

Helion Energy

Fusion Energy · Clean Power Generation · Everett, Washington (founded 2013) · Private (\$15.5B post-money; \$465M Series G, Jun 2026)

Helion, the fusion company building the world's first fusion power plant for Microsoft, announced on 4 June 2026 a \$465M Series G led by Thrive Capital at a \$15.5B valuation, nearly triple its January 2025 mark, taking total funding to \$1.5B as it moves from lab milestone to construction site.

THE CASE

On 4 June Helion announced a \$465M Series G led by Thrive Capital at a \$15.5B post-money valuation, with Lux Capital, Peak XV, BoxGroup and Bill Ford joining Lightspeed, SoftBank Vision Fund 2 and Good Ventures; total raised is \$1.5B, nearly triple the \$5.425B set by the \$425M Series F in January 2025. The story is physical: Orion, the first fusion power plant, has been under construction in Malaga, Washington since July 2025 to supply Microsoft by 2028, and in February Polaris became the first private machine to demonstrate deuterium-tritium fusion at 150 million degrees.

Fusion is the definitive clean-energy story and Formula E is the championship built to prove clean mobility; pairing the two is the most on-message sustainability partnership on any grid, and Helion has never touched motorsport. The energy lane belongs to incumbents: Shell sits with Lola Yamaha ABT, TotalEnergies with DS Penske, Castrol with Jaguar. The counterweight: Helion is pre-revenue and pouring capital into reactors, so this is a measured brand and talent platform.

WHY NOW

The round closed on 4 June and Helion is at peak visibility as it moves from Polaris to a licensed construction site. Season 13, the GEN4 era, opens in Jeddah in December and the Austin E-Prix in February 2027 brings Formula E to a new US city; rosters are set now.

Citroën Racing	OPEN	no rival in this category lane

BOTTOM LINE

A \$465M round at \$15.5B on 4 June, a licensed fusion plant under construction for Microsoft and a first-of-its-kind Polaris result put Helion at peak brand-investment visibility; the clean-energy lane at the American Formula E team is open as the GEN4 era and a new Austin E-Prix arrive.

WHY ANDRETTI FORMULA E

Andretti is the American team on the grid, with TWG AI as primary partner, Quest Global on engineering, Crowe UK and Reflo alongside; it carries no energy, power or fuel partner, so a clean-energy lane is open outright. Envision Racing is owned by an energy group that would not cede its own story; Jaguar, DS Penske and Lola Yamaha ABT carry oil majors. Andretti gives Helion the two US rounds, Austin and Miami, and a parent that also owns the Cadillac F1 entry.

VALUE TO ANDRETTI FORMULA E — MODE B (TECH SERVES THE TEAM OPERATION)

MODE B - halo, with concrete mechanics. Fusion does not power a Formula E car, so the substance is narrative, audience and talent: co-produced content pairing the first fusion plant with the first GEN4 season; hospitality at Austin and Miami for the utilities, hyperscalers and policymakers Helion must win; a joint STEM recruiting platform as Helion hires physicists and engineers. In return: Official Clean Energy Partner status, livery presence, driver access.

DEAL ARCHITECTURE

Entry as Official Clean Energy Partner. **THREE YEARS**, Seasons 13-15, spanning Orion's construction and its 2028 delivery to Microsoft. Estimated \$1.5-3M a year, sized to a pre-revenue company and stepped up at first power. Scope: energy-category exclusivity, GEN4 content, Austin and Miami hospitality, a talent programme.

PRIMARY DECISION-MAKER

David Kirtley

FOUNDER & CEO, HELION ENERGY · VERIFIED

Kirtley founded Helion in 2013 and fronts every raise, customer deal and milestone; a first sports partnership is his call. Path: Pragav Jain, CFO since July 2024 (ex-Waymo, Goldman Sachs), and Savanna Thompson, Chief Business Operations Officer. No CMO listed.

OPENING ANGLE

Lead with the stage, not the signage.

“David, fusion is the clean-energy story and Formula E is the stage built to prove clean mobility. No energy brand sits with the American team, and Austin joins the calendar in February. 25 minutes on a milestone-linked partnership before the Season 13 opener?”

SCORE COMPOSITION

TIMING 16 / 20 Round closed 4 Jun; GEN4 rosters set before December.	CAPACITY 15 / 20 \$1.5B raised at \$15.5B, but pre-revenue and capex-first.	BRAND FIT 16 / 20 Clean energy on the clean-mobility grid; narrative-perfect.	URGENCY 11 / 20 No hard deadline; Orion's 2028 delivery is the milestone.	OPS FIT 12 / 20 MODE B: halo, audience and talent; no in-car workstream.
---	--	--	--	---

RISKS & COUNTERS

PRE-REVENUE, CAPEX-FIRST The \$465M is for reactors and Orion; a sponsorship can read as off-strategy to a founder-led deep-tech board. **Counter:** Pitch a modest, milestone-linked brand and talent platform that steps up at first power, not heavy signage.

HALO, NOT WORKSTREAM Fusion does not power a Formula E car, so no operational integration anchors renewal. **Counter:** Anchor renewal on measured outcomes: policy and utility audiences at Austin and Miami, hiring funnel, content reach.
