

Glean

Enterprise AI / Work AI Platform · Palo Alto, CA · Private (~\$7.2B valuation; pre-IPO)

Glean has rocketed to a ~\$7.2B valuation as the enterprise 'Work AI' leader, with 250M+ agentic actions and an acquisition already in 2026 - a fast-scaling, pre-IPO brand with no motorsport presence and an open AI lane in Formula E.

THE CASE

Glean is one of enterprise AI's fastest risers: a ~\$7.2B 'Work AI' platform whose users executed more than 250 million agentic actions by January 2026, and which acquired agentic-document company Aryn in March 2026. It is on a clear IPO trajectory, has never entered motorsport, and sits in the same open enterprise-AI category as Cohere - meaning Formula E currently has room for a Work-AI brand to own a lane outright. Glean's product story (AI that makes large organisations radically more productive) is a natural fit for the operational, engineering-led narrative of an FE team, and its growth-stage brand would benefit from the international, enterprise-credible stage FE provides.

WHY NOW

Glean is scaling brand and go-to-market hard ahead of a likely listing, and the enterprise-AI category in FE is uncontested. Moving now secures category exclusivity cheaply and gives Glean a differentiated stage before larger AI names crowd in - the same first-mover logic that makes the AI lane valuable applies in reverse the moment a peer signs.

WHY MAHINDRA RACING

Mahindra Racing is a strong fit: a founding Formula E manufacturer committed through the Gen4 era to 2030, with an Indian-and-global identity and a large enterprise parent ecosystem (the Mahindra Group) that mirrors the kind of complex, multi-business organisation Glean sells into. The long manufacturer commitment also de-risks a multi-year deal, and Mahindra's audience and parent-group relationships open enterprise doors for Glean.

VALUE TO MAHINDRA RACING — MODE A (TECH IN THE CAR / CHAMPIONSHIP)

MODE A. A racing team and its parent run on dispersed institutional knowledge - engineering documentation, supplier data, sponsor and operations information - which is exactly what Glean's Work-AI platform indexes and makes instantly usable. A deployment for the team and selected parent-group functions gives Mahindra real productivity value and Glean a flagship, referenceable enterprise deployment, plus a co-marketing story across a global enterprise group.

DEAL ARCHITECTURE

Official Work AI Partner tier on Mahindra Racing, minimum three years (aligned to the manufacturer's Gen4 commitment), ~\$3-4M/yr, with AI-category exclusivity and a working deployment for the team and selected Mahindra Group functions.

PRIMARY DECISION-MAKER

Matt "Kix" Kixmoeller
CHIEF MARKETING OFFICER, GLEAN - VERIFIED VIA GLEAN.COM

Oversees Glean's global marketing; previously led marketing at Ghost Autonomy and marketing/product at Pure Storage (a multi-billion-dollar data pioneer). He owns the growth-stage brand-build a Formula E partnership would anchor. Co-decision-makers: founder-CEO Arvind Jain and COO Amar Maletira (go-to-market).

OPENING ANGLE

"Kix, Glean is the Work-AI leader and Formula E's enterprise-AI lane is wide open. Mahindra is committed to 2030, so a multi-year deal is de-risked - and you'd own the category before the IPO. 25 minutes?"

SCORE COMPOSITION

TIMING 15 / 20 Surged to a ~\$7.2B valuation with 250M+ agentic actions by Jan 2026 and an Aryn acquisition in Mar 2026 - a fast-scaling brand on an IPO trajectory.	CAPACITY 16 / 20 ~\$7.2B valuation, rapid enterprise adoption - capacity for an FE entry tier is solid.	BRAND FIT 15 / 20 'Work AI' for large enterprises fits FE's enterprise audience; a clean, uncontested AI category in the paddock.	URGENCY 12 / 20 Fast-rising valuation and IPO trajectory, but no single dated trigger.	OPS FIT 14 / 20 MODE A: enterprise knowledge/agent AI has a real internal-operations use for a racing organisation.

RISKS & COUNTERS

HYPER-GROWTH FOCUS A fast-scaling company may keep all spend on direct go-to-market. **Counter:** Frame the deal as an enterprise-credibility and reference-deployment play with measurable pipeline, not brand vanity.

NO DATED TRIGGER Absent an acute clock, the deal can slip. **Counter:** Category exclusivity is the clock - it vanishes the moment a rival AI brand signs an FE team.
