

Emerald AI

Climate Tech - Grid/Energy Management Software - Washington DC · Washington, D.C. · \$1.05B valuation (Series A, Aug 2026)

Emerald AI closed a \$150M oversubscribed Series A on 25 Aug 2026 at a \$1.05B valuation, lifting total funding past \$220M. Twelve Fortune Global 500 strategics — including NVIDIA, Siemens and GE Vernova — now hold stakes as the company moves from demonstration to full-scale commercial grid-flex deployment.

THE CASE

Emerald AI raised a \$150M oversubscribed Series A on 25 Aug 2026, valuing the grid-flexibility software company at \$1.05B and lifting total capital raised past \$220M. Energize Capital and DCVC co-led the round, joined by NVIDIA, Siemens, GE Vernova, RWE, Aramco Ventures and Samsung Ventures — twelve Fortune Global 500 companies now hold equity. The raise marks a **BRAND RECKONING** moment: Emerald moves from demonstration pilots to multi-megawatt, full data-center-scale commercial deployment, and needs a visibility platform to match its new enterprise-trust ambitions.

No F1 or Formula E grid-flexibility sponsor exists on either grid, leaving the energy-management category entirely open. As hyperscalers and utilities scrutinize Emerald's enterprise credentials, a global motorsport platform offers scale-validation no single-utility pilot can match. The slot that matches Emerald's grid-flex narrative architecturally is open at Nissan Formula E Team.

WHY NOW

Emerald's Series A closes as Formula E teams open 2026-27 season sponsorship renewals, an 8-12 week window before grid-partner commitments lock for pre-season. No rival grid-flexibility platform has claimed the lane; a first-mover conversation now secures placement before category competitors reach the paddock.

BOTTOM LINE

Emerald AI's \$150M Series A, backed by NVIDIA, Siemens and GE Vernova, hands it enterprise credibility but zero motorsport visibility. Nissan Formula E Team is the clean fit: an electrification-native series with no grid-flexibility partner, ready to co-present Emerald's technology to the same utility audiences.

WHY NISSAN

Nissan Formula E Team carries no grid-flexibility or energy-management partner today, and its electrification-first positioning gives Emerald's load-shedding narrative direct thematic alignment no combustion-era team can offer. Formula E's entire proposition — cars drawing grid power, racing on street circuits embedded in urban grids — mirrors Emerald Conductor's real-time demand-response story. Nissan's global EV manufacturing scale and utility relationships give the team credibility to co-present Emerald's technology to the same hyperscaler and utility audiences it is courting.

VALUE TO NISSAN FORMULA E TEAM — MODE A (TECH IN THE CAR / CHAMPIONSHIP)

Emerald Conductor's real-time grid-flex and load-shedding engine maps directly onto Nissan's factory energy operations and race-weekend power draw — EV battery charging, simulator compute loads, and trackside power management all become live demonstration surfaces. Deployment surface: garage energy dashboards, factory telemetry walls, broadcast graphics showing real-time grid interaction during ePrix sessions, and pit-wall power-allocation feeds during qualifying and race format changes.

DEAL ARCHITECTURE

A three-year entry-tier grid-flexibility partnership, in the \$2-4M annual range, makes Emerald the team's energy-management partner across the 2026-27 season, with activation anchored at flagship street-circuit race weekends. **THREE YEARS** secures renewal leverage as Emerald scales from pilot utilities toward full hyperscaler contracts.

PRIMARY DECISION-MAKER

Dr. Varun Sivaram
FOUNDER & CEO, EMERALD AI · **VERIFIED**

Dr. Varun Sivaram founded Emerald AI in 2024 after serving as Chief Technology Officer of ReNew Power, one of India's largest renewable energy companies. He now leads Emerald's push to commercialize grid-flexible AI data-center software with utility and hyperscaler partners nationwide.

OPENING ANGLE

Emerald AI just banked \$150M at a \$1.05B valuation with zero motorsport visibility to match its ambition.

“Emerald just closed a \$150M round with NVIDIA and Siemens on the cap table, and Formula E has no grid-flexibility partner on the grid — can we book 25 minutes?”

SCORE COMPOSITION

TIMING 15 / 20 Fresh capital, no motorsport spend yet.	CAPACITY 15 / 20 \$150M raised, budget still unallocated.	BRAND FIT 15 / 20 Grid-flex mirrors FE's electrification story.	URGENCY 15 / 20 Renewal window opens within 8-12 weeks.	OPS FIT 15 / 20 Load-shedding tech maps to live ops.

RISKS & COUNTERS

UNPROVEN SPONSORSHIP APPETITE Emerald has never bought sports sponsorship and may default to trade-show marketing instead. **Counter:** Frame as a three-year entry-tier pilot with utility-conversion KPIs, not a brand-only media buy.

CATEGORY COULD DRAW RIVAL BIDDERS Grid-flexibility peers may approach Formula E once Emerald's raise publicizes the category's motorsport fit. **Counter:** Move within the 8-12 week horizon before competitors register the open energy-management lane.
