

Isomorphic Labs

AI Drug Discovery · London, UK · Private (DeepMind spin-out; \$600M round, unicorn)

DeepMind spin-out Isomorphic Labs raised \$600M into unicorn territory - a British AI deep-tech with a precision-science story and no motorsport footprint, ideal to court early before crowding rises.

THE CASE

Isomorphic Labs, the DeepMind/Alphabet spin-out, took its first external capital (\$600M) in 2025, entering unicorn territory. Low crowding (~25) makes it an ideal early relationship: a British, precision-science brand whose talent-and-credibility goals could be served by a measured FE association.

WHY NOW

Relationship-first, not a deal yet - get in before the crowd, while the brand is still being built.

DISCOVERY: SELF

WHY JAGUAR TCS RACING

Jaguar TCS Racing - British, sustainability-and-IT-services-led - is the natural cultural fit.

VALUE TO JAGUAR TCS RACING — MODE B (TECH SERVES THE TEAM OPERATION)

MODE B. Primarily a science/innovation and talent-brand association rather than an in-car system; value sits in shared 'precision and discovery' narrative and recruiting halo.

DEAL ARCHITECTURE

Start with a modest official-partner tier, minimum three years, structured to grow; ~\$2-3M/yr.

PRIMARY DECISION-MAKER

Isomorphic Labs Head of Comms / CEO Demis Hassabis (verify lead)

LEADERSHIP / COMMS

Founder-led (Demis Hassabis); confirm the brand/comms owner. A long-horizon, relationship-first target.

OPENING ANGLE

"You're a unicorn no one in motorsport has called. Let's build the relationship before you're the 100th name in the paddock."

SCORE COMPOSITION

TIMING

13 / 20

First external capital (March 2025, \$600M) - early in its brand life.

CAPACITY

16 / 20

Unicorn-territory, Alphabet-linked; capacity solid, spend appetite unproven.

BRAND FIT

13 / 20

British deep-tech; precision/science narrative fits a British team, but pharma is an unusual motorsport category.

URGENCY

10 / 20

Low; long-horizon relationship.

OPS FIT

9 / 20

MODE B: no direct in-car use; a science/innovation brand-association play.

RISKS & COUNTERS

OFF-STRATEGY RISK A drug-discovery lab may see motorsport as irrelevant. **Counter:** Frame as talent attraction and precision-science narrative, not consumer reach; keep it small and optional to scale.
