

Cognition AI

AI Software - Coding Agents - San Francisco · San Francisco · ~\$47B valuation (round closing September 2026)

Cognition AI is finalizing a \$1 billion round at a \$47 billion valuation, with investor demand reported at 10x oversubscription, expected to close September 2026. The raise values its autonomous coding-agent platform, Devin, as engineering teams adopt AI agents to compress software development cycles industry-wide.

THE CASE

Cognition AI is set to close a \$1 billion funding round in September 2026 at a \$47 billion valuation, with demand reported at 10x oversubscription. The raise cements Cognition among the best-capitalized AI infrastructure plays of 2026, positioning its Devin coding-agent platform as a category leader in autonomous software engineering. This is the **BRAND RECKONING** moment: capital of this scale demands a visibility platform matched to its ambition, not just enterprise sales decks and developer conferences.

No AI coding-agent company has entered F1 sponsorship to date, leaving the category entirely open on the grid. Enterprise software and cloud-infrastructure brands have already claimed visibility across multiple teams this season, compressing the window for a fast-moving challenger to secure a technical-partner slot. The lane matching Cognition's engineering-workflow positioning sits open at BWT Alpine.

WHY NOW

The \$1B round is scheduled to close this month, creating a narrow pre-close and post-close visibility window before Cognition's valuation story is old news. F1's Singapore and United States race weekends in the coming quarter offer the next viable activation windows before competing capital-flush AI vendors move first.

BOTTOM LINE

Cognition's \$1B raise at a \$47B valuation creates a narrow pre-close visibility window; BWT Alpine's post-Renault engineering-software refresh is the only open technical-partner lane matching Cognition's coding-agent positioning — move before a rival AI vendor claims it.

WHY BWT ALPINE

BWT Alpine's engineering software stack is undergoing refresh following Renault's exit from the power-unit program, opening a technical-category slot for a partner who can supply modern engineering tooling rather than legacy enterprise software. Cognition's Devin platform, built for compressing engineering-workflow cycles, matches that vacancy directly — a coding-agent deployed across Alpine's simulation and vehicle-software teams would be the first AI-native technical partner on the F1 grid.

VALUE TO BWT ALPINE — MODE A (TECH IN THE CAR / CHAMPIONSHIP)

Cognition's Devin agent maps to Alpine's software-engineering pipeline: vehicle-simulation code, telemetry-processing tools and pit-wall strategy software all run on engineering codebases that benefit from autonomous coding-agent acceleration. Deployment surface: factory software-engineering teams, simulation-tool development, telemetry-pipeline maintenance, and race-weekend strategy-software patches — with Devin visible on factory monitors and engineer-facing dashboards as a live technical demonstration.

DEAL ARCHITECTURE

A three-year Technical Partner agreement in the estimated \$8-12M annual range positions Cognition as Alpine's engineering-software partner through 2029, with activation anchored at Singapore, United States and Abu Dhabi race weekends. **THREE YEARS** secures brand visibility through Cognition's post-raise growth phase, with an option to scale into a Major Partner tier as Devin's enterprise footprint expands.

PRIMARY DECISION-MAKER

Scott Wu

CO-FOUNDER AND CEO, COGNITION AI · **VERIFIED**

Co-founder and CEO of Cognition AI since its 2023 founding; previously a competitive programmer, Scott Wu now leads the company's flagship Devin coding-agent product and its enterprise go-to-market strategy as the company scales past its latest funding round.

OPENING ANGLE

Cognition is closing a record AI funding round while the F1 grid's coding-agent category remains fully open.

“Cognition's \$1 billion round closes this month at a \$47 billion valuation — before that story goes cold, can we book 25 minutes?”

SCORE COMPOSITION

TIMING 19 / 20 Round closing within weeks.	CAPACITY 20 / 20 Raising \$1B, ample sponsorship capacity.	BRAND FIT 16 / 20 Fits Alpine's software refresh need.	URGENCY 16 / 20 Pre-close window narrows fast.	OPS FIT 15 / 20 Coding agent maps to engineering workflows.

RISKS & COUNTERS

CATEGORY UNPROVEN No AI coding-agent has sponsored an F1 team, leaving positioning unproven. **Counter:** First-mover status lets Cognition define the category before rival AI vendors follow.

ROUND COULD SLIP The funding close could slip past September, delaying the visibility window. **Counter:** Opening talks pre-close locks the relationship ahead of the valuation headline.
