

AlphaSense

AI Market Intelligence / Financial Research · New York, NY · Private (~\$7.5B; >\$600M ARR; IPO candidate)

Fresh off a \$350M round at a ~\$7.5B valuation on more than \$600M of ARR, AlphaSense - the AI market-intelligence platform for the financial world - is a pre-IPO leader with no motorsport footprint, and no research-intelligence brand owns the F1 grid.

THE CASE

AlphaSense is the AI platform for market intelligence and search across the financial and business world - the tool banks, asset managers, hedge funds and a majority of the S&P 500 use to find and trust insight. On 3 June 2026 it closed a \$350M round at a ~\$7.5B valuation (led by Vitruvian Partners, Accenture Ventures and J.P. Morgan Growth Equity Partners), nearly doubling its 2024 mark, on more than \$600M of ARR. It has scale and momentum - the \$930M Tegus acquisition in July 2024 folded in the leading expert-transcript library - and CEO Jack Kokko has said an IPO is a possibility. Two things make it a 1440 target: it has never touched motorsport, and no market- or financial-intelligence brand owns a position anywhere on the F1 grid, so the category is uncontested. Its audience - research, strategy and investment professionals - is exactly the premium enterprise crowd an F1 partnership reaches.

WHY NOW

A \$350M raise at a doubled, ~\$7.5B valuation is the peak moment of brand-investment authority, and CEO Jack Kokko's openness to an IPO puts AlphaSense in the pre-listing window when enterprise credibility compounds most. A CMO appointed in 2024 with two IPO runs behind her is setting the brand agenda now. The market-intelligence category on the grid is empty and cheap to lock before a data or research rival notices the same open lane.

Red Bull Racing	OPEN	no rival in this category lane
Williams	OPEN	no rival in this category lane
Aston Martin	OPEN	no rival in this category lane

BOTTOM LINE

Fresh off a \$350M round at a ~\$7.5B valuation (3 Jun 2026) on \$600M+ ARR, this pre-IPO market-intelligence leader has the budget and the brand-reckoning moment - and no research-intelligence brand owns the F1 grid. Lock the category before the IPO.

NEW LEADERSHIP

DISCOVERY: SEEDIED

WHY McLAREN

McLaren is the sharpest canvas: a premium, technology-forward team with the deepest enterprise-B2B partner roster on the grid - Dell, Salesforce, Workday and Google among them - which means a proven hospitality machine pointed at exactly the corporate decision-makers AlphaSense sells to. The market-intelligence category is uncontested there, so AlphaSense can own it outright. If McLaren's inventory is constrained, Williams (a data-led revival with a B2B-tech audience) and Aston Martin (boardroom-premium) are credible fallbacks.

VALUE TO McLAREN — MODE B (TECH SERVES THE TEAM OPERATION)

MODE B - a real off-car value exchange. AlphaSense's market and competitive intelligence serves a team's commercial and strategy functions directly: sponsor and partner prospecting, category and market analysis, and tracking the businesses a team wants in its garage. McLaren gains a genuine intelligence capability plus co-marketing to a shared enterprise audience; AlphaSense gains a premium global stage and hospitality in front of the finance and corporate buyers it sells to. The honest framing is a commercial and brand partnership, not an in-car technical integration.

DEAL ARCHITECTURE

Official Market Intelligence Partner tier on McLaren, minimum three years, estimated \$3-5M/yr, with category exclusivity for market/financial intelligence and research, B2B hospitality aimed at AlphaSense's finance and corporate-strategy buyers, and digital/content rights for its enterprise audience. Williams or Aston Martin are the documented fallbacks.

PRIMARY DECISION-MAKER

Heather Zynczak
CHIEF MARKETING OFFICER, ALPHASENSE - VERIFIED
(APPOINTED 2024)

AlphaSense's CMO since 2024 and a repeat IPO-scale brand builder: previously CMO at Domo (grew revenue from \$0-100M) and CMO at Pluralsight, where she was part of the IPO team and built the enterprise go-to-market. She owns the brand mandate a multi-year F1 partnership would anchor. Co-decision-makers on a marquee spend: founder-CEO Jack Kokko and CFO Joe Hill.

OPENING ANGLE

"Heather, you've built brand through two IPO runs - and a \$7.5B round is the moment to plant an enterprise flag. Market intelligence is the one category no brand owns on the F1 grid, and McLaren's hospitality is full of your buyers. 25 minutes before the IPO window?"

SCORE COMPOSITION

TIMING 17 / 20 A \$350M round at a ~\$7.5B valuation closed 3 Jun 2026 (nearly doubling the 2024 mark) - the peak of brand-investment authority - and an IPO-scale CMO appointed in 2024 is setting the brand agenda now.	CAPACITY 18 / 20 ~\$7.5B valuation and more than \$600M ARR, just topped up with a \$350M raise - funding a \$3-5M/yr partnership is immaterial.	BRAND FIT 15 / 20 No market- or financial-intelligence brand sits anywhere on the F1 grid, so the category is ownable outright; tempered by MODE B (off-car) and a less iconic-than-in-car category.	URGENCY 13 / 20 The fresh round and an IPO on the horizon open a brand-build window, but there is no competitor-on-grid or race-date clock forcing the timeline.	OPS FIT 12 / 20 MODE B: AlphaSense serves a team's commercial and strategy functions (sponsor and market intelligence), a real off-car value exchange rather than an in-car system.
---	--	--	--	---

RISKS & COUNTERS

OFF-CAR RELEVANCE (MODE B) Market intelligence is not in-car technology, so the 'official technology partner' story is weaker. **Counter:** Position it like Ramp's back-office partnership - a real commercial/strategy capability plus enterprise hospitality and co-marketing to a shared buyer audience; the value is audience and brand, not a garage integration.

IPO SEQUENCING Brand spend may follow rather than precede a listing. **Counter:** Lock category exclusivity now at pre-IPO pricing and scale activation at the listing - the empty category is the asset, and it disappears the moment a rival signs.
