

JFrog

DevSecOps / Software Supply Chain Security · Sunnyvale, CA · NASDAQ: FROG

The CMO who built the Udemy-McLaren partnership now runs marketing at JFrog - a profitable, cash-rich public company - and the software-supply-chain-security slot on the F1 grid is still empty.

THE CASE

On 5 January 2026 JFrog appointed Genefa Murphy as Chief Marketing Officer for what it called its 'next growth phase' in AI-driven software supply chain management. Murphy is the decisive signal: at Udemy she personally architected the multi-series McLaren Racing partnership (F1, IndyCar, NEOM McLaren Formula E and Extreme E). She is a proven, repeat motorsport-sponsorship believer who now controls the brand budget of a company with \$531.8M revenue (+24% YoY), \$704.4M cash and \$142.3M free cash flow. Her public thesis for JFrog - that 'as velocity increases there is an increasing need for trust, control and discipline across the software supply chain' - is a ready-made Formula 1 narrative. And the category is open: Confluent (data streaming) sits on Williams, but no software-supply-chain-security brand is anywhere on the grid.

WHY NOW

Murphy is ~5 months into a mandate defined as a growth-phase reset - the moment a CMO sets the multi-year brand-investment agenda. She has done an F1/FE deal before, so the internal 'does motorsport work for B2B?' objection is pre-answered by her own track record. Move while the whitespace is empty, before a DevSecOps rival plants a flag.

WHY MCLAREN

McLaren is the warm path: Murphy knows the McLaren commercial organisation intimately from the Udemy partnership, and McLaren's technology-forward, precision-engineering identity mirrors JFrog's 'secure software, shipped fast' promise. Aston Martin is the fallback - premium CISO/CTO gravitas with an open DevSecOps slot.

VALUE TO MCLAREN — MODE A (TECH IN THE CAR / CHAMPIONSHIP)

MODE A. A modern F1 team ships thousands of software builds a season across simulation, strategy and car systems - that is a software supply chain. JFrog's platform offers a genuine technical-partner integration (artifact management, security scanning across the team's dev pipeline), not just branding. That earns authentic 'official software supply chain partner' storytelling McLaren can stand behind, plus enterprise hospitality where JFrog's CISO/CTO buyers already sit.

DEAL ARCHITECTURE

Official Software Supply Chain Partner tier on McLaren. MINIMUM THREE YEARS at an estimated \$3-5M/yr, calibrated to JFrog's \$531.8M revenue and \$704M cash. Car/suit branding in the security category, garage and B2B hospitality, digital inventory, and a category-exclusivity clause so no DevSecOps rival follows.

PRIMARY DECISION-MAKER

Genefa Murphy, PhD

CHIEF MARKETING OFFICER, JFROG (APPOINTED JAN 5 2026)

Former Chief Marketing & Content Officer at Udemy, where she built the multi-series McLaren Racing partnership. Previously CMO of Five9, SVP & CMO of Micro Focus, and Global VP Corporate Marketing at HPE. A repeat motorsport-sponsorship dealmaker who now owns JFrog's brand budget.

OPENING ANGLE

"Genefa, you proved at Udemy that an F1 grid is a B2B channel, not a billboard. The software-supply-chain-security slot is still empty - JFrog can own the category McLaren's other tech partners can't. Can we book 25 minutes?"

SCORE COMPOSITION

TIMING

18 / 20

CMO Genefa Murphy appointed Jan 5 2026 for a declared 'next growth phase'; FY2027 brand-budget planning is forming now.

CAPACITY

18 / 20

FY2025 revenue \$531.8M (+24%), \$704.4M cash, \$142.3M FCF, NDR 118%. A \$3-5M/yr deal is immaterial.

BRAND FIT

19 / 20

No software-supply-chain-security brand is on the F1 grid (Confluent = data streaming). JFrog can OWN the category; Murphy's thesis 'trust, control, discipline at velocity' is a literal motorsport metaphor.

URGENCY

15 / 20

Rivals Sonatype/Snyk circle the same whitespace; first-mover locks the category for 3 years.

OPS FIT

16 / 20

MODE A: a team's build/release pipeline is real software supply chain - JFrog tooling has a genuine in-garage engineering use, not just a logo.

RISKS & COUNTERS

BUDGET CYCLE LAG A discretionary brand-sponsorship line may not be approved until FY2027. **Counter:** Frame as a founder-level category land-grab; offer a short-form LOI to hold category exclusivity now.

FOUNDER ALIGNMENT Founder-CEO Shlomi Ben Haim is hands-on; a marquee spend needs his buy-in. **Counter:** Position trust/security as JFrog's core message - a CEO narrative, not a marketing line item.

B2B SKEPTICISM Investors may question motorsport spend at a profit-inflecting company. **Counter:** Murphy's Udemy-McLaren results are the proof case; lead with B2B pipeline outcomes, not impressions.
