

# Kraken (Octopus Energy spin-out)

Utility / Energy AI Software & Grid Flexibility · London, UK · Private (\$8.65B; spun out 2026; \$500M+ contracted revenue; IPO-track)

Octopus Energy spun Kraken out as an independent \$8.65B company in a \$1B raise (D1 Capital, Fidelity, Ontario Teachers'), IPO-track by mid-2026 - a clean B2B energy-AI platform with real smart-EV-charging tech, never in motorsport, and an open energy lane on the Formula E grid.

THE CASE

Kraken, the AI utility-software platform incubated inside Octopus Energy, has just been spun out as an independent company valued at \$8.65B in a \$1B raise (led by D1 Capital, with Fidelity, Durable and Ontario Teachers'), and is on track for a public listing by mid-2026. It is a clean B2B story: Kraken licenses its platform to global energy giants (EDF, E.ON, Tokyo Gas, Origin, Severn Trent), serving 70M+ utility accounts with \$500M+ in contracted annual revenue, while its Kraken Flex arm runs smart-EV-charging, virtual-power-plant and grid-flexibility tech across 2GW+ of managed assets. It has never touched motorsport. For an all-electric championship, a clean-energy / smart-charging platform is an unusually on-message partner, and the energy/grid lane is open on Jaguar TCS Racing (TCS holds the IT/data/title lane, Chase holds financial services). Led by CEO Amir Orad (ex-Sisense, NICE Actimize), with CFO Tim Wan (ex-Asana) - an enterprise-software team built for an IPO and the brand-building that precedes it.

WHY NOW

The spin-out and \$1B raise just closed and an IPO is targeted for mid-2026, so the capital and the brand mandate are live right now - and post-spin-out, pre-IPO is exactly when a platform invests in enterprise brand. A clean-energy software leader on the world's premier electric racing series is a uniquely on-message story, the category lane is open, and a founder-style enterprise-software CEO (Amir Orad) with an IPO to position will move fast on a differentiated, substance-led pitch.

BOTTOM LINE

Octopus Energy just spun Kraken out as an independent \$8.65B company (\$1B raise led by D1 Capital, Fidelity and Ontario Teachers'), IPO-track by mid-2026. It is a clean B2B energy-AI platform - 70M+ utility accounts, \$500M+ contracted revenue - whose Kraken Flex arm runs real smart-EV-charging and grid-flexibility tech. That is a near-perfect, on-message fit for electric racing, the energy/grid lane is open on Jaguar, and CEO Amir Orad has an IPO brand mandate now.

DISCOVERY: SELF

WHY JAGUAR TCS RACING

Jaguar TCS Racing is British (matching London-based Kraken), premium, and explicitly sustainability-and-technology-led, with a long-term GEN4 commitment through 2026-2030 - so the relationship can run for the full multi-year horizon. Its energy/grid-software lane is open (TCS owns IT/data and the title, Chase owns finance), letting Kraken own a distinct, on-message 'sustainable energy tech' category rather than competing with the incumbent IT partner.

VALUE TO JAGUAR TCS RACING — MODE B (TECH SERVES THE TEAM OPERATION)

MODE B with real, named mechanics across three fronts. (1) ENERGY / SUSTAINABILITY WORKSTREAM: Kraken Flex runs smart-EV-charging, virtual-power-plant and grid-flexibility tech (2GW+ of managed assets, 200k+ connected devices) - a credible basis to optimise and showcase the energy footprint of the team's operations and facilities (charging, battery, on-site renewables) and to co-tell a hard-data sustainability story that Formula E's audience and the FIA's net-zero agenda actually reward - substance, not a green logo. (2) COMMERCIAL / B2B: Kraken sells to the world's energy giants (EDF, E.ON, Tokyo Gas, Origin), and Formula E's paddock and host-city programmes are dense with the utility, government and infrastructure decision-makers it courts - so team hospitality becomes a working enterprise channel, while Jaguar gains a well-capitalised (\$8.65B), IPO-track technology anchor that strengthens its commercial roster in a category it currently lacks. (3) BRAND / CONTENT / TALENT: 'the software running the world's energy, powering the team that races on electricity' is an ownable co-marketing narrative, with a content series on energy/AI and a recruiting halo for the data/ML/energy engineers both sides fight for. Jaguar gets a distinctive sustainable-energy-tech partner and a real data story; Kraken gets an on-message global brand stage and a live reference ahead of its IPO.

DEAL ARCHITECTURE

Official Sustainable Energy / Grid-Tech Partner tier on Jaguar TCS Racing, minimum three years (aligned to the GEN4 cycle), ~\$3-5M/yr, with category exclusivity in energy/grid software and a defined energy-data + sustainability activation workstream.

PRIMARY DECISION-MAKER

**Amir Orad**  
CEO, KRAKEN - VERIFIED (APPOINTED AUG 2024; EX-SISENSE, NICE ACTIMIZE)

Dedicated CEO of the newly-independent Kraken, a veteran enterprise-software leader brought in to scale it toward an IPO - the owner of brand positioning at this stage and the right entry point. Co-decision-maker: CFO Tim Wan (ex-Asana), who runs capital-markets/IPO strategy; Octopus founder Greg Jackson remains an influential stakeholder.

OPENING ANGLE

"Amir - you just spun out at \$8.65B with an IPO ahead, and there is no cleaner stage for an energy-AI platform than the world's electric racing championship. Jaguar's energy lane is open and it is British, like Kraken. A real sustainability-data workstream, not a logo. 25 minutes?"

RISKS & COUNTERS

**B2B PLATFORM, NICHE BRAND** Kraken sells to utilities, not consumers, so the sponsorship logic isn't obvious at first glance. **Counter:** Formula E's audience and host-city programmes are full of the utility/government/infrastructure buyers Kraken courts, and the all-electric narrative is uniquely on-message - the audience ROI is direct.

**CAPITAL FOCUSED ON GROWTH/IPO** A pre-IPO spin-out watches discretionary spend. **Counter:** Right-size to a value-to-mid energy-partner tier tied to a real energy-data workstream and measurable enterprise pipeline, not title-level spend.

**PERCEPTION OVERLAP WITH TCS** TCS is Jaguar's broad technology partner. **Counter:** Position Kraken precisely in the energy/grid-software vertical (a lane TCS does not hold), not as a general IT partner - the categories are distinct and the engine reads the lane as open.
