

CodeRabbit

AI DevTools - Code Review/Governance - San Francisco · San Francisco · \$1.5B post-money valuation (Series C, Aug 2026)

CodeRabbit closed a \$143M Series C on 12 Aug 2026 at a \$1.5B post-money valuation, co-led by Atomico and Smash Capital. Revenue grew more than 5x YoY. The company launched Agentic Change Management — Triage, Change Stack, Security — while doubling European headcount and entering Japan and Asia.

THE CASE

CodeRabbit's \$143M Series C, co-led by Atomico and Smash Capital, values the AI code-review company at \$1.5B post-money as of 12 Aug 2026 — a raise joined by BMW i Ventures and Datadog alongside existing backers CRV and Scale Venture Partners. Revenue grew more than 5x YoY. The company now serves 17,000+ customers including Adyen, BMW, JFrog and NVIDIA. This is the **BRAND RECKONING** moment: a governance-layer category leader with automotive-engineering credibility and no F1 paddock presence at all.

No competing AI code-governance vendor holds an F1 or Formula E sponsorship as of this signal. The engineering-software governance category remains unclaimed on the grid. The slot that matches an AI change-management layer to a manufacturer engineering pipeline sits open at Audi, entering its first full factory season.

WHY NOW

CodeRabbit closed its Series C on 12 Aug 2026, days after the F1 summer break ends and the grid resumes at the Dutch Grand Prix — the sponsorship-planning window for 2027 technical-partner slots opens as teams finalize budgets ahead of the season's final third.

BOTTOM LINE

CodeRabbit just raised \$143M at a \$1.5B valuation with BMW i Ventures and BMW itself as customer and investor; Audi's factory build-out has no disclosed AI code-governance partner, making this a three-year technical-tier conversation worth opening before 2027 budgets lock.

WHY AUDI

Audi's factory entry lacks a disclosed AI code-governance or DevOps-security partner as it scales a new Sauber-based engineering organization across Hinwil and Neuburg. CodeRabbit's BMW i Ventures backing and BMW customer relationship offer a direct automotive-engineering credibility bridge that a generic DevTools vendor cannot claim. Audi's software-heavy power-unit program, now consolidating two engineering sites, is precisely the governance-at-scale problem CodeRabbit's Agentic Change Management was built to solve.

VALUE TO AUDI — MODE A (TECH IN THE CAR / CHAMPIONSHIP)

CodeRabbit's agentic code-review layer maps directly to Audi's power-unit and chassis software pipeline: automated Triage and Change Stack review gates for on-car firmware, control-software and simulation-tool commits across the Hinwil-Neuburg engineering split. Security scanning covers agent-generated code entering trackside and factory systems. Deployment surface: factory engineering-software wall, race-weekend software-deployment sign-off, and the CI/CD pipeline feeding car-control-unit updates between sessions.

DEAL ARCHITECTURE

A three-year technical-partner tier fits the engineering-governance category: **THREE YEARS** at an estimated \$3-5M/yr, structured around Audi's power-unit rollout. First activation window: the Dutch and Italian Grand Prix rounds, ahead of 2027 sponsorship-budget lock.

PRIMARY DECISION-MAKER

Harjot Gill

CO-FOUNDER & CEO, CODERABBIT · VERIFIED

Harjot Gill is Co-Founder and CEO of CodeRabbit, leading the company through its \$143M Series C and the launch of Agentic Change Management. He is scaling a 17,000+ customer base — including BMW, Adyen and JFrog — into automotive and enterprise engineering markets.

OPENING ANGLE

CodeRabbit just raised \$143M with BMW as investor and customer, and F1's governance-layer lane is unclaimed.

“CodeRabbit closed \$143M at a \$1.5B valuation with BMW i Ventures on the cap table and BMW as a named customer — Audi's engineering org has no disclosed AI governance partner. Can we book 25 minutes when Audi sponsorship planning clears?”

SCORE COMPOSITION

TIMING 13 / 20 Post-raise, pre-2027 budget window	CAPACITY 15 / 20 Well-capitalized, scaling international teams	BRAND FIT 15 / 20 BMW bridge, low on-car visibility	URGENCY 16 / 20 Category open, no competitor sponsorship	OPS FIT 15 / 20 Fits factory engineering software pipeline
--	---	--	---	---

RISKS & COUNTERS

TIMING RISK CodeRabbit's growth push targets Europe and Asia, not motorsport, so F1 budget may be unplanned this cycle. **Counter:** Frame as a 2027 entry ahead of Audi's technical-partner budget cycle, not an immediate buy.

BRAND FIT RISK AI DevTools brands typically favor factory-team back-office deals over on-car branding, limiting broadcast visibility. **Counter:** Anchor value in factory engineering credibility and BMW automotive proof points rather than broadcast exposure.
