegas inside the window.	CAPACITY 17 / 20 \$1.37B raised at \$7.87B; capital is earmarked for factories.	BRAND FIT 13 / 20 Defence supplier, B2B; American-renewal story fits Cadillac.	URGENCY 12 / 20 No hard deadline beyond Q4 rosters; HQ move only planned.	OPS FIT 16 / 20 MODE A: precision parts for a team building a US chain.
--	--	---	--	--

RISKS & COUNTERS

DEFENCE OPTICS Hadrian makes parts for munitions, jets and drones; GM, TWG and Formula 1 must accept a defence supplier on the car. **Counter:** Boeing sits on Alpine's roster; position Hadrian as advanced manufacturing and keep munitions out of activation copy.

INSIDE GM'S TENT GM has vast machining capacity and Tenneco is already a component partner; the team may see no gap. **Counter:** Pitch speed on one-off parts, not volume: the lane is lead time.
