

Quantinuum

Quantum Computing · Broomfield, CO / Cambridge, UK · IPO pending (~\$12.7B target valuation)

Honeywell spin-off Quantinuum is heading for a ~\$12.7B IPO - a textbook overnight unicorn with a brand-elevation budget, an Anglo-American footprint, and no motorsport history.

ACTION HORIZON

6-8 WKS

THE CASE

Quantinuum is the highest-priority class in our mandate: a born-big spin-off (from Honeywell) heading into a ~\$12.7B IPO, up 27% on its \$10B September 2025 valuation. An IPO is a one-time brand-elevation moment, and an F1 association is among the fastest ways for a deep-tech company to acquire global enterprise visibility. It has never entered motorsport.

WHY NOW

The IPO roadshow is the window: leadership is actively investing in public-market visibility and enterprise credibility. A multi-year F1 engineering-partner deal signed around the listing compounds the narrative.

DISCOVERY: SELF

WHY ASTON MARTIN

Aston Martin's premium engineering gravitas aligns Quantinuum's Anglo-American identity with a precision/compute halo - 'the quantum edge in performance R&D' - in front of a C-suite audience.

VALUE TO ASTON MARTIN — MODE A (TECH IN THE CAR / CHAMPIONSHIP)

MODE A (developing). Quantum and advanced optimisation increasingly touch race strategy, aero simulation and logistics. Positioned as an R&D/innovation partner, Quantinuum offers a credible compute-frontier story and a talent-attraction halo, with a roadmap toward genuine simulation use cases.

DEAL ARCHITECTURE

Official Innovation / Quantum Partner tier, minimum three years, estimated \$3-6M/yr, positioned as an R&D-and-brand halo around the listing, with category exclusivity for quantum computing.

PRIMARY DECISION-MAKER

Quantinuum CMO / Head of Brand (verify)

MARKETING / BRAND LEADERSHIP

Confirm the current CMO/brand lead and IPO communications owner; the CFO and IR team are co-decision-makers during the listing window.

OPENING ANGLE

"You get one IPO. An F1 innovation partnership turns your listing from a finance event into a global brand moment - and quantum is the one category no rival on the grid can claim."

SCORE COMPOSITION

TIMING

16 / 20

IPO roadshow is a once-only brand-elevation moment.

CAPACITY

20 / 20

Honeywell spin-off targeting a ~\$12.7B IPO (27% premium over its \$10B Sept 2025 round).

BRAND FIT

15 / 20

Quantum = ultimate precision/compute narrative; Anglo-American footprint suits a British team.

URGENCY

12 / 20

No direct quantum rival on the grid; the forcing function is the IPO window itself.

OPS FIT

13 / 20

MODE A (aspirational): compute/optimisation R&D halo around simulation and strategy, though not yet a literal in-car system.

RISKS & COUNTERS

IPO QUIET PERIOD Securities rules may restrict spend/announcements around the listing. **Counter:** Sign quietly, activate post-listing; use the roadshow to build consensus.

DEEP-TECH BRAND CAUTION A quantum firm may see F1 as off-strategy. **Counter:** Position as enterprise credibility and talent attraction, not consumer marketing.
