

Ramp

Fintech · Corporate Spend Management / AI Finance · New York · Private (~\$44B; \$750M round closed Jun 2026)

Ramp closed a \$750M round at a \$44B valuation in June 2026 (up ~38% from \$32B six months earlier), crossed \$1B+ ARR while staying free-cash-flow positive, and is launching in the UK/EU this summer - with no spend-management brand anywhere on the F1 grid.

THE CASE

Ramp's just-closed \$750M round at a ~\$44B valuation (June 2026, led by ICONIQ, GIC and Ontario Teachers') - up roughly 38% from \$32B only six months earlier - is the brand-reckoning moment when a category-defining fintech turns from growth story into institutional brand. It crossed \$1B+ in annualized revenue while remaining free-cash-flow positive, acquired UK/EU payments platform Billhop (March 2026), and begins onboarding UK and European businesses this summer. The grid gap is total: no spend-management or AI-finance brand holds a position anywhere in F1, and direct rival Brex has no motorsport deal, so the entire corporate-spend category sits unoccupied. The slot that fits Ramp's profile - its deepened, multi-year Visa issuing relationship and its EU/UK expansion arc - is open at Visa Cash App Racing Bulls, where Ramp would sit as the spend-intelligence layer above the existing Visa rail rather than competing with it.

WHY NOW

The \$750M raise has just closed at a \$44B valuation - brand-investment authority is at its peak right now - and Ramp begins UK/EU onboarding this summer. The British Grand Prix at Silverstone (3-5 July 2026) is the natural UK activation window for that launch, and the corporate-spend category on the grid is uncontested: moving in the next 6-10 weeks lets Ramp align its biggest market-entry moment with a home-market race weekend before a rival like Brex notices the open lane.

BOTTOM LINE

A just-closed \$750M round at a \$44B valuation (+38%), \$1B+ ARR and FCF-positive, launching in the UK/EU this summer - and no spend-management brand sits anywhere on the F1 grid. Visa Cash App Racing Bulls is the structural fit: Ramp as the spend layer above the Visa rail.

WHY VISA CASH APP RACING BULLS

Racing Bulls already carries Visa as its title sponsor, and Ramp's deepened multi-year Visa issuing agreement makes co-presence structural rather than conflicting: Ramp becomes the spend-management intelligence layer above the Visa payment rail, reinforcing both brands. Cash App's younger demographic mirrors Ramp's founder, developer and CFO-suite audience, and no spend-management brand is anywhere near the car - so Ramp would own, not share, the category. The British GP at Silverstone gives the UK launch a home-market stage.

VALUE TO VISA CASH APP RACING BULLS — MODE B (TECH SERVES THE TEAM OPERATION)

MODE B - real operational value, off-car. Ramp's payments rail and back-office stack map onto Racing Bulls' commercial machine: paddock supplier settlements, sponsor-activation treasury flows, and a partner-onboarding funnel of venture-backed, CFO-led companies - exactly the audience the team wants. Ramp's Visa issuing partnership amplifies rather than displaces the title relationship. In return the team offers B2B-fit surfaces: garage hospitality, pit-wall broadcast cuts, and founder-audience content timed to the British GP. The team gets a modern finance stack and aligned co-marketing; Ramp gets the stage.

DEAL ARCHITECTURE

Entry at Official Spend Management Partner tier. FOUR YEARS, to span the EU/UK build-out cycle and capture full FIA calendar rotations through Silverstone, Las Vegas and Austin. Estimated \$6-9M/yr. Scope: garage and cockpit logo rights, Visa co-activation rights, hospitality at the British GP and Las Vegas, and digital content rights for Ramp's CFO-audience channels.

PRIMARY DECISION-MAKER

Eric Glyman

CEO & CO-FOUNDER, RAMP - VERIFIED

Glyman co-founded Ramp after co-founding Paribus (acquired by Capital One). He drives strategic capital allocation and partnership decisions; the just-closed \$750M raise and the deepened Visa partnership are direct outputs of his office, so a sponsorship of this scale is his call. Co-decision-maker: co-founder & CTO Karim Atiyah on technical integration.

OPENING ANGLE

"Eric, the \$44B round and your UK/EU launch this summer line up exactly with Racing Bulls - Ramp as the spend layer above the Visa rail - and the British GP is a ready-made home-market activation. 25 minutes before a rival notices the open lane?"

SCORE COMPOSITION

TIMING 19 / 20 A \$750M round just closed at a \$44B valuation (Jun 2026, +38% from \$32B six months earlier) and UK/EU onboarding launches this summer - brand-investment authority is at its peak now.	CAPACITY 20 / 20 \$44B valuation, \$1B+ ARR, free-cash-flow positive - a \$6-9M/yr deal is immaterial to the balance sheet.	BRAND FIT 19 / 20 No spend-management brand anywhere on the F1 grid; the deepened Visa issuing relationship makes co-presence with Racing Bulls' Visa title structural, and the CFO/developer audience matches the team.	URGENCY 14 / 20 The UK/EU launch this summer aligns with the British GP at Silverstone (Jul 2026) as a home-market activation window, and the category is uncontested - real urgency, but no one-time hard lock.	OPS FIT 12 / 20 MODE B: back-office and treasury - Ramp serves the team's spend and settlement operation rather than the car itself.
---	--	---	---	---

RISKS & COUNTERS

VISA CHANNEL CONFLICT Ramp's Visa issuing deal could be read as a conflict with the Visa title sponsorship. **Counter:** It is a structural bridge, not a conflict - frame Ramp as the spend-intelligence layer above the existing Visa relationship; the two roles are architecturally distinct and mutually reinforcing.

OFF-CAR RELEVANCE (MODE B) Spend management serves the team's back office, not the car, so the 'technology partner' story is softer. **Counter:** Lead with the structural Visa co-presence and a CFO/founder-audience hospitality and pipeline play; the value is audience and the Visa bridge, not a garage integration.
